

AUSTRALIAN BUREAU OF STATISTICS Canberra

CATALOGUE NO 8364.0

NOON 21 JUNE 1978

PRODUCTION BULLETIN NO. 8 : MISCELLANEOUS PRODUCTS APRIL 1978

INQUIRIES

If you want to know more about these statistics ring Mr Cyril Rees on Canberra 525558 or our State office, or write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616. For copies of this publication contact Information Services, Canberra 526627 or State offices.

EXPLANATORY NOTES

This bulletin is one of a series of eight publications containing monthly and quarterly production statistics. The titles of the other publications of this series are shown in paragraph 7 below. These publications replace the *Production Summaries* series (Ref. No. 12.16) and the publication *Production Statistics* (Ref. No. 12.14) issued previously.

2. Data contained in this bulletin are mostly based on monthly or quarterly collections conducted by the Australian Bureau of Statistics (ABS). Where another authority is the source this is indicated in a footnote.

3. Most items are identified by Commodity Codes of the Commodity Classification used in Australian manufacturing statistics. However in cases where data are derived from sources other than ABS collections no commodity code is shown.

4. As from July 1975 production statistics collected by ABS exclude production of single establishment manufacturing enterprises employing less than four persons and production of establishments predominantly engaged in non-manufacturing activities but which may carry on, in a minor way, some manufacturing. However, except for a few commodities the effect on production levels and movements is marginal. An indication of the approximate magnitude of the break in comparability may be obtained by comparing annual data for 1974-75 which are shown in this publication on both the old and the new basis.

5. Annual figures shown in this publication are derived by aggregating monthly/quarterly production and relate to production during the year ended 30 June. They may differ from annual manufacturing census data which relate to the census year, and in the case of businesses unable to report on a June year basis include details in respect of substitute accounting periods.

6. This bulletin contains seasonally adjusted statistics of several items. In the seasonal adjustment, account has been taken not only of normal seasonal factors but also of "trading-day" effects (arising from

the varying numbers of Sundays, Mondays, Tuesdays etc. in the month) and the influence of Easter and Australia Day which may in successive years, affect figures for different months. Details of the methods used in seasonally adjusting this and other series are given in *Seasonally Adjusted Indicators 1977* (1308.0).

7. Other ABS publications which may be of interest are:

Production Bulletin No. 1 : Electricity Gas and Electrical Goods (8357.0).

Production Bulletin No. 2 : Clothing and Footwear (8358.0).

Production Bulletin No. 3 : Food, Drink and Tobacco (8359.0).

Production Bulletin No. 4 : Textiles, Bedding and Floor Coverings (8360.0).

Production Bulletin No. 5 : Building Materials (8361.0).

Production Bulletin No. 6 : Chemicals and By-products (8362.0).

Production Bulletin No. 7 : Motor Vehicles, Parts and Accessories (8363.0).

Principal Articles Produced (8303.0).

All publications produced by the ABS are listed in *Catalogue of Publications 1977* (1101.0) which is available free of charge from any ABS office.

Symbols and Other Usages

- a Not available for publication. Figures are confidential.
- Not applicable.
- Break in continuity of series (where drawn across a column)
- * Excludes the production of certain small producers. See paragraph 4.

(b) Excludes hollow rods and bars. (c) Circles, slugs, etc. stamped from sheet or strip purchased, transferred in or imported are not included. Where stamped from sheet or strip produced in the same establishment, the weight of metal included in the statistics is that of the circles, etc. and not the weight of the sheet or strip from which they were stamped. (d) Excludes production of liner aluminium sheet used in the manufacture of other products in the same establishment.

(b) Includes natural gas. (c) Primary origin only. Source: Bureau of Mineral Resources. (d) Estimated total electricity generated by public utilities, factories generating for their own use and factories supplying electricity for domestic and other consumption. (e) Includes lead content of lead alloys from primary sources but excludes lead-silver bullion. (f) See paragraph 6 Explanatory Notes. (g) Produced by Australian refineries from imported and indigenous petroleum. Source: Department of National Resources. (h) Includes the input of crude, enriched crude and other petroleum based feedstock.
