OVERSEAS TRADE : AUSTRALIA, FEBRUARY 1968

EXPORTS AND IMPORTS (PRELIMINARY)

This preliminary statement of Overseas Trade is approximate and will be followed by Monthly Statements of Exports and Imports by Commodity Divisions and the Monthly Bulletin of Overseas Trade Statistics containing details of merchandise and non-merchandise trade.

Original and seasonally adjusted statistics of exports and imports are shown in the table on page 2. In the seasonal adjustment, account has been taken not only of normal seasonal factors but additionally of "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc in the month) and the influence of Easter which may, in successive years, affect figures for different months. Details of the methods used in seasonally adjusting these and other series are given in "Seasonally Adjusted Indicators 1967" issued on 18 July 1967.

Exports and imports are recorded statistically in the month in which the entries are passed by the Department of Customs and Excise. Normally this is within a few days of discharge of shipment of cargoes.

The statistics shown overleaf refer to the total value of exports and imports recorded during the period specified. The excess of the value of exports or imports shown does not represent the balance of trade.

The balance of trade, which represents the excess of exports or imports on a "balance-of-payments" basis, is derived from overseas trade statistics by means of certain adjustments relating both to valuation and scope. A valuation adjustment is made to imports for the overall excess of recorded "value-for-duty" over the actual selling price to the importer. Adjustments to the scope of the statistics include deductions for exports and imports of goods for repair and return (including the value of repairs). Exports and imports of ships and aircraft for use on overseas routes, certain imports of defence equipment and other items of trade for which customs entries are not required, are added. Adjustments may also be made in the case of certain large items of equipment, such as warships or aircraft, for timing differences between the change of ownership and the lodgement of import entries.

The balance of trade is only one element in the balance of payments. Balance of payments statements also take into account other external transactions including freight and insurance charges on imports, expenditure by overseas ships in Australian ports, overseas travel, and payments of profits and interest, and government and private transfers as well as private and government borrowing overseas. These estimates are published in the bulletin: "Balance of Payments".
