EXPLANATORY NOTES

Introduction

This publication contains statistics of Australia's exports of major commodities and their principal markets. The commodities included in this publication are listed on page 2. Statistics for 1979-80 are preliminary and subject to revision.

Source of data

2. These statistics are compiled by the Australian Bureau of Statistics from information contained in export entries submitted by exporters or their agents to the Bureau of Customs as required by the Customs Act.

Statistical period

3. Exports are recorded statistically in the month in which the entries are passed by the Bureau of Customs. Normally this is within a few days of shipment of cargo, but delays sometimes occur in the lodging of entries. The statistical month for Customs outports (generally ports other than those at which the main Customs Office in each State is located) closes on 21st of each month whereas for mainports the statistical month is the calendar month.

Valuation

4. Goods sold to overseas buyers before export are valued at the f.o.b. Australian port of shipment equivalent of the actual price paid to the exporter. Goods shipped on consignment are valued at the f.o.b. Australian port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale. The value of outside packages is included.

Commodity classification

5. From 1 July 1978, exports have been classified according to the new *Australian Export Commodity Classification* (A.E.C.C.) (1203.0) which is based on the Standard International Trade Classification, Revision 2. A detailed description of the commodities included in this publication is contained in the A.E.C.C. Copies of, or extracts from, this classification may be obtained from offices of the ABS in Canberra and in each capital city.

Country

6. This means the country to which goods were consigned at the time of export. Where the country of

consignment is not determined at the time of export goods are recorded as exported 'For orders'.

Revisions to previous figures

7. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this publication. For this reason, monthly figures published in previous issues for the current financial year will not necessarily add to the year-to-date figures shown in the latest issue.

8. Statistics shown in this publication were the latest available at the time of compilation. However, revisions may have since been made to the statistics, which could result in differences between figures in this publication and those in other related publications e.g. *Exports and Imports, Australia (Preliminary)* (5401.0), *Exports by Commodity Divisions, Australia (Preliminary)* (5402.0).

Special returns system

9. Users requiring more detailed statistics for individual commodity items can obtain these from the special returns service under which statistics for items selected by the user are extracted and forwarded regularly for an appropriate charge.
