### MAIN FEATURES

The All groups index increased by 1.3% between October and November 1985. The main price increases were for wheat, beef, iron ore, coal and raw sugar. The main price decrease was for wool.

The All groups index increased by 12.8% between November 1984 and November 1985.

### EXPLANATORY NOTES

#### Introduction

This publication contains the Export Price Index on reference base 1974-75 = 100. The July 1979 issue of this publication contains a more detailed description of the index. A detailed description of previous Export Price Indexes is contained in *Year Book Australia No. 55, 1969*, pages 256-7 and in *Year Book Australia No. 58, 1972*, pages 240-2.

#### Scope of the index

2. The Export Price Index measures changes in prices of all exports of merchandise from Australia. It includes re-exports of merchandise (that is, goods which are imported into Australia and exported at a later date without physical transformation). The index numbers for each month relate to prices of those exports of merchandise that are physically shipped from Australia during that month.

#### Items and weights

3. The index is a fixed weights index. The index items, i.e. the commodities directly represented in the index, were selected on the basis of their export values in the period 1974-75 to 1976-77. They constituted 89 per cent of the total value of exports of merchandise from Australia in the same period. The selected items were allocated weights in accordance with the average value of exports for each item over the period 1974-75 to 1976-77. Many of the items carry not only their own weight but also the weight of unpriced commodities whose prices are considered to move in a similar manner. Full details of

the weighting pattern of the Export Price Index, i.e. the percentage contributions for index items and groups, were contained in the July 1979 issue of this publication, and are also available from the ABS on request.

#### Classification

4. The selected items have been combined into broad index groups in two ways. Tables 1 and 2 contain index numbers for groups based on the Sections (1 digit) and selected Divisions (2 digit) of the *Australian Export Commodity Classification (AECC) 1978-79* (1203.0). Tables 1 and 3 contain index numbers on an industry of origin basis for groups based on the Divisions (1 digit) and selected Subdivisions (2 digit) of the 1978 edition of the *Australian Standard Industrial Classification (ASIC)* (1201.0). These groups have been formed by allocating each of the index items to its industry of origin (e.g. Agriculture, forestry and fishing; Mining; and Manufacturing).

5. The industry of origin is the industry in which the exported commodity is primarily produced, determined in accordance with the classification rules of the ASIC. It is therefore not necessarily identical with the industry from which the export transactions are actually made. For instance, many exports are made by traders or by marketing authorities, but these exports are classified to the appropriate producing industries, rather than to the wholesale trading industries from which they are actually exported.

#### Prices

6. In general, prices are obtained from major exporters of the selected items included in the index. The point of pricing for the Export Price Index is the point at which the goods physically leave Australia, i.e. prices are on the basis f.o.b. at main Australian ports of export.

7. As the prices used in the index are expressed in Australian currency, changes in the relative values of the Australian dollar and overseas currencies can have a direct impact on price movements for the many commodities that are sold in currencies other than Australian dollars. Where exports are sold at prices expressed in terms of a foreign currency and forward exchange cover is used, the prices used in the index EXCLUDE forward exchange cover.

8. The price series used relate to specified standards, grades, types, etc. of each commodity with the aim of incorporating in the index price changes for exports of representative goods of constant quality. Wherever possible, prices to predominant export markets are used for each of the specified goods priced, in order to lessen the impact of price variations attributable solely to changes, over time, in market destinations. In most cases prices are combined using fixed weights between markets. Weights between markets are reviewed from time to time and revised where necessary.

9. The July 1979 issue of this publication contained explanations of:

Pricing of wool exports

Pricing goods shipped at unknown prices

Treatment of seasonal exports.

#### Index numbers

10. Index numbers for financial years are simple averages of monthly index numbers.

11. Index numbers for the current month and the previous month are preliminary and subject to revision. However, from time to time, index numbers for earlier months may be revised. This will occur whenever the ABS discovers that prices previously reported by respondents are incorrect and corrected prices are obtained. It can also occur for those exports where some data used in compiling the index numbers has been estimated (e.g. export market combining weights). When final data becomes available, index numbers are revised as far back as necessary.

#### Percentage changes

12. Table 1 shows percentage changes for the 'All groups' index and for AECC Sections and ASIC Divisions. The following example illustrates the method of calculating percentage changes:

##### All groups

|                        |                   |
|------------------------|-------------------|
| July 1985              | 241 (see Table 1) |
| less June 1985         | 246 (see Table 1) |
| Change in index points | -5                |

$$\text{Percentage change} = \frac{-5}{246} \times 100 = -2.0\%$$

#### Related publications

13. Users may also wish to refer to the following publications which are available on request:

*Import Price Index, Australia (6414.0)—issued quarterly*

*Price Indexes of Articles Produced by Manufacturing Industry, Australia (6412.0)—issued monthly*

*Price Index of Materials Used in Manufacturing Industry, Australia (6411.0)—issued monthly*

*Exports and Imports (Balance of Payments Basis) at Constant Prices, Australia (5332.0)—issued quarterly*

*Exports by Commodity Divisions, Australia (5402.0)—issued monthly*

14. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The *Catalogue* and *Publications Advice* are available from any ABS office.

#### Symbols and other usages

- p preliminary, series subject to revision
- r figures revised since previous issue
- nil or rounded to zero
