PREFACE

This Bulletin is published in two parts;
Part 1 : Exports and Part 2 : Imports.

Figures for 1966-67 are preliminary and are
subject to revision.

EXPLANATORY NOTESBASIC DOCUMENTS

The Overseas Trade Statistics published herein have been derived from documents obtained under the Customs Act by the Department of Customs and Excise and compiled by the Commonwealth Bureau of Census and Statistics. They do not include certain items for which customs entries are not required. (See paragraph (11) of this note). These documents are duplicate copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise.

2. Export entries show date and port of shipment, country of consignment and the description, quantity (where required) and value of the goods. The statistical item number is inserted by the exporter or his agent and verified by officers of the Department of Customs and Excise.

3. Import entries show date and port of entry, country of origin, description of goods, quantity (where required), value of the goods and amount of duty paid thereon. The tariff item number under which the goods are admitted and the statistical key code are inserted by the importer or his agent, and these are verified by statistical officers of the Department of Customs and Excise in the local offices of the Collectors of Customs.

PERIOD COVERED BY STATISTICSExports

4. These are recorded statistically in the month in which the export entries are passed by the Department of Customs and Excise. Normally this is within a few days of shipment. Shipment of some major items is at times delayed by abnormal factors affecting sales, deliveries for export and the loading of ships. When such delays occur, exports during the affected period are diminished and when the delays are overtaken shipments include substantial quantities of accumulated stocks as well as current disposals.

5. Wool shipments in any trade year may be materially affected by the time spread of wool auctions which normally end in July. The carry-over for shipments varies from year to year. New season's wheat normally becomes available for shipment from December onwards, and the quantity shipped in any trade year (ending June) depends on the size of the crop, the time spread of sales for export, and physical factors affecting the scheduling of deliveries.

Imports

6. Imports are recorded statistically in the month in which import entries are passed by the Department of Customs and Excise. Normally this is within a few days of discharge of cargoes.

VALUATION

7. Exports sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent of the actual price paid to the exporter. Exports shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale.

8. The recorded value of imports is the "value for duty" as laid down for customs purposes, i.e. the f.o.b. port of shipment equivalent of the actual price paid by the importer plus any special deduction, or of the current domestic value in the exporting country, whichever is the higher. (See paragraph (11) of this note). All values are recorded in Australian currency.

STATISTICAL CONCEPTS OF TRADETotal Recorded Trade

9. This item is used to denote the total value of exports or imports recorded during the period specified. Exports and imports are recorded on a "General Trade" basis, i.e., export figures include both Australian produce and re-exports, whilst imports comprise goods entered directly for domestic consumption together with goods imported into Customs warehouses. Export figures exclude exports of ships' stores and aircraft stores, which are shown separately on page 31. Import figures include defence equipment imported by the Australian Services. These imports are normally classified according to the commodity imported, e.g., warships are classified under "ships and boats", and are included in the month in which the import entry is lodged with the Department of Customs and Excise.

Merchandise and Non-merchandise Trade

10. Merchandise and non-merchandise trade are defined in accordance with international standards recommended by the United Nations. Merchandise trade is the equivalent of total recorded trade less certain items specified as non-merchandise. These non-merchandise items include commodities such as gold, legal tender, decorations, trophies, samples, passengers' personal effects, military equipment and stores for Australian Forces abroad, goods for the use of diplomatic and consular representatives, goods imported with the intention of being re-exported, goods exported with the intention of being re-imported, etc. A complete description of these commodities is contained in the Australian Export and Import Commodity Classifications published by the Bureau.

Balance of Payments Basis

11. Statistics of exports and imports for Balance of Payments purposes are derived by making certain adjustments, relating both to scope and valuation, to statistics of merchandise exports and imports. Statistics on the adjusted basis are published in statistical bulletins relating to the Balance of Payments. The adjustments include the following: Imports are adjusted for the overall excess of recorded value for duty over the actual selling price to the importer. Exports and imports of goods for repair and return and the value of repairs are deducted from merchandise trade; exports and imports of ships and aircraft for use on overseas routes, certain imports of defence equipment, and other trade items for which customs entries are not required are added. Adjustments are also made for timing differences between the change of ownership and the lodgement of import entries, in the case of certain large items of equipment (e.g. warships).

COUNTRY OF CONSIGNMENT OR ORIGIN

12. "Country of consignment" referred to in exports tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported "For Orders".

13. "Country of origin" referred to in imports tables means the country of production of goods imported.

COMMODITY CLASSIFICATIONS

14. From July 1965 imports have been classified according to the new Australian Import Commodity Classification (A.I.C.C.) which is based on the Standard International Trade Classification, Revised (S.I.T.C.) and from July 1966 exports have been classified according to the new Australian Export Commodity Classification (A.E.C.C.), also based on the S.I.T.C. Copies of these classifications or extracts from them, can be obtained from offices of the Bureau. There is a difference in treatment between the two classifications with respect to Outside Packages. In the A.E.C.C. the value of Outside Packages is classified with the goods contained in them, but in the A.I.C.C. the value of Outside Packages is included under a separate item in Section 9(A).

TREATMENT OF AMENDMENTS

15. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this Bulletin. For this reason, monthly figures published in all issues for the current financial year to date will not necessarily add to the year-to-date figures shown in this issue.

EXCESS OF EXPORTS OR IMPORTS

16. In this Bulletin the excess of the value of exports or imports is shown on the basis of total recorded trade (Table 2) and merchandise trade (Table 1). The excess of exports or imports does not, on either of these bases, represent the balance of trade. The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis. (See paragraph (11)).

BALANCE OF PAYMENTS

17. Estimates of the balance of trade do not measure Australia's total balance of payments which includes other transactions such as freight and insurance charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profits and interest, and private and government borrowing overseas. Estimates of these transactions will be found in Statistical Bulletins on the "Balance of Payments".

PREVIOUS YEAR'S FIGURES

18. The introduction of the new Export Commodity Classification has precluded publication for 1966-67, of previous year's figures in some tables relating to exports.

ROUNDING

19. Where figures have been rounded in this publication any discrepancies between totals and sums of components are due to rounding.

MAJOR GROUPS OF COUNTRIES

20. Bulletins prior to July 1966 included a table (table 4) showing overseas trade according to major groups of countries. This table has been discontinued. Details of imports and exports by major groups of countries are shown in the bulletin "Overseas Trade: Major Groups of Countries" published quarterly.
