MAIN FEATURES

Registrations of new motor vehicles (excluding motor cycles, tractors, plant and equipment etc.) during April 1984 (46,276) fell 19.1% when compared with March 1984 (57,167) but rose 9.6% when compared with April 1983 (42,216).

Seasonally adjusted, the April 1984 figure (51,135) is 6.8% lower than March 1984 (54,396) but is 11.9% higher than April 1983 (45,703).

EXPLANATORY NOTES

Introduction

Because of lags in registry processing, statistics of new motor vehicle registrations for periods as short as one month can vary significantly from actual sales of new motor vehicles for the same period. See also paragraph 3 below.

Scope and coverage

2. Motor vehicle registration statistics are obtained from data made available by the various State and Territory motor vehicle registration authorities and reflect the information as recorded in registration documents, e.g. from August 1983 in N.S.W. the body type classification applied by the registration authority for small bus type vehicles has changed from panel vans to buses.

3. In these statistics registrations mean registrations processed by the motor vehicle registration authorities in the States and Territories during the period. In New South Wales, South Australia, Tasmania and the Australian Capital Territory the figures shown depart little from actual registrations during the period. In the other States and the Northern Territory, advice of some registrations is often not received by the central motor vehicle registration authority until some time after the actual date of registration. For this reason a considerable number of registrations processed in a month actually relate to vehicles registered prior to that month.

4. The statistics include vehicles with diplomatic and consular plates and State and Commonwealth government owned vehicles other than those belonging to the defence services.

5. Recreation vehicles such as trail bikes and sand dune buggies intended for use in public places are required to be registered in Victoria and Queensland. Particulars of these registrations are regarded as outside the scope of new motor vehicle registration statistics.

Seasonal adjustment

6. Original and seasonally adjusted registrations of new motor vehicles are shown in Table I. The two component series 'Motor cars and station wagons' and 'Other vehicles' are each adjusted separately, and the adjusted figures for total registrations are obtained by adding together the two component series. Details of the methods used in seasonally adjusting the component series are shown in *Seasonally Adjusted Indicators, Australia* (1308.0).
