AUSTRALIAN BUREAU
OF STATISTICS

AUSTRALIA

Australia which includes the island continent and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 7,678,700 square kilometres, almost as large as the United States of America excluding Alaska.

Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes $113^{\circ} 9' \text{ E.}$ and $153^{\circ} 39' \text{ E.}$, while its northern and southern limits are the parallels of latitude $10^{\circ} 41' \text{ S.}$ and $43^{\circ} 39' \text{ S.}$

On its north are the Timor and Arafura Seas and Torres Strait, on its south the Sputhern Ocean. The extreme points are Steep Point on the west, Cape Byron on the east, Cape York on the north, and South East Cape on the south.

The difference in latitude between its extreme north and south points is about 3,700 kilometres and in longitude between its extreme east and west points about 4,000 kilometres.

See page 1, for years of formation of the Colonies and the areas of the States and Territories, standard times, etc., and page 217 for major historical events.

AREA, COASTLINE, AND STANDARD TIMES

NOTE. The areas of the States and Territories and the length of the coastline were recently determined, by the Division of National Mapping by manually digitising these features from the 1:250,000 map series of Australia. This means that only features of measurable size at this scale were considered. About 60,000 points were digitised at an approximate spacing of 0.5 km. These points were joined by chords as the basis for calculation of areas and coastline lengths by computer.

The approximate high water mark coastline was digitised and included all bays, ports and estuaries which are open to the sea. In these cases, the shoreline was assumed to be where the seaward boundary of the title of ownership would be. Rivers were considered along similar lines but the decisions were rather more subjective, the digitised line being across the river where it appeared to take its true form. In mangroves, the shoreline was assumed to be on the landward side.

(a) Greenwich Mean Time is one hour ahead of British Mean Time. For standard times in other countries see page 3. (b) Because of 'daylight saving' an hour should be added from late October to early March. (c) Transferred to Commonwealth in 1911.

The six States with their included Territories were federated under the name 'Commonwealth of Australia' on 1 January 1901.

The coastline of Australia is approximately 36,800 kilometres long—New South Wales, 1,900 kilometres; Victoria, 1,800 kilometres; Queensland, 7,400 kilometres; South Australia, 3,700 kilometres; Western Australia, 12,500 kilometres; Northern Territory, 6,200 kilometres; Australian Capital Territory, Jervis Bay area included in New South Wales; Tasmania, 3,200 kilometres. These measurements are broadly on a 'direct' basis, but even so they must be regarded as approximate only.

AREAS OF TROPICAL AND TEMPERATE REGIONS: STATES AND TERRITORIES

(Square kilometres)

Of the total area of Australia, nearly 39 per cent lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows:

Area	N.S.W.(a)	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	Total
Within tropical zone	..	..	932,700	..	934,400	..	1,090,400	2,957,500

(a) Includes Australian Capital Territory (2,400 square kilometres)

Fifty-four per cent of Queensland lies within the tropical zone and 46 per cent in the temperate zone; 37 per cent of Western Australia is tropical and 63 per cent temperate; while 81 per cent of the Northern Territory is tropical and 19 per cent temperate. All the remaining States lie within the temperate zone.

AUSTRALIAN PARLIAMENTS

The Legislature of the Commonwealth and of each State except Queensland is bicameral, consisting of an Upper and a Lower House. In Queensland the Upper House was abolished in 1922. In the Commonwealth Parliament the Upper House is known as the Senate and the Lower as the House of Representatives; in the bicameral States the Upper House is known as the Legislative Council and the Lower House, in New South Wales, Victoria, and Western Australia, as the Legislative Assembly (which is also the name of the Queensland Parliament) and, in South Australia and Tasmania, as the House of Assembly.

The members of the Legislative Assembly or House of Assembly, as the case may be, of each State are elected by the people, the franchise extending to British subjects who are at least 18 years of age. With the exception of the New South Wales Legislative Council, the members of State Legislative Councils are, in common with members of the Lower Houses, elected by the people of the respective States. In New South Wales a quarter of the members of the Legislative Council retire each three years, and the continuing members of the Council and the members of the Legislative Assembly, voting as an electoral body, elect members to fill the vacant positions. In the Commonwealth Parliament the qualifications for the franchise are identical for both Houses, extending to British subjects who have lived in Australia for six months continuously and who are at least 18 years of age.

PRIVATE RAILWAYS

Private railways are operated over a range of gauges and are to be found in each State. In recent years there has been considerable growth in the operations of private railways, from an estimated 483 route-kilometres in 1965 to approximately 1,741 by 1972. The construction of 937 kilometres of heavy duty railway for north-west Western Australia iron ore projects accounts for much of the increase.

Two private railway projects are currently under construction. These are a railway for Cliffs Western Australian Mining Company Proprietary Limited in north-west Western Australia and a railway at Weipa in Queensland for the Comalco Company. The former, which will be used for the carriage of iron ore, will link Mount Enid with Port Lambert (approximately 167 kilometres). The latter will link Andoom with Weipa (approximately 21 kilometres) and will be used for the carriage of bauxite.

NOTE. 'Classified roads' refer to roads proclaimed or declared by Act for which the central road authority concerned assumed responsibility for part or the whole of the cost of construction and/or maintenance. Included under this heading are State highways, trunk roads and ordinary main roads, comprising about 74 per cent of the total classified mileage for Australia, and secondary, developmental, tourist, etc., roads, comprising about 26 per cent. These classifications do not apply to the two Australian territories.

'Total roads' are estimates of all roads and tracks normally open for general traffic, about 48 per cent of which are constructed, the remainder being formed or natural surface only. The sources for this information are, in the main, local government authorities.

(a) The estimates are from the quarterly population survey which is based on a two-thirds of one per cent sample of all dwellings in Australia in February, May, August and November each year. The estimates relate to all persons aged fifteen years and over, except members of the permanent armed forces, national servicemen enlisted in the Regular Army Supplement and certain diplomatic personnel customarily excluded from census and estimated populations. (b) The labour force in each group as a percentage of the civilian population aged 15 years and over in the same group (labour force participation rate). (c) Never married, widowed and divorced.

NOTE. Discontinuity of the series between 1970 and 1971 has been caused by the exclusion from the labour force of trainee teachers, some of whom were classified as in the labour force for earlier periods. Discontinuity between 1972 and 1973 has been caused by a change in the basis of industry coding. For further details, see the latest issue of *The Labour Force* (Reference No. 6.20).

(c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) At the 1971 population census all trainee teachers were for the first time classified as not in the labour force. Previously those enrolled at government teachers colleges (and in some cases at other institutions also) had been included. Trainees affected by the reclassification have now been excluded, together with their allowances, from the calculation of average weekly earnings from September quarter 1971. The effect of their exclusion has been to increase average weekly earnings figures in all States by approximately 30 cents.

(a) Includes pensions to dependants. Miscellaneous war and service pensions are *not* included in the pensions granted column prior to 1967-68 but are included in the remaining columns.

War pensions and allowances are paid to ex-servicemen and their dependants as compensation for incapacity or death accepted as due to war service. They fall into three main categories, depending on the severity of the war caused disability, as follows: special rate, intermediate rate and general rate. War pensions are not subject to a means test or to income tax.

Service pensions are payable to ex-members of the Forces:

- (i) on reaching the age of 60 years for men and 55 years for women;
- (ii) permanently unemployable; or
- (iii) suffering from pulmonary tuberculosis.

With the exception of (iii), male members must have served in a theatre of war and females must have served abroad. Service pensions have operated since 1 January 1936 and are subject to a means test if the pensioner is under the age of 75.

INCOME TAX: AUSTRALIA

I. INDIVIDUALS

1973-74 Income year

No change in the general rates of tax was proposed in the Treasurer's Budget Speech of 21 August 1973.

Income tax is levied if the income remaining after allowing deductions exceeds \$1,040. However, it is proposed that pensions paid to aged persons will be subject to tax. An aged person (i.e., a man aged 65 or more or a woman aged 60 or more) whose taxable income, including pension, does not exceed \$1,921 will not be taxed.

The tax on specified incomes derived in the year ended 30 June 1974 is as follows:

(\$)				
<i>With dependants</i>				
<i>Income(a)</i>	<i>Without dependants</i>	<i>Wife</i>	<i>Wife, one child</i>	<i>Wife, two children</i>

MANUFACTURING INDUSTRIES: SUMMARY OF OPERATIONS, AUSTRALIA

NOTE. Commencing with the year ended June 1969, the annual census of manufacturing has been conducted on an integrated basis with the annual mining census, and the periodic retail and wholesale trade censuses. This has resulted in major changes in the census units, the scope of the census and the items of data. Consequently, figures for 1968-69 and subsequent years are not directly comparable with those for previous years. For full details see the publication *Manufacturing Establishments and Electricity and Gas Establishments—Summary of Operations, Australia* (Reference No. 12.23).
