8. Trucks on register by gross vehicle weight/gross combination weight	7
9. Motor vehicles on register by make and type of vehicle	8
10. Motor cars on register by make of vehicle and year of model	11
11. Station wagons on register by make of vehicle and year of model	13
12. Open light commercial type vehicles on register by make of vehicle and year of model	14
13. Closed light commercial type vehicles on register by make of vehicle and year of model	16
14. Rigid trucks on register by make of vehicle and year of model	17
15. Articulated trucks on register by make of vehicle and year of model	19
16. Other truck type vehicles on register by make of vehicle and year of model	20
17. Buses on register by make of vehicle and year of model	21

EXPLANATORY NOTES

This bulletin contains particulars of motor vehicles, tractors, plant and equipment, caravans and trailers which were "on register" at 30 September 1971. It is one of a series of bulletins which are being issued for each State and Territory and for Australia.

2. Background

The most recent Motor Vehicle Census prior to 30 September 1971 was taken at 31 December 1962. Since that date the 1962 Census figures have been regularly updated by reference to data relating to first registrations and registration cancellations. While this procedure satisfactorily provides intercensal estimates of the number of vehicles on register, the series so derived are approximate and are subject to revision until the number of vehicles on register is ascertained at the next motor vehicle census. Consequently, estimated "on register" figures at 30 September 1971, previously published from the updating of the 1962 Census, differ in certain respects from the Census figures published in this bulletin.

3. Scope

The statistics contained in these bulletins have been derived from information made available by the motor vehicle registration authorities in the various States and Territories and include vehicles with diplomatic and consular plates and all Commonwealth-owned vehicles except those belonging to the Defence Services. It should be noted however that many vehicles, including tractors (particularly the agricultural types), plant and equipment, and motor vehicles used solely on farms, in mines, etc. are not used on public roads and are therefore not required to be registered. Such vehicles are excluded from these statistics.

There are also vehicles which do use public roads but are exempt from normal registration requirements, e.g. fire engines in certain States, which also are excluded from these statistics. The extent to which they are excluded varies from State to State.

4. Definition

For census purposes, vehicles on register at 30 September 1971 are defined as those vehicles for which registration was effective for a period including 30 September 1971, the registration fees being paid either in advance or on that date, or retrospectively. Since most registration authorities accept renewals of registrations some time after the due date, it was necessary to analyse registration transactions occurring after 30 September 1971 for the appropriate period in each State to ensure that all relevant retrospective transactions were taken into account.

5. Classification

(i) **General** : Vehicles have generally been classified according to information recorded in registration documents. The amount of detail that can be published is primarily dependent on the data recorded in those documents. As the registration documents used by the various motor vehicle registry systems are not uniform, either in the data variables that are available or in the definition of common variables, care must be taken when making comparisons between data from different systems. For example, carrying capacity, where available, is recorded in some States according to legal limits imposed for a particular vehicle while in others it is recorded according to manufacturers' recommended specifications. It is also possible for identical vehicles to be described differently in different States, e.g. rear end door sedans may be registered either as cars or station wagons.

(ii) **Type of vehicle** : Registrations have been classified according to seven major types of vehicles (excluding tractors, plant and equipment, caravans and trailers). This classification as well as that used in the previous Motor Vehicle Census, taken at 31 December 1962, is shown below :

Type of vehicle classification

31 December 1962

Motor cars (including ambulances and hearses)
Station wagons
Utilities
Panel vans
Trucks
Other truck types
Buses
Motor cycles

30 September 1971

Motor cars
Station wagons
Light commercial type vehicles —
 open
 closed
Trucks —
 rigid
 articulated
Other truck type vehicles
Buses
Motor cycles

The principal differences between the classification at 30 September 1971 and that at 31 December 1962 are as follows :

- (a) Light commercial type vehicles include utilities, panel vans and trucks with carrying capacity under one ton, and ambulances and hearses.
- (b) Rigid trucks include utilities, panel vans and rigid trucks with a carrying capacity of one ton and over.
- (c) Other truck type vehicles consist of those truck type vehicles which are designed for purposes other than freight carrying, e.g. street flushers. This category previously incorporated vehicles such as tankers and concrete agitators which are now classified as "trucks".

Direct comparisons of 1971 Motor Vehicle Census data with data for previous periods can be made only for the categories motor cars, station wagons, buses and motor cycles. Data for the other categories are not strictly comparable between the two censuses. However, for comparative purposes, in Table 1, utilities registered at 31 December 1962 have been included in the classification "open light commercial type vehicles" and panel vans and ambulances and hearses, registered at the same date, have been included in the classification "closed light commercial type vehicles". Trucks and other truck types 'on register' at 31 December 1962 have also been included under similar headings but attention is drawn to the changes in definition of these categories outlined above.

(iii) **Year of model** : Particulars of age of vehicle are recorded in registration records in some States by year of model of vehicle, and in others, by year of manufacture. "Year of model", being the term more commonly used in the motor vehicle industry, has been used in this bulletin.

(iv) **Horsepower (R.A.C.)** : In Victoria, Queensland, South Australia and Tasmania, registration fees are based on the number of power-weight units of a vehicle. The power-weight of a vehicle is usually obtained by adding the tare weight of the vehicle in hundred-weights to the rated R.A.C. horsepower. In these States, details of both tare weight and horsepower are checked for accuracy by the registration authority before they are incorporated in registration records. In the other States and Territories registration fees are based on the tare weight of a vehicle with the result that the reporting of horsepower in registration documents is not necessarily checked as closely by registration authorities as are particulars of tare weight. This means that in many instances, details of horsepower are either not recorded or are recorded differently from the manufacturer's specifications of a particular make/horsepower combination.

(v) **Carrying capacity** : Details of carrying capacity are not available for all States and Territories, or for all types of vehicle for which carrying capacity can be defined. It was therefore necessary to impute this information for some vehicles by reference to make, horsepower and tare weight characteristics. However, as there is no precise relationship between these vehicle characteristics, e.g. one engine size can power a wide range of vehicles, these imputed data are not considered sufficiently accurate to publish in other than in broad vehicle type classifications.

6. Additional information available

Detailed tables of the number of motor vehicles registered in each State and Territory by type of vehicle, make, horsepower and year of model are not included in this bulletin but will be available at a later date. The accuracy of horsepower data varies between States, depending upon whether horsepower is a factor in the formula used to derive registration fees (see "Horsepower", above).

Users may obtain these tables by contacting this Bureau and specifying their requirements. A charge appropriate to the amount of detail required will be made for this information.

Symbols and abbreviations used in this bulletin

n.a.	—	not available
..	—	nil or less than half the final digit shown, or not applicable.

NOTE. Any discrepancies between totals and sums of components in tables are due to rounding.
