CENSUS OF RETAIL ESTABLISHMENTS : QUEENSLAND

YEAR ENDED 30TH JUNE, 1953.

1. Introduction

The statistics contained in this Bulletin were compiled from the third Census of Retail Establishments undertaken in Australia and relate to retail trading during the year ended 30th June, 1953. The first two Retail Censuses were taken in respect of the years ended 30th June, 1948 and 1949. In the intercensal period between 1948-49 and 1952-53, and subsequently, quarterly estimates of the value of retail sales were calculated by means of sample surveys.

Some Bulletins have already been issued in connection with the 1952-53 Retail Census. A list of these is shown inside the back cover of this Bulletin.

2. Scope of Census:

In general terms, the Census covers establishments which normally sell goods by retail to the general public from fixed premises (i.e. shops, rooms, kiosks and yards). The Censuses have been designed principally to cover sales to the final consumer of goods generally used for household and personal use. For this reason, sales of farm and industrial machinery and equipment, earth-moving equipment, etc. have been excluded. In the first two Censuses sales of building materials (except timber) were included, but in this Census all building materials have been excluded. All retail sales of motor vehicles, parts, etc. are included whether for industrial, commercial, farm or private use. Business machines such as typewriters are also included when sold from a retail establishment.

Wholesalers and manufacturers are included if they sell regularly by retail, but not if they make retail sales only occasionally. Itinerant vendors and casual stalls or booths are excluded as are such organisations as clubs and societies making sales to their own members. Both new and second hand goods are included in sales recorded by relevant retail establishments.

As well as retailers, four types of 'service' establishments are included in the Census whether they have retail sales or not, namely, boot repairers, repair only garages, cafes and restaurants, and hairdressers. Details of takings recorded by these establishments are shown in Table 4.

Establishments with retail sales of less than £500 in 1952-53 are not included in the figures shown for 1952-53, except that in Table 4, in respect of takings from Certain Services, establishments are included if their takings from the services specified are £500 or more.

Because of the above mentioned restrictions to the scope of the Census, the aggregates shown in this Bulletin for some commodity groups may be less than the total value of goods sold to consumers by all establishments regardless of definition. In particular, this applies to tobacco, and beer, wine and spirits which are also sold by establishments not included in the Census. However, some additional details of sales of these items were obtained from a supplementary collection of licensed clubs, etc. and are shown in Table 19.

In addition to ordinary retail shops, as generally understood, the Census includes the following -

Hotels, wine saloons, and refreshment rooms.
Bakers, whether selling from retail premises or from a vehicle.
Produce Merchants.
Tailors.
Garages and service stations, motor vehicle distributors.
Gas and Electricity suppliers, in respect only of their retail sales of appliances.
Fuel and Ice Merchants, with retail premises but not those selling only from a vehicle.

The following types of activities are excluded -

Opticians and optometrists.
Clubs, guest houses, theatres and cinemas.
Agents (except in respect of goods sold on own behalf).
Dry Cleaners and Laundries.

Direct selling (either on site or from delivery vehicles) from market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, except where a shop or regular roadside stall is conducted.

Hawkers, street barrows, casual stalls and street sellers.

Timber yards and Joinery works.

Brick works.

Roofing tile works.

Trade services such as monumental masonry, carpentry, electrical contracting, plumbing, upholstery, etc.

Real estate agents, stock and station agents.

Newspaper publishers and printers (except in respect of goods sold by retail from a shop).

Photographers and picture framers.

Dressmakers.

Caterers for special occasions (races, sports meetings, etc.).

Chiropodists.

Herbalists.

Lending libraries.

3. Lists of Establishments and Collection of Returns:

The work of listing of retail establishments to be included in the 1952-53 Retail Census was carried out by postal officers throughout Australia. The lists were checked against the 1948-49 Retail Census lists and where necessary, against other available sources of information, such as trade directories, lists of liquor licenses, etc. and minor deficiencies were rectified.

Census forms were distributed and collected by post and, where necessary for elucidation of facts, additional enquiries were addressed to retailers.

4. Census and Statistics Act, 1905-49:

The Census was conducted under the authority of the Census and Statistics Act, 1905-49, under the terms of which all returns supplied by traders must be treated as strictly confidential and disclosure of information shown on individual returns is prohibited. Consequently, in the tables set out in this Bulletin some aggregates which refer to a small number of establishments have either been grouped with others or withheld from publication in order to avoid risk of disclosure of confidential information.

5. The Census Form:

A copy of the general Census form is attached as an appendix hereto. Special forms were sent to retailers who supply quarterly returns so that the same information was obtained for the years 1952-53 as is shown on the general form.

Clear distinction was drawn between -

- (1) Retail Sales of goods;
- and (2) "Other Takings", including payment for services often associated with retailing. These are hairdressing, repairs, meals, accommodation, laundry and dry cleaning, etc.

The form provided a separate heading for "Wholesale Sales of Goods" in order to avoid their being incorrectly included under any other heading.

Two of the commodity groups shown in the retail section of the form, namely Basic Building Materials (Item 14) and Farm Machinery and Implements (Item 21) were listed separately to ensure that details of these sales were not included under any of the other retail groupings. Sales of these commodities are not included in the aggregates shown in this Bulletin.

Two general qualifications are needed to explain the figures of sales recorded:-

- (1) Where actual figures were not available traders were asked to supply careful estimates of total retail sales and of sales by commodity groups.
- (2) As it was impossible to define or list in detail the types of goods to be included under each commodity group, traders were asked to show figures for each group in accordance with ordinary trade groupings as understood by them. The commodity group totals are therefore subject to this qualification. In particular, despite numerous queries made when returns were being examined,

it is possible that traders did not always show separately sales of Tobacco, Cigars and Cigarettes in the item provided on the form.

6. Coverage:

Returns were received from slightly more than 97% of the establishments to which forms were sent. The remainder consisted of small businesses for which estimated figures are included in the Census tables.

Establishments which operated for only part of the year are included in the figures shown in this Bulletin. Where changes of ownership rendered it impossible to obtain a return for the full year's operations of an establishment, estimates for the complete year were made.

7. Explanation of Terms used in the Tables:

Commodity Group - the thirty-two broad groups (reduced for tabulation purposes to thirty, see Section 5 above) into which traders were asked to dissect their total retail sales of goods.

Other Types of Food - includes retail sales of fish, poultry, cooked meat, wrapped lunches, etc. but excludes takings from meals sold in cafes, restaurants, etc. for which a separate dissection was obtained under "Other Takings".

Other Goods - comprises goods which are not covered by the thirty-one specified groups and includes bicycles, flowers, plants, garden supplies, toys, sewing machines, baby carriages, medical and surgical supplies, photographic equipment, etc..

Main Type of Business - is a classification of each establishment according to the predominant type of goods sold or service rendered. The classification was based mainly on the dissection of commodity sales recorded on the Census form but, in some cases, namely, Other Food and Other Goods, the description given by the proprietor was used as a guide. For the purpose of determining the predominant type of goods sold some combinations of commodity items were considered as "main lines" - namely, Foodstuffs (Items 1 to 6), Clothing, and Drapery (Items 9 to 11), Footwear (Items 12 and 13), Builders' and Domestic Hardware (Items 15 and 16), Furniture and Floor Coverings (Items 18 and 19), and Motor Vehicles, Parts, etc. (Items 22 to 26). Each of the remaining retail sales items (excepting Items 14 and 21, which were deleted) was regarded as a "main line" separately, as were the "Other Takings" items, Hairdressing (Item 34), Repair Work (Item 35), and Meals in Cafes, Restaurants, etc. (Item 36). Accordingly, establishments were classified to type of business on the basis of the predominant "main line" of goods sold or service rendered and where the "main line" consisted of one of the combinations of items mentioned above, the classification was made to the major item within the "main line".

In addition to type of business classification outlined above, some establishments were further classified into two general categories. These were Department Store and General Store types, details of which are set out in Table 17 of this Bulletin. Establishments were classified to these categories on the following basis:-

- (a) Department Store - an establishment with 50 persons or more working mainly on retail activities, with goods arranged in separate departments, and with Clothing and Drapery (Items 9 to 11) constituting the "main line" of goods sold.
- (b) General Store - an establishment which is not a Department Store (see (a) above) and which has from 10 per cent. to 67 per cent. of its total turnover in groceries, plus sales in the clothing and hardware "main lines" to the extent of at least 10 per cent. in one and 5 per cent. in the other.

Retail Turnover Size - is a classification of establishments according to the total value of retail sales of goods recorded on the form after the deletion of any sales shown under Items 14 and 21. Details of "Other Takings" recorded are not taken into account for purposes of this classification.

Stocks of Goods on Hand and Method of Valuation - figures shown in this bulletin for stocks of goods on hand at 30th June, 1953 represent the total value of goods held for retail sale by establishments with stocks of more than £500 at that date. Retail

stocks of less than £500 held by individual establishments are excluded from the figures. Details of stocks shown in this Bulletin are aggregates of the figures supplied on individual returns without any adjustment for different methods of valuation (cost price, market price, replacement cost, etc.). However, details of stocks classified according to method of stock valuation are shown in Table 14.

Metropolitan Area - as defined for statistical purposes includes the city proper and adjoining urban areas. Brisbane is not divided for Local Government purposes but separate figures are shown for the city proper and each suburb as delineated for statistical purposes. The names of the suburban areas included in the metropolitan area of Brisbane are shown in Table 16 and on the map at the end of this Bulletin.

Statistical Retail Areas - in Queensland most Statistical Divisions have been divided into a number of Statistical Retail Areas but, in some cases, it has been necessary to group two Statistical Divisions to form single Statistical Retail Areas, namely, Roma and South Western Divisions; Central Western and Far Western Divisions; and Peninsula and North Western Divisions. A number of Statistical Retail Areas, comprising groups of contiguous Suburban Areas, have been shown for the metropolitan area of Brisbane. Total figures only were shown for Brisbane in 1948-49 Census publications but in this Bulletin separate figures are shown for each Statistical Retail Area, for comparison with 1952-53 figures.

8. Comparison of 1948-49 and 1952-53 Census results:

In a number of tables in this Bulletin comparisons are shown of the 1948-49 and 1952-53 Retail Census results. In general, the scope of the 1952-53 Census follows the same general principles adopted for the earlier Census and as a result the same types of establishments are included in both Censuses. However, establishments with total retail sales of less than £500 were excluded in 1952-53, whereas only those with less than £50 in 1948-49 were excluded from the tabulations. In 1952-53 there were an additional 449 establishments in Queensland with retail sales of less than £500 but more than £100, with total retail sales of £128,000. These establishments, which were excluded from the tabulations, represent approximately 3.0% of the total number of establishments in Queensland but the amount of their sales was not significant (less than 0.1% of the total).

A more detailed dissection of total retail turnover was obtained in 1952-53 (32 groups in 1952-53 and 17 in 1948-49) but comparability of commodity groups has been maintained as the additional dissections relate mainly to further break-downs of the 1948-49 groups. However, sales of building materials (except timber) where sold by retailers are included in the 1948-49 Census figures, whereas, all building materials are excluded from the 1952-53 Census. Sales of farm machinery and implements, obtained separately on the 1952-53 Census forms, are excluded from the tabulations. These sales were also excluded as far as possible in the 1948-49 Census.

The method of classification to type of business used in 1952-53 has been explained in Section 7. In 1948-49 the description of business given by the proprietor formed the basis of the classification to type of business, although in cases where the description given did not indicate the nature of goods sold (e.g. general store, variety store, etc.), type of business was determined by the commodity group in which the largest sales were recorded. Differences in coding procedure between the two Censuses would affect only those establishments with sales of approximately equal value in two or more commodity groups. Some such composite establishments may have been coded to one type of business in 1948-49 when classified in accordance with the description of business given, but to another type of business in 1952-53 when classified in accordance with the "main line" with the largest sales.

9. Supplementary Collections:

The following supplementary collections were made in conjunction with the Census of Retail Establishments -

- (a) Licensed establishments - licensed establishments which sell goods by retail to the general public (such as hotels, wine saloons, refreshment rooms, licensed grocers, etc.) are included in the Retail Census and details of their retail sales are shown in the main tables in this Bulletin. In addition to these establishments there are a number of establishments such as clubs, canteens, etc. which are not included in the main Census but which are licensed by the State licensing authority to sell beer, wine and spirits. These latter establishments were asked to supply a dissection of their total takings during 1952-53 into sales of beer, wine and spirits; tobacco, cigars and cigarettes; and takings from meals provided. Returns were received from a total of 313 licensed establishments and details of their takings during 1952-53 are shown in Table 19.
- (b) Laundries and Dry Cleaners - laundry, dry cleaning and dyeing plants (i.e. establishments in which the actual work of cleaning, etc. of articles is carried out) are not included in the Retail Census but a special supplementary collection was taken in respect of their takings during 1952-53. These establishments were asked to supply a dissection of their gross takings from laundry, dry cleaning and dyeing work done during the year ended 30th June, 1953 into 6 broad types. In Queensland a total of 202 laundry and dry cleaning plants supplied dissections of their gross takings and details of these are shown in Table 20. Some retail establishments also conduct dry cleaning plants as part of their business. Takings recorded for dry cleaning work done by these establishments for 1952-53 are included in the figures shown in Table 20, and not in the main Census tables.

(c) Establishments with total retail sales of £500 or more in 1952-53. In this year there were 449 establishments in Queensland with retail sales of less than £500 but more than £100, with total retail sales of £128,000. (d) Excludes meals in Cafes, Restaurants and other eating houses. (e) In 1948-49 separate details for each of the commodity groups bracketed were not collected. (f) Excludes Basic Building Materials (e.g. Timber, Roofing Tiles, Bricks, etc.). (g) Includes sales of Basic Building Materials (other than Timber) with an estimated value of £2,348,000. (h) Not available. (j) Excludes Farm Machinery and Implements, Earth-moving Equipment, etc. (k) Total number of individual establishments. Because many establishments showed sales in more than one commodity group, the number of establishments selling goods in each commodity group does not add down to the total number of individual establishments.

(a) Total value of all commodities sold by retail by the types of business shown.

(b) Establishments with total retail sales of £50 or more in 1948-49. (c) Establishments with total retail sales of £500 or more in 1952-53. In this year there were 449 establishments in Queensland with retail sales of less than £500 but more than £100 with total retail sales of £128,000. (d) Total value of all stocks held for retail sale by establishments with retail stocks of more than £500 at 30th June, 1953.

In some types of business (particularly in the Food, Hotels, Tobacconists, etc. groups) a large proportion of establishments had stocks of less than £500 at 30th June, 1953. In these cases the values shown may be substantially less than the total value of stocks held by all establishments classified to that type of business. (e) Cafes, restaurants, etc. selling goods. Excludes those selling meals only. (f) Includes establishments whose main type of business is Basic Building Materials. (g) Includes sales by establishments whose main type of business is Basic Building Materials.

(h) This figure differs from its counterpart in Table 1 because it includes retail sales of motor vehicles, etc. made by establishments whose main type of business is other than motor vehicles and excludes retail sales of goods other than motor vehicles, etc. made by establishments whose main type of business is motor vehicles.

- (a) Establishments with total retail sales of £500 or more in 1952-53. In this year there were 449 establishments in Queensland with retail sales of less than £500 but more than £100, with total retail sales of £128,000.
- (b) Total value of all commodities sold by retail by the types of business shown.
- (c) Total value of all stocks held for retail sale by establishments with retail stocks of more than £500 at 30th June, 1953.
- (d) Cafes, restaurants, etc., selling goods. Excludes those selling meals only.
- (e) In some types of business (particularly in the Food, Hotels, Tobacconists, etc. groups) a large proportion of establishments had stocks of less than £500 at 30th June, 1953. In these types of business the stocks values, which are shown in the table for establishments with retail stocks of £500 or more, may be substantially less than the total value of stocks held by all such establishments. Consequently, the average value of stocks per establishment is not shown.
- (f) Excludes Basic Building Materials (e.g. Timber, Roofing Tiles, Bricks, etc.).
- (g) This figure differs from its counterpart in Table 1 because it includes retail sales of motor vehicles, etc. made by establishments whose main type of business is other than motor vehicles and excludes retail sales of goods other than motor vehicles, etc. made by establishments whose main type of business is motor vehicles.

(a) Because a large proportion of establishments in this group had stocks of less than £500 at 30th June, 1953, the value of stocks recorded in the Census may be substantially less than the total value of stocks held by all establishments classified to that type of business and are therefore not shown in this table.

(b) Establishments with total retail sales of £500 or more in 1952-53.

(c) Total value of all commodities sold by retail by the establishments shown.

(d) Total value of all stocks held for retail sale by establishments with retail stocks of more than £500 at 30th June, 1953.

(e) Not available for publication.

(f) Excludes Basic Building Materials (e.g. Timber, Roofing Tiles, etc.).

(a) The total number of licensed clubs and canteens in Queensland in 1952-53 was 313 (70 in the Metropolitan Area 243 in the Remainder of State). Because many clubs and canteens showed sales in more than one item the number of clubs and canteens which sold goods in each item does not add to the total number of individual clubs and canteens.

48.

(a) The total number of Laundry, Dry Cleaning and Dyeing plants in Queensland, in 1952-53, was 202 (58 in the Metropolitan Area; 144 in the Remainder of State). Because some establishments showed takings for both laundry and dry cleaning work done, the number of Laundry, Dry Cleaning and Dyeing Plants which recorded takings in each item does not add to the total number of individual Laundry, Dry Cleaning and Dyeing Plants.

CENSUS OF RETAIL ESTABLISHMENTS : QUEENSLAND
YEAR ENDED 30TH JUNE, 1953.

Since publication of the 1952-53 Retail Census Bulletin No. 4 for Queensland, amendments have been made to figures shown for some Suburban Areas included in the metropolitan area of Brisbane. These have been annotated on Table 16, page 37, in the second series Bulletin No. 11, for Queensland.

The amendments also affect figures already shown in Table 4 of Bulletin No. 4, relating to commodity group statistics for Statistical Retail Areas, and, as this information is not repeated in Bulletin No. 11, amended figures for the Areas concerned (Statistical Retail Areas 3001 and 3005) are shown in the table below.

(a) Excludes meals in Cafes, Restaurants and other eating houses.

(b) Not available for publication.

(c) Excludes Basic Building Materials (e.g. Timber, Roofing Tiles, etc.).

(d) Not available.

(e) Excludes Farm Machinery and Implements, Earth-moving Equipment, etc.

(f) Total number of individual establishments. Because many establishments showed sales in more than one commodity group, the number of establishments selling goods in each commodity group does not add down to the total number of individual establishments.
