OVERSEAS SHIPPING CARGOJUNE 1969EXPLANATORY NOTES

Monthly statistics of shipping cargo are shown in this Bulletin, classified by type of shipping service, by countries and geographic trade areas and by States. Figures for 1968-69 are preliminary and subject to revision.

Scope of the statistics

2. Overseas shipping cargo statistics are compiled from returns submitted by shipping companies or their representatives to Customs Houses at each port throughout Australia. A return is required for each movement of a vessel into and out of a port except (i) naval vessels, (ii) yachts and other craft used for pleasure, (iii) foreign fishing vessels that neither load nor discharge cargo and (iv) other vessels of 200 net tons and under. Arrivals and departures are treated separately in the statistics. The Shipping Register maintained under the Customs Act by the Department of Customs and Excise in each port is examined to ensure that a return is received for each entrance or clearance of an overseas vessel.

Units of quantity

3. Cargo is recorded on returns either in terms of units of weight or in terms of units of measurement (a ton measurement is a unit of 40 cubic feet) depending on the basis on which freight is charged. The statistics show separate figures for cargo recorded in tons weight and cargo recorded in tons measurement. The aggregates for weight and measure cargo are not added to a figure for total cargo because they are unlike quantities, and comparisons of total cargo between ports, trade routes or periods of time could be affected by variations in the cargo mix and in the basis on which freight is charged.

Classification of vessels

4. In the statistics vessels are classified to two groups: liner services; and tramps, bulkships and tankers. Liner services include both passenger and cargo liners.

Liner services

5. A liner service specifically relates to a vessel which, on the voyage on which cargo is loaded or discharged at an Australian port, is operated by a common carrier in providing services on a specified route on a relatively regular basis. In the majority of cases a liner can be clearly distinguished from other vessel types but in some cases it is more difficult to make this distinction, for example when a vessel operates as a liner at one point of time and as a tramp at another point of time. Classification difficulties also arise in the case of vessels which divert from services between other countries to discharge cargo at Australian ports.

6. Statistics of cargo shipped on liner services do not necessarily provide a measure of cargo carried by ships operating under shipping conference arrangements. For example, liner services may be provided by shipping companies which are not parties to conference agreements. Cargo may also be shipped under shipping conference conditions in vessels operating on a voyage charter basis for specific cargo; in these statistics such cargo is classified as cargo shipped on tramp services.

Country of loading or discharge

7. Ports at which reporting vessels load or discharge cargo are allocated to their respective countries and these are the countries of loading and discharge of cargo shown in the statistics. Countries are classified to geographic trade areas in accordance with the Classification of Geographic Trade Areas for Shipping Statistics set out in Appendix I. The major trade areas used in Tables 3 to 8 consist of a summary grouping of geographic trade areas.

8. The countries shown are not necessarily the countries of origin or ultimate destination of cargo because previous or subsequent overseas transshipments are not taken into account. The statistics of cargo classified according to the country in which it was loaded or discharged cannot therefore be compared directly with statistics of overseas trade classified by country of origin or consignment. In Australian import statistics, country of origin refers to the country in which the goods imported were produced. In Australian export statistics, country of consignment refers to the country of final destination of goods at the time of export and not to any country in which they may be transhipped on route. For example, where the United Kingdom is the country of final destination but the goods exported are transhipped at a Netherlands port, export statistics would show them as exports to the United Kingdom whereas in shipping cargo statistics they would be shown as cargo loaded for discharge in the Netherlands.

9. Cargo loaded for "optional ports" (i.e. consignments of cargo for discharge at one of a specified range of ports, the particular port being nominated by the shipper during the voyage) is classified to the country in which the ports are situated when they are all within one country. If the range of port options extends beyond one country, the cargo is allocated to the category "optional ports" within the relevant geographic trade area.

State of loading or discharge

10. The State of loading or discharge shown in these statistics is the State in which cargo is loaded on, or discharged from, a vessel on an overseas voyage. Overseas cargo loaded in a given State can, therefore, include cargo previously shipped interstate. Similarly, overseas cargo discharged can include cargo to be shipped interstate.

Treatment of amendments

11. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this Bulletin. Consequently, monthly figures in successive Bulletins for the current financial year will not necessarily add to the year-to-date figures shown in this issue.

Western Area

Ecuador
Peru
Chile

Eastern Area

Brazil
Paraguay
Uruguay
Argentina, Republic of
Falkland Islands

EUROPE (excluding U.S.S.R.)

Northwestern, Central and Baltic Area

Iceland
Norway
Sweden
Finland
Poland
East Germany
Denmark
United Kingdom
Ireland, Republic of
Germany, Federal Republic of
Netherlands
Belgium
France -
Atlantic Region
Optional Ports involving more than
one country

Southern Area

Spain -
Atlantic Region
Mediterranean Region
Portugal
Azores
Gibraltar
France -
Mediterranean Region
Italy
Malta
Yugoslavia

EUROPE (excluding U.S.S.R.) - continued

Southern Area - continued

Albania
Greece
Bulgaria
Romania
Turkey, Republic of (in Europe and Asia)
Cyprus

U.S.S.R.

Baltic Region

Black Sea Region

Eastern Region

AFRICA

Northern Area

Morocco
Algeria
Tunisia
Libya
United Arab Republic (Egypt)
Sudan

Western Area

Canary Islands
Spanish Africa
Cape Verde Islands
Mauritania
Senegal
Gambia
Portuguese Guinea
Guinea
Sierra Leone
