NEW MOTOR VEHICLE REGISTRATIONS, AUSTRALIA JULY 1980

INQUIRIES

If you want to know more about these statistics ring Mr R. Martyn on Canberra (062) 526247 or our State office or, write to Information Services, ABS, P.O. Box 10, Belconnen, ACT, 2616

For copies of this publication contact Information Services, Canberra (062) 526627 or State offices.

This is the first issue of a monthly publication which is supplementary to the publication 'Registrations of New Motor Vehicles, Australia : Preliminary', (9301.0). It replaces the quarterly publication 'Motor Vehicle Registrations, Australia' (9303.0), the final issue of which will contain information for the June Quarter, 1980.

EXPLANATORY NOTES

Introduction

This publication contains detailed information regarding registrations of new motor vehicles and includes particulars of motor cars and station wagons classified by make, utilities and panel vans by make and tare, and rigid and articulated trucks by make and gross vehicle mass/gross combination mass.

Scope and Coverage

2. Motor vehicle registration statistics are obtained from data made available by the various State and Territory motor vehicle registration authorities and reflect the information as recorded in registration documents.

3. In these statistics registrations mean registrations processed by the motor vehicle registration authorities in the States and Territories during the period. In New South Wales, Tasmania and the Australian Capital Territory the figures shown depart little from actual registrations during the period. In the other States and the Northern Territory, advice of some registrations is often not received by the central motor vehicle registration authority until some time after the actual date of registration. For this reason a considerable number of registrations processed in a month actually relate to vehicles registered prior to that month.

4. The amount of data that can be published, particularly at the Australian level, is restricted to what is included in motor registry files. For example, details of cubic capacity are not recorded in all States and, consequently, classification of vehicles according to engine size is not possible.

5. The statistics include vehicles with diplomatic and consular plates and State and Australian government owned vehicles other than those belonging to the defence services. They also include registrations of new tractors, trailers, caravans and plant and equipment.

6. Recreation vehicles such as trail bikes and sand dune buggies intended for use in public places are required to be registered in Victoria and Queensland. Particulars of these registrations are regarded as outside the scope of new motor vehicle registration statistics.

7. Vehicles such as tractors (particularly the agricultural types), plant and equipment, and motor vehicles used solely on farms, etc., and not used on public roads are not required to be registered and these are also excluded from the statistics.

Seasonal adjustment

8. Original and seasonally adjusted registrations of new motor vehicles are shown in Table 1. The two component series 'Motor cars and station wagons' and 'Other vehicles' are each adjusted separately, and the adjusted figures for total registrations are obtained by adding together the two component series. Details of the methods used in seasonally adjusting the component series are shown in *Seasonally Adjusted Indicators* (1308.0).

Classification by area

9. In all States, capital city registrations refer to vehicles for which the address of the registered owner is located within the capital city statistical division. These statistical divisions are re-defined from time to time usually as the result of information available from periodic population and housing censuses. All registrations in the Australian Capital Territory are included under 'capital cities' while those in the Northern Territory are included under 'Other areas'.
