EXPLANATORY NOTES

Introduction

This publication contains monthly and year-to-date statistics of Australia's imports classified by Divisions (2 digits) and Items (5 digits) of the *Australian Import Commodity Classification* (AICC) (1204.0). Statistics at the Section (1 digit) level are available in the *ABS publication Imports by Commodity Divisions (Preliminary)* (5405.0). Statistics for 1980-81 and 1981-82 are preliminary and subject to revision.

Source of data

2. These statistics are compiled by the Australian Bureau of Statistics from information contained in import entries submitted by importers or their agents to the Bureau of Customs as required by the Customs Act.

Scope of the statistics

3. The statistics of imports presented in this publication are, with one exception, recorded on a *general trade* basis, i.e. imports comprise goods entered directly for home consumption together with goods imported into Customs warehouses. Table 1 of this publication also shows statistics of imports on a *special trade* basis, i.e. imports cleared for home consumption. Imports cleared for home consumption differ in scope from imports in that they include withdrawals from bonded warehouses but exclude imports into bonded warehouses.

4. The following are excluded from recorded imports statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) bunkers and stores supplied to vessels and to aircraft prior to arrival in Australia;
- (c) migrants' and passengers' effects imported and parcels post imports of small value, for which Customs entries are not required;
- (d) certain materials under inter-governmental agreements for defence and similar projects for which Customs entries are not required;
- (e) vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries;
- (f) the purchase of any vessel and/or aircraft intended for use on overseas routes;
- (g) fish and other sea products landed in Australia directly from the high seas by Australian vessels;
- (h) entries lodged on informal clearance documents (ICD) for values not exceeding \$250.

Statistical period

5. Imports are recorded statistically in the calendar month in which the import entries are both finalised by the Bureau of Customs and passed to the ABS for further processing. Import entries may be lodged early using the check-to-arrive system or the documents may be delayed because of various validation checks carried out by Customs prior to the entries being passed to the ABS.

6. Import statistics for a particular month do not necessarily represent entries lodged or commodities actually imported during the month in question. Analysis of past data has shown that in aggregate approximately 70% of import trade by value recorded for a particular month was actually imported during that month, 25% was actually imported during the previous month with the remaining 5% being imported in earlier months. For individual commodities the percentage by value representing actual imports in a month may vary considerably.

Valuation

7. The recorded value of imports is the value for duty for Customs purposes (VFD). On 1 July 1976, Australia adopted the internationally recognised Brussels Definition of Value (BDV) on a free-on-board (f.o.b.) basis (i.e. charges and expenses involved in delivering the goods from the place of exportation to the place of introduction in Australia, are excluded). The value for duty is based on the normal price i.e. the price the goods would fetch at the time when duty becomes payable on a sale in the open market between a buyer and a seller independent of each other. In practice, the basis for valuation is generally taken to be the invoice price subject to certain safeguards and adjustments where necessary.

8. The recorded value of imports includes the value of the outside package, other than international containers used for containerised cargo.

Merchandise imports

9. In accordance with standards recommended by the United Nations merchandise imports are defined as all goods which add to the stock of material resources in Australia as a result of their movement into the country. Merchandise imports, therefore, exclude goods imported with the reasonable expectation of re-export within a limited time. A complete list of commodities not included in merchandise trade is shown under Section 9(b) of the AICC. These include, for example, coin being legal tender and goods for temporary exhibition in Australia. Goods excluded from merchandise trade are for convenience termed non-merchandise and non-merchandise trade is shown separately in some tables. Total trade is the addition of merchandise and non-merchandise trade.

Commodity classification

10. Imports are classified according to the items of the AICC which, from 1 July 1978, has been based on the *Standard International Trade Classification*, Revision 2. A detailed description of the commodity items included in this publication is contained in the AICC Copy or extracts from the classification may be obtained from offices of the ABS in Canberra and in each capital city.

Broad Economic Categories

11. Imports of merchandise in Table 5 are classified according to the nineteen categories of the United Nations' Classification, Broad Economic Categories (BEC). The BEC attempts to classify external trade statistics for the purposes of general economic analysis according to the main end use of the commodities traded. Figures for previous years have been compiled and are available on request.

ASIC industry of origin

12. Import statistics classified by Subdivisions of the *Australian Standard Industrial Classification* (ASIC) have been introduced from July 1980. These statistics are compiled by allocating statistical items of the AICC to the ASIC industry of origin with whose main economic activities the commodities are primarily associated. A full description of ASIC Classes is contained in the publication *Australian Standard Industrial Classification*, Vol 1 — *The Classification* (1201.0).

Country

13. For the purposes of overseas trade statistics, a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with Australian Customs provisions. External territories under Australian administration are treated separately whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian overseas trade statistics. For imports, *Country* refers to the country of origin of the goods which is defined as the country of production for Customs purposes.

State

14. Means the State in which the import entry was lodged with the Bureau of Customs. The port of lodgement of the import entry is not necessarily the port of discharge of the goods. Goods forwarded interstate after import, whether in containers or not, are recorded as being imported at the port of lodgement of the import entry.

Revisions to previous figures

15. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this publication. For this reason, monthly figures published in previous issues for the current financial year will not necessarily add to the year-to-date figures shown in the latest issue.

16. Statistics shown in this publication were the latest available at the time of compilation. However, revisions may have since been made to the statistics, which could result in differences between figures in this publication and those in other related publications e.g. *Imports by Commodity Divisions, Australia* (Preliminary) (5405.0).

Other information available

17. *Special returns service*: Subscribers to this service can receive computer produced printout of overseas trade statistics at the commodity specific level in one or more of a limited number of formats, for a charge consistent with the level of detail required. This service is recommended where up to fifty specific commodity items are required on a regular basis.

18. *Microfiche service*: Overseas trade statistics are also available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported at various levels of aggregation. This service is recommended where the subscriber wishes to obtain overseas trade details for a large number of commodities.

19. To meet subscribers, needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Payment in advance is required for both these services and relevant application forms and/or information papers are available from the ABS Overseas Trade Section in Canberra, or from each ABS State office.

Related publications

20. Other ABS publications which may be of interest include:

Imports of Assembled New Passenger Motor Cars, Australia (5416.0)—issued monthly

Exports, Australia (5404.0)—issued monthly

Exports and Imports of Merchandise at Constant Prices, Australia (5421.0)—issued quarterly

21. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0) which is available free of charge from any ABS office.
