MAIN FEATURES

The population of the Northern Territory as estimated from the results of the Census of 30 June 1976, was 101,400 persons. This estimate was made by adjusting the figure of 97,090 recorded in the Census by 4.42 per cent for under-enumeration as revealed by the Post-Enumeration Survey (See Coverage, p3). The figure of 101,400 was published on 15 March 1977 (Catalogue No. 2409.0, Previously Ref. No. 2.02.10) and is not subject to further amendment.

The statistics of population and dwellings in the present publication, for both the 1976 and 1971 Censuses, are as enumerated at the Censuses and are not adjusted for under-enumeration. The figures for 1976 are derived from preliminary tabulations and are therefore subject to minor amendment in details, but not in total.

The term local government area used in the title of this publication (which is one of a series for States and Territories) relates also to those areas of the City of Brisbane, the Northern Territory and the Australian Capital Territory which have been separately identified in the absence of, or in addition to, legally defined local government areas. Where a boundary of one of these Local Government Areas has changed since 1971, the population and dwelling totals in 1971 have been estimated on 1976 boundaries (See Appendix A).

EXPLANATORY NOTES

Introduction

This bulletin is one of a series showing preliminary population and dwellings data, at various geographical levels, from the 1976 Census of Population and Housing.

These bulletins will be followed by a series of bulletins showing preliminary data for selected characteristics of the population, at State and Local Government Area Level. The characteristics are Age, Sex, Marital Status and selected Birthplace (Australia, United Kingdom, Other, Not Stated).

Data in all of these bulletins are preliminary and may be revised when processing of the remaining data is completed. This commenced in July 1977, and final statistics are expected to be released progressively from mid-1978 onwards.

Information about the availability of preliminary data at geographical levels other than those shown in this bulletin, for other States or Territories, or in other forms (magnetic tape or microfiche) can be obtained from the offices of the Australian Bureau of Statistics listed in Appendix B.

Content

The tables in this bulletin show preliminary information of the population by sex and of occupied private and non-private dwellings and unoccupied private dwellings in Local Government Areas as constituted at 31 January 1976 and in urban centres and bounded rural localities (for definitions see below).

For comparison the tables show the total 1971 population and dwellings. For Local Government Areas the 1971 data are shown on 1976 boundaries. For urban centres and bounded rural localities the 1971 data are shown on boundaries delineated at the 1971 Census.

The metric area shown for each LGA was, in general, calculated by conversion of previously published Imperial data and incorporates an amendment for any changes in boundaries since the last Census. As a result, there may be some minor discrepancies in comparison with metric areas published elsewhere. Such discrepancies are not considered significant for practical purposes. The City of Brisbane, the Northern Territory and the Australian Capital Territory are divided into statistical areas which, for Census purposes, are treated as LGA's. The areas of the suburbs of the City of Brisbane were supplied by the appropriate authority in Queensland. The areas of statistical areas in the Northern Territory and the Australian Capital Territory were calculated by a digitizing process.

Maps

This bulletin contains maps showing boundaries of Statistical Divisions, Subdivisions and Districts, LGA's and major urban areas for which data is shown. Additional copies of these maps can be made available on request.

Related Publications

The Australian Bureau of Statistics has released two publications showing final population totals for the individual States and Territories. Catalogue No. 2402.9 (Previously Ref. No. 2.02.9) shows final statistics as recorded at the Census of Population and Housing on 30 June 1976, and Catalogue No. 2409.0 (Previously Ref. No. 2.02.10) shows the population of the individual States and Territories adjusted for under-enumeration as shown by the Post-Enumeration Survey.

A number of information papers on technical details and on selected topics of the Population Census are being released progressively. Released already have been:

- Information Paper No. 1 - Availability of Census Results, which gives a general outline of the availability of data and lists the titles of the Information Papers series.

Information Paper No. 3 - Release of Data on Microfiche, which includes an order form as well as a description of fiche.

Information Paper No. 6 - Release of Data on Magnetic Tape, which sets out the details of the preliminary data on magnetic tape and also includes an order form.

Information Paper No. 9(i) - Classification of Characteristics, which sets out in topic form the classification of all population and dwelling characteristics.

Other papers yet to be released will cover the publication programme, release of main data on tape, pricing arrangements, the effect of sample processing of Census data as well as other aspects of the Census.

Related publications produced by other branches of the Australian Bureau of Statistics include: *Projections of the Population of Australia, 1977 to 2001, Base Year 1976 (Preliminary)* (Catalogue No. 3204.0, Previously Ref. No. 4.13), *Population and Vital Statistics (Preliminary), June Quarter 1976* (Catalogue No. 3211.0, Previously Ref. No. 4.16) and *Quarterly Summary of Vital and Population Statistics* (Catalogue No. 3212.0, Previously Ref. No. 4.11).

All publications produced by the ABS are listed in *Catalogue of Publications* (Catalogue No. 1101.0, Previously Ref. No. 1.8) which is available free of charge from any ABS office.

Status of Data

The process of transferring information from 1976 Census Schedules to magnetic tape is being carried out in two stages, preliminary processing and main processing.

Preliminary processing produced two data files:

- The Collection District Master File, containing preliminary population and dwelling counts at various geographic levels and final "as recorded" State population totals.
- The Collection District Basic Summary File, containing preliminary statistics of selected population characteristics (age, sex, marital status and birthplace).

Because of the nature of the preliminary processing system, there are minor differences in data contained on the two files. The Collection District Master File has been used in the compilation of this series of publications. The total number of persons shown for each State and Territory therefore

corresponds with that published in *Census of Population and Housing, 30 June 1976* (Catalogue No. 2402.9, Previously Ref. No. 2.02.9), showing the total enumerated population of each State and Territory. However, later publications of preliminary characteristics may show minor differences.

Scope

The 1976 Census of Population and Housing aimed at enumerating every person who spent Census night, 30 June 1976, in Australia; including persons on vessels in or between Australian ports, on board long-distance trains, buses or aircraft; and every dwelling, whether occupied or unoccupied. The Census was conducted on a *de facto* basis, i.e. persons were enumerated where they were on Census night, which may not be where they usually lived. *Visitors* to Australia were enumerated, if they were in Australia on Census night, regardless of how long ago they had arrived or how long they planned to stay. *Australians* out of the country on Census night were excluded from the count.

Diplomatic personnel and their families are, by definition, out of scope of the Census, as are diplomatic residences, including all persons resident therein on Census night. In 1976 there were no diplomatic personnel resident in the Northern Territory.

Coverage

As mentioned above, the Census aims at enumerating every person and dwelling, excluding diplomatic personnel and their residences, in Australia on Census night, 30 June 1976.

While every effort is made to minimise under-enumeration in all field collections, including the Census, some inevitably remains for various reasons (e.g. inadvertent omission of very young children, treatment by the collector of an occupied dwelling as unoccupied). Refusal by householders to complete the Census Schedule is not a significant cause of under-enumeration as estimates by the Collector are used in such cases.

Overall, the adjustment to the Census figures "as collected" is estimated to be 2.71 per cent for Australia as a whole, but varies not only from State to State but also between areas within States. For the Northern Territory it is estimated to be 4.42 per cent. For the estimated degree of under-enumeration in each State and Territory, see *Population of States and Territories Adjusted for Under-enumeration as Shown by Post Enumeration Survey* (Catalogue No. 2409.0, Previously Ref. No. 2.02.10).

Definitions

Dwellings — For Census purposes, dwellings are divided into two groups, occupied dwellings and unoccupied dwellings.

- (i) An occupied dwelling is defined as the premises occupied by a household on Census night (for definition of *household* see below). A *private dwelling* is normally a house, room or flat but it can also be a tent, houseboat or caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling. It is important to remember that the Census definition of a private dwelling means that the total number of dwellings may be more than the total number of known structures in any given area (see *Household* below). *Non-private dwellings* are motels, hostels, boarding houses, gaols, religious and charitable institutions, defence establishments and other communal dwellings. Usually, occupants of such dwellings will be using communal facilities such as hotel dining-rooms or mess halls. A caravan in a caravan park (whether permanently or temporarily) is treated as part of a non-private dwelling, as are self-contained units provided by commercial enterprises such as hotels, motels or guest-houses.
- (ii) An unoccupied dwelling is a structure built specifically for living purposes and capable of being lived in, but unoccupied at the time of the Census. Vacant houses, holiday houses, huts, cabins (other than seasonal worker's quarters) and houseboats are therefore counted as unoccupied dwellings; but vacant tents, garages and caravans (if not normally occupied) are not. Only private dwellings are classified as occupied or unoccupied. Unoccupied dwellings include dwellings vacant because they have been newly completed, vacant for demolition or repair, holiday homes, dwellings to let, and dwellings where the household was absent on Census night.

Household — For Census purposes, a household is a group of people who *live together* as a single domestic unit and *eat together*, the food eaten by members being served from a common supply. A person living alone is also a household. It is possible, then, for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his food for himself is not a member of the family's household but constitutes a separate household and therefore completes a separate Household's Schedule. As a dwelling is defined as the premises occupied by a household on Census night (see above), the number of households and number of dwellings is identical and the

number of dwellings as defined for Census purposes in an area may be greater than the known number of structures.

Migratory — Persons enumerated on board vessels in and between Australian ports, or on board long-distance trains, buses or aircraft are classified as Migratory. Such persons are not included in the population of specific LGA's, but are shown as a balancing item in the population of a State or Territory. By definition, there is no Migratory population in the Australian Capital Territory.

Campers Out — Persons who spent Census night in the open in cars, caravans or trucks pulled up at the side of the road for that night only, or persons in other temporary camps or accommodation erected for that night only are classified as campers out. Such persons are included in the population of the LGA in which they were enumerated.

Geographical Areas

Information from the Census is available at various levels of geographical detail. Only some of the possible geographical detail is shown in this bulletin; further geographical detail may be made available on request.

Collection District (CD) —

The CD is the smallest geographical area used in the collection and dissemination of census data. A CD is an area containing approximately 300 dwellings in urban areas and fewer in rural areas. CD's can be aggregated to form other geographic levels, such as Statistical Divisions.

Local Government Area (LGA) —

This is the principal tabulation unit used in the publication of census data. LGA's correspond in all but a few instances to legal Local Government Authority areas as defined at 31 January 1976. The exceptions are:

- (i) Some very minor areas for which boundary changes, involving nil or very minor populations, were received too late for implementation.
- (ii) The City of Brisbane, the Northern Territory, and the Australian Capital Territory are divided into statistical areas, which, for the sake of utility, are treated as LGA's for statistical purposes.

LGA Section —

LGA Sections are partitions of LGA's identifying each complete or partial urban centre or bounded rural locality within the LGA, and if necessary the

remaining rural part of the LGA.

Section of State -

This identifies geographic areas which are aggregations of CD's on a basis which ignores legal boundaries. Section of State boundaries are drawn for statistical purposes only.

Five Sections of State are recognised :

- (i) Major Urban - Urban centres with a population over 100,000
- (ii) Other Urban - Urban centres with a population of 1,000 to 99,999
- (iii) Bounded Rural Locality - Population clusters of 200 to 999 population
- (iv) Rural, Balance
- (v) Migratory - see above for definition.

Urban Centre -

At each Census of Population and Housing a boundary is defined for each population cluster of 1,000 or more people and for known holiday resorts of less population (if they contain 250 or more dwellings of which at least 100 are occupied). These clusters are known as urban centres and the population and dwellings enumerated in them are classified as urban for statistical purposes. The rules used to determine urban centres and define their boundaries are complex and can be made available on request.

Statistical Division -

Statistical Divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. A Capital City Division is predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the city (and associated urban centres) for a period of at least twenty years.

In 1976 Statistical Divisions, Statistical Subdivisions and Statistical Districts have been designed to be compatible, wherever possible, with State Planning Regions (See Appendix A).

Statistical Subdivisions -

Statistical Subdivisions are delineated in most States on the same basis as Statistical Divisions but as a portion of the latter (See Appendix A). In New

South Wales, Statistical Subdivisions are delineated mainly on other criteria.

Statistical District -

Statistical Districts have been delineated in respect of urban centres with a population of 25,000 or more, using concepts and criteria similar to those for Capital City Divisions. These fixed boundaries delimit areas which for general statistical purposes, are free from the problems imposed by the moving boundaries of urban centres (See Appendix A).

In selected cases, especially in Victoria and South Australia, Statistical Districts were delineated around urban centres with less than 25,000 population, where there was a demand for intercensal population estimates for the area and where existing LGA boundaries were obviously inadequate for this purpose.

Terms and Abbreviations

LGA Code -

As shown in this series of publications, the six digit code indicates Statistical Division (first two digits), Statistical Subdivision or Statistical District (third digit) and Census LGA code (last three digits). Census LGA codes are allocated to legal LGA's except in the City of Brisbane, the Northern Territory and the Australian Capital Territory; where other areas (such as the administrative divisions of the Australian Capital Territory) have been treated as LGA's for Census purposes. The Census LGA codes have been allocated in alphabetical order within each State or Territory. The combination of codes shown in this series of publications thus provides a cross-reference between the various tables and maps, as well as identifying those parts of legal LGA's split by Statistical Division, Statistical Subdivision or Statistical District boundaries (See Appendix A).

n.a. -

Not available. In some cases it has not been possible to estimate comparable 1971 Census data.

- B - Borough
- C - City
- DC - District Council
- M - Municipality
- S - Shire
- T - Town

Minus sign (-) denotes decrease.

APPENDIX A

MAJOR CHANGES TO STATISTICAL DIVISIONS AND LOCAL GOVERNMENT AREAS, 1971-1976, NORTHERN TERRITORY

Two local government areas exist in the Northern Territory. These are the City of Darwin, which was created in 1957, and the Municipality of Alice Springs, which was created on 25 June 1971, but was too late for separate identification at the 1971 Census. The municipal boundary of Darwin was extended to include Winnellie and Sanderson on 19 December 1974.

For statistical purposes the Northern Territory has been divided into two divisions:

- 01 Darwin Statistical Division
- 02 Balance of Territory Statistical Division.

The Balance of Territory Statistical Division is comprised of the following nine statistical Sub-divisions:

South Alligator
 Arnhem Land
 Daly River
 Victoria River
 Elsey
 McArthur River
 Barkly
 Murchison
 Stuart-McDonnell

Some of these sub-divisions and the Darwin Statistical Division have been further divided, resulting in 41 statistical areas which for Census purposes are treated as LGA's (See Table 1).

For 1971 Census purposes two areas were treated as LGA's : Proposed Greater Darwin and Balance of Territory.

The 1971 Proposed Greater Darwin (37,060 persons) is comparable with 1976 City of Darwin plus Balance 1945 Area. (42,818 persons) (See Table 2).

The 1976 Greater Darwin Area (43,344 persons) includes in addition to the 1971 Greater Darwin Area, the 1973 Acquisition Area (526 persons).

AUSTRALIAN BUREAU OF STATISTICS

CENSUS OF POPULATION AND HOUSING AUSTRALIA

30 JUNE 1976 HOUSEHOLDER'S SCHEDULE

The Census is taken under the authority of the *Census and Statistics Act 1905-1973*.
Under this Act:

- (a) it is *compulsory* to provide all the information requested (except religion),
- (b) all the information you provide in this Schedule *will be kept secret and seen only by sworn employees of the Australian Bureau of Statistics*. It will be used only to produce statistics.

HOW TO FILL IN THIS FORM:

- Read the instructions on this page and at the top of page 1.
- Give details of *all* persons on pages 1-7 who spent the night of **WEDNESDAY 30 JUNE 1976** in this household.
- Complete particulars of this dwelling on page 7.
- Please use ink or ball point pen.
- Read each question and any instructions carefully; give your answer and then follow the directions to the next question which applies. Most questions can be answered simply by placing a tick in an appropriate box.

e.g. Yes ☐ OR Yes ☒
or
No ☒ OR No ☐

- If you do not know the exact answer to a question give the best estimate you can.
- After filling in the Schedule, sign it on the front page.
- The completed Schedule should be ready to hand to the Collector who will call on **THURSDAY 1 JULY 1976** or as soon as possible after that day.
- If you have any difficulties in completing the Schedule ask your Collector to help or telephone Darwin 819333 for assistance.

ALL PERSONS PRESENT ON CENSUS NIGHT:

Notes on Visitors and Boarders. If any person in the household such as a visitor prefers to fill in a separate form to maintain privacy, ask the Collector for a "Personal Slip". This should be filled in by that person, sealed in the envelope and handed by you, unopened, to the Collector. For each person who uses a Personal Slip, write only the name, sex and relationship of the person and write "P.S." in the age question on this Schedule.

List in the top row all persons (including visitors) who spent the night of WEDNESDAY 30 JUNE 1976 in this household or returned on THURSDAY 1 JULY 1976 without having been counted elsewhere. USE ONE COLUMN FOR EACH PERSON. If there are more than 8 persons in this household, obtain Personal Slips from the Collector.

What is a Household? Persons living and eating together as a domestic unit are a household. A person living alone is also a household. If there is more than one household, obtain extra Schedules from the Collector and FILL IN A SEPARATE SCHEDULE FOR EACH HOUSEHOLD.
