EXPLANATORY NOTES

Introduction

This bulletin contains detailed information regarding registrations of new motor vehicles and of motor vehicles on register — and includes details of utilities and panel vans classified by tare and rigid and articulated trucks classified by gross vehicle mass/gross combination mass. It is supplementary to the quarterly statement (9303.0) issued for the quarters ending, September and December 1977 and March and June 1978.

2. The figures in this bulletin include vehicles with diplomatic and consular plates and Government-owned new vehicles other than those belonging to the defence services.

3. In these statistics, 'registrations' mean registrations processed by the motor vehicle registration authorities in the States and Territories during the period. In Victoria, Queensland, and the Northern Territory, advice of some registrations is often not received by the central motor vehicle registration authority until some time after the actual date of registration; for this reason, a considerable number of registrations processed in a month actually relate to vehicles registered prior to that month. In other States and the Australian Capital Territory, the figures depart little from actual registrations during the period.

Seasonal adjustment

4. Original and seasonally adjusted registrations of new motor vehicles are shown in Table 1. The two component series 'Motor cars and station wagons' and 'Other vehicles' are each adjusted separately, and the adjusted figures for total registrations are obtained by adding together the two component series. Details of the methods used in seasonally adjusting the component series are given in *Seasonally Adjusted Indicators, 1978* (1308.c).

Classification of vehicles

5. From July 1976, a revised motor vehicle classification has been used for new motor vehicle registration statistics. This was also used in the 30 September 1976 Motor Vehicle Census. This classification, which replaced that introduced from 1 January 1972, has as its main features:

- (a) adoption of the principle of accepting vehicle-type data as recorded by the registration authority;
- (b) allocation of commercial vehicles to the categories 'utilities', 'panel vans', or 'rigid trucks' solely on the basis of recorded body-type; under the previous classification system, these commercial vehicles were classified as 'light commercial type' (if having less than 1 tonne carrying capacity) or as 'rigid' (if having a carrying capacity of 1 tonne or more), the light commercial type being then further sub-divided into "open" or "closed";

- (c) the inclusion in 'other truck types' of ambulances and hearses (previously classified as 'light commercial, closed') and motorised caravans (but see paragraph 7 below)

6. During the period January 1972 to October 1976 inclusive the classification of commercial vehicles in Western Australia was based on carrying capacity. From November 1976 these vehicles have been classified according to the 'as recorded' basis which has been the basis for classification in the other States and Territories since July 1976 (see also paragraph 5). Therefore, the 1976-77 Western Australian figures for utilities, panel vans and trucks are not directly comparable with those for the other States and Territories.

7. A change in the registration system in Queensland has meant that, from October 1976, all commercial vehicles and motorised caravans registered with a gross vehicle mass of 4 tonnes or less are recorded as either utilities or panel vans. As the classification of utilities, panel vans, trucks and other truck types is not consistent throughout 1976-77, figures for these vehicles are not comparable either during the year or with those for earlier periods.

8. Legislation to provide for the compulsory registration of recreation vehicles (e.g. trailbikes, minibikes, sand dune buggies) intended for use in public places came into force in Victoria on 17 September 1973 and in Queensland on 1 January 1977. Particulars of these registrations are regarded as outside the scope of new motor vehicle registration statistics and are accordingly excluded from statistics contained in this statement.

9. Particulars of registrations of new tractors, plant and equipment, and caravans and trailers are shown in Table 20. Many tractors (particularly the agricultural types) and items of plant and equipment are not registered, and therefore are not included in this table. The extent to which they are included varies from State to State.

Classification by area

10. In all States, 'capital city' registrations refer to vehicles for which the address of the registered owner is located within the capital city statistical division. These statistical divisions are re-defined from time to time usually as the result of information available from periodic population and housing censuses. On 1 January 1976 the capital city statistical division in New South Wales was expanded and prior figures for that State are not directly comparable. All registrations in the Australian Capital Territory are included under 'capital cities' while those in the Northern Territory are included under 'other areas'.

Motor vehicles on register

11. While different concepts of what constitutes 'motor vehicles on register' at a particular point of time may be appropriate for different requirements, for the

purpose of obtaining uniform statistics for all States and Territories it is necessary to adopt a common concept of what constitutes motor vehicles on register at a particular date. In this series, motor vehicles on register at a particular date are defined as those vehicles in respect of which fees were paid for a period including the specified date, either in advance, or on that date, or retrospectively.

12. Censuses of motor vehicles on register have been conducted in respect of 31 December 1955 and 1962 and 30 September 1971 and 1976. Final detailed results have been published in separate census bulletins for each State, Territory and Australia. From December 1976, details of Australian Government owned vehicles on register will only be available at 31 December each year. Estimates at 30 June 1977 therefore include Australian Government owned vehicles registered at 31 December 1976.
