PRODUCTION SUMMARY NO. 33 : MOTOR VEHICLES AUSTRALIA : SEPTEMBER 1973

These statistics include production of vehicles from both Australian and imported components. The statistics of finished motor vehicles exclude vehicles finished by specialist body building establishments. The statistics of partly finished motor vehicles represent the production of vehicles to which some additional body work (except painting) is to be done by specialist body building establishments. Production figures for Northern Territory are included.

The summary contains seasonally adjusted statistics of total motor vehicles in Table 2, page 3. In the seasonal adjustment, account has been taken not only of normal seasonal factors but also of "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of Easter and Australia Day which may, in subsequent years, affect figures for different months. Details of the methods used in seasonally adjusting this and other series are given in *Seasonally Adjusted Indicators, 1973* (reference No. 1.10).

The figures for 1971-72 are derived from Annual Factory Census. All other annual figures are derived from the recorded monthly production and are subject to revision.

TABLE 1. - FINISHED MOTOR VEHICLES
(Number)

Period	Cars				Total	Station wagons		
	Under 1,400 cc (581.02)	1,400 cc and under 2,200 cc (581.04)	2,200 cc and under 4,000 cc (581.06)	4,000 cc and over (581.08)		Under 4,000 cc (a)	4,000 cc and over (581.16)	Total
