EXPLANATORY NOTES

(i) Introduction. The tables in this bulletin show statistics of receipts, deliveries and stocks of certain types of imported and Australian-made new agricultural machinery. After consultation with the trade it was decided to widen the scope of this bulletin by the inclusion of certain new items commencing with quarter ending 30 September 1967. In some instances, where items have been redefined or introduced for the first time, statistics for periods prior to September quarter 1967 are not available.

(ii) Source of the statistics. These statistics have been derived from returns collected from "principals" marketing new agricultural machinery. These "principals" are those businesses in Australia which, with respect to the items of new agricultural machinery specified in the returns, (a) market under their own name or trade name(s) or, (b) import into Australia and market under the name or trade name(s) of businesses overseas. "Principals" complete separate returns for each State or arrange for their completion by State distributors.

(iii) Receipts represent implements and machines received by the principals or by their distributors direct from Australian manufacturers or from overseas. The figures, which exclude exports, relate only to machinery and implements for marketing within Australia. A minus figure indicates that exports exceeded Australian made and imported receipts.

(iv) Deliveries represent implements and machines sent to agents or dealers by the principals, or by the State distributors. Transfers of machinery or implements from principals to their State distributors are not recorded as deliveries. In addition the transfer of machinery or implements by distributors direct to dealers or agents in other States is not regarded as a delivery until a sale to the end-user is made. Direct sales to end-users by principals or distributors are similarly regarded as deliveries.

(v) Stocks represent implements and machines held by the principals and their State distributors at the end of the period indicated. Stocks held by agents and dealers are excluded. Stocks in transit within Australia are included in the stocks of the State for which they are intended.

(vi) Comments on specific items

(a) Components which have not yet been assembled into complete machines are excluded from these statistics.

(b) Horse-drawn equipment and other equipment not requiring power units are excluded.

(c) "Tractor-mounting type" includes semi-mounting type.

(d) Disc ploughs - Includes disc cultivating ploughs and disc tillers (one-way discers).

(e) Chisel ploughs - Includes implements of the type which usually have narrow pointed tines spaced well apart (12" or more) and which can usually penetrate to a depth of 8" or more.

(f) Tine harrows - Includes driven tine, diamond and stump jump harrows. Excludes drill and following harrows.

(g) Other harrows (other than tine or disc) - Includes full chain harrows (excluded prior to June quarter 1967) and combinations of tines, chains, etc. Excludes drill and following harrows.

(h) Tine cultivators and scarifiers - Includes implements of the type which have wide pointed tines spaced closely together (6" to 8") to give complete coverage of the ground and, which are usually designed to work to depths of 3" to 5". Tractor-mounting type includes mid-mounted (row crop).

(i) Rotary cultivators - Includes self-contained power units (3 brake horse-power and over) and tractor-mounting and trailing types.

(j) Drills and cultivating drills - Includes sod seeders and combines, but excludes row crop planters. Prior to September quarter 1967, sod seeders were excluded.

(k) Fertiliser spreaders - Includes tractor-mounting and trailing types but excludes truck-mounted spreaders. Prior to September quarter 1967 truck-mounted spreaders were included.

(l) Headers (combine harvesters) Drawn - Includes both engine-functioned and power take-off types.

(m) Agricultural mowers (rotary) - Excludes cylinder reel types.

(n) Windrowers (with or without hay conditioners and crimpers) - Excludes drawn windrowers.

(o) Pick-up bale loaders for baled hay - Excludes combination stacker-loaders.

(p) Bale elevators and stackers - Includes combination stacker-loaders.

(q) Hammer mills (farm type) - Includes roughage mills, but excludes grinder mixers.

RELATED PUBLICATIONS

Additional statistics on agricultural machinery available from this Bureau are as follows :

- (i) Principal types of farm machinery on rural holdings (annually)
- (ii) Production and assembly within Australia of various types of agricultural machinery (annually)
- (iii) Import, and exports, classified according to type and country of origin and destination (annually)

Statistics of receipts, sales and stocks of new tractors are issued quarterly in a separate bulletin.

SYMBOLS USED IN THIS BULLETIN

- n.a. - Not available
- .. - Nil, or not applicable
- r - Figure or series revised since previous issue
- - Break in continuity of series (where drawn across a column between two consecutive figures)
- * - Not collected prior to September quarter 1967.

(b) Tine harrows vary in sizes depending on the number of leaves or sections. For example a harrow of 9ft width may comprise a set of three leaves, each of three feet width. However, because of considerable variation in the size of sets, the number of leaves has been measured rather than individual sets. See also Explanatory Note (vi) (f), page 4.
