FOREWORD

This summary provides details relating to the area, production, average yield and overseas disposal of crops other than vegetables and fruit. Summaries in respect of each of these two crop divisions, together with a summary for wheat, are in course of compilation.

For the seasons 1942-43 to 1945-46, statistics of areas and production relate in the main to crops sown during the year ended March 31. Where harvests were not completed by that date, provision is made for inclusion of estimated yield of incompletd harvests. In the case of perennial crops, the statistics relate to the position as at 31st March and production during the year ended on that date.

For all years the statistics are derived from annual census returns supplied by approximately 250,000 farmers who utilise 1 acre or more for agricultural or pastoral purposes. These returns are collected by the Statisticians of each State, and by the Commonwealth Statistician in respect of the Australian Capital Territory. They exclude the Northern Territory.

Figures herein for the season 1945/46 are subject to revision.

ROLAND WILSON

COMMONWEALTH STATISTICIAN

(1st November, 1946)

1. AUSTRALIA: WHEAT PRODUCTION AND AVERAGE YIELD
OF INDIVIDUAL CROPS, 1945-46

1.

The areas under each of the principal crops together with the production and average yield therefrom during the season 1945-46 are shown in Tables 1, 2 and 3.

TABLE 1. AUSTRALIA: WHEAT OF CROPS - 1945-46

(a) All green fodder is shown under "other" in years 1939-40 and 1940-41 but green fodder from the main cereal crops is shown separately for the years 1941-42 to 1944-45.

(b) Excludes Queensland which is included in other green fodder crops.

(c) Includes oats, maize, barley and rye for green fodder in Queensland.

(d) Vegetables harvested.

(e) Fenicum, Millet (not Broom Millet) and Setaria.

(f) Not available, included with all other crops.

(g) Preliminary totals subject to revision.
