REGISTRATIONS OF NEW MOTOR VEHICLES: MAKE OF VEHICLE: AUSTRALIA

JANUARY 1972

Reference No. 14.8

The accompanying statement, which contains information on make and horsepower of new motor vehicles registered during January 1972, is supplementary to that issued on 9 March 1972 (Reference No. 14.6). Compared with previous issues modifications outlined in paragraph 2 have been made following

- (a) the recent review of user requirements (see paragraph 3 below); and
- (b) the introduction of a revised motor vehicle classification (see paragraph 5 below).

2. The changes in the content of this statement compared with previous issues are as follows:

- (a) in Table 3 separate details by make and horsepower are shown for the new category "Light commercial type vehicles" (see paragraph 5 below); and
- (b) in Table 5 particulars of motor cycles are now restricted to principal makes only.

3. Previous issues of this publication were followed by a monthly bulletin "Motor Vehicle Registrations" (Reference No. 14.2) which gave more comprehensive detail on make and horsepower and which also contained a limited amount of information regarding the number of motor vehicles on register. Following the recent review of user requirements it has been decided that the latter bulletin should be produced quarterly. However, particulars of motor cycles will continue to be shown in the same detail as was previously given. The next issue will be for the quarter ended 31 March 1972.

4. The statistics in this preliminary statement are derived from information as recorded on registration documents. The figures include diplomatic and consular vehicles and all Commonwealth-owned new vehicles other than those belonging to the defence services. Although the position varies from State to State, in these statistics, "registrations" mean registrations processed by the motor vehicle registration authorities in the States and Territories during the period. In some States, registrations of new motor vehicles are occasionally not recorded in the statistics until some time after registration.

5. This statement incorporates the revised classification of motor vehicles which the Bureau has adopted for publication of statistics of new motor vehicle registrations from 1 January 1972. Under the new classification vehicles are grouped into the following categories:

- Motor cars
- Station wagons
- Light commercial type vehicles - open
 - closed
- Trucks (carrying capacity 20 cwt and over) - rigid
 - articulated
- Other truck type vehicles
- Buses
- Motor cycles

The principal differences between this classification and that which it replaces are the following:

- (a) "Light commercial type vehicles" include those utilities, panel vans and trucks with carrying capacity under 20 cwt, and ambulances and hearses
- (b) Utilities and panel vans with carrying capacity 20 cwt and over are now incorporated in "rigid trucks"
- (c) "Other truck type vehicles" consist of those truck type vehicles which are designed for purposes other than freight carrying, e.g. street flusher, fire engine, tow truck. Previously this category incorporated vehicles such as tankers and concrete agitators which are now classified as "trucks".

6. Because of the absence of details of carrying capacity on the registration records in certain States, it has been necessary to impute carrying capacity by reference to R.A.C. horsepower rating in order to ensure consistent treatment across Australia in these statistics. This affects some vehicles close to the 20 cwt carrying capacity limit separating trucks from light commercial type vehicles.

7. In all States, "capital city" registrations refer to vehicles whose owners' addresses are located within the capital city statistical division as defined for 1966 population census purposes.
