#### NOTE

The Overseas Trade Statistics published herein have been compiled from documents obtained under the Customs Act and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Trade and Customs.

EXPORTS are recorded statistically in the month in which the export entries are passed by the Department of Trade and Customs. Normally, this is within a few days of shipment, but shipment of some major items is at times considerably delayed by abnormal factors affecting sales and deliveries for export. When such delays occur, exports are diminished (pro tanto) and when such delays are overtaken shipments include substantial quantities of accumulated stock as well as current disposals.

In addition to the above, shipments of the two major exports - wool and wheat - are affected by special factors.

Wool shipments in any trade year are at times materially affected by the fact that wool auctions normally end in May or June, and there is a variable carry-over for shipment in the next trade year.

New season's wheat normally becomes available for shipment from December onwards, and the quantity shipped in any trade year (ending June) depends on the size of the crop and the time-spread of sales for export.

During and since the war the factors mentioned have caused marked variations in shipments within any trade year. This has materially influenced the quantity and value of exports recorded for individual months and years, and consequently the recorded excess of exports over imports.

IMPORTS are recorded statistically in the month in which import entries are passed by the Department of Trade and Customs. Normally this is within a few days of discharge of cargoes.

# BALANCE OF TRADE

In the following table the value of Australia's trade with countries in the sterling and non-sterling areas is shown for the months of May, 1950, April and May, 1951 and the eleven months ended May, 1950 and 1951.

The statistics of overseas trade shown in this Bulletin relate to exports shipped and imports landed as recorded on the export and import entries of the Department of Trade and Customs for the specified periods. Owing to the changing incidence of contractual arrangements there is at times a considerable interval between the date on which the change of ownership of goods takes place and the date of shipment or arrival. For these and other reasons recorded values of overseas trade require adjustment before being interpreted in terms of the Australian Balance of Payments. These adjustments together with particulars of "invisible" transactions entering into the Balance of Payments (in particular, freight and insurance charges on imports, current production of Australian gold, payments of dividends, profits, interest and royalties, Government expenditure, etc) are shown in a printed bulletin published by the Commonwealth Statistician entitled "The Australian Balance of Payments 1928-29 to 1948-49". Later estimates, in round form, have been published showing particulars of Australia's balance of payments up to December, 1950.
