EXPLANATORY NOTES

Introduction

This publication contains statistics of Australia's imports classified by commodity. The statistics are consistent with, but presented in greater commodity detail than those published in *Foreign Trade, Australia, Merchandise Imports, June 1993* (5433.0) issued on 4 August 1993.

2. The merchandise import statistics in this publication are compiled in broad agreement with the United Nations' recommendations for the compilation of international trade statistics. The sections below briefly describe the concepts and methods used in their compilation.

Source of data

3. These statistics are compiled by the Australian Bureau of Statistics from information submitted by importers or their agents to the Australian Customs Service (ACS).

Scope

4. Merchandise imports covers all movable goods which add to Australia's stock of material resources.

Excluded are:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) ships and aircraft moving through Australia while engaged in the transport of passengers or goods between Australia and other countries; and
- (c) non-merchandise goods, consisting primarily of goods moving on a temporary basis (eg mobile equipment, goods under repair, goods for exhibition and passengers' effects).

Coverage

5. The United Nations' recommendations for the compilation of merchandise trade statistics recognise that the basic source used by most compiling countries - the customs record - will not be able to capture certain transactions. In Australia the following types of goods which fall within the scope of merchandise imports, are excluded because customs entries are not required:

- (a) bunkers, aviation fuel and stores supplied abroad to Australian ships and aircraft;
- (b) migrants' and passengers' effects imported and parcel post imports of small value, for which customs entries are not required;
- (c) certain materials under inter-governmental agreements for defence and similar projects;
- (d) the sale or delivery of certain ships intended for use on overseas routes; and
- (e) entries lodged on informal clearance documents (ICDs) for values not exceeding \$250 and ICDs for postal articles valued up to \$1000.

(f) In addition, although merchandise import statistics should include illegal transactions, such as smuggled goods, these transactions are omitted as there is no practical way to collect this information.

Basis of compilation

6. The merchandise imports statistics in this publication are recorded on a general trade basis, i.e. imports comprise goods entered directly for home consumption together with goods imported into bonded warehouses.

Statistical period

7. Imports are recorded statistically in the calendar month in which the import entries are finalised by the ACS. Import entries may be lodged early and finalised prior to arrival, or their finalisation may be delayed because of the various validation checks carried out by ACS. Historically, this process of finalisation has meant that approximately 70 per cent of total import trade by value shown for a particular month has reflected shipments which arrived in that month, while approximately 25 per cent has reflected shipments which arrived during the previous month with the remaining 5 per cent by value arriving in either earlier or later months. However, recent investigations have revealed that this pattern has been changing in the last few years. Currently approximately 85 per cent of total imports trade by value shown for a particular month reflects shipments which arrived in that month, while approximately 10 per cent reflects shipments which arrived during the previous month. For individual commodities these percentages may vary considerably.

8. Occasionally significant delays occur in the lodgement, rather than processing, of import entries. When the affected entries are for significant values, they are recorded statistically in the month that they should have been lodged and finalised.

Valuation

9. The recorded value of imports is the Australian Customs value. Goods are valued at the point of containerisation (in most cases) or the port of shipment, or at the customs frontier of the exporting country, whichever comes first.

Commodity classification

10. Commodity import statistics in Table 2 of this publication are presented according to the codes and descriptions of the third revision of the United Nations' Standard International Trade Classification (SITC Rev3) with the addition of dummy codes to take account of Australia's treatment of gold coin, whether or not legal tender, and other legal tender coin and confidential items.

Confidentiality

11. Restrictions are placed on the release of statistics for certain commodities for reasons of confidentiality. These restrictions do not affect total import figures, but they can affect statistics at all levels in commodity tables. Refer to table footnotes and the Appendix for specific details. More details on the confidentiality process can be obtained from the *Confidentiality Manager* on Canberra (06) 252 5409.

Reliability

12. Statistics in this publication for recent periods should be considered preliminary. Revisions to previously published data frequently occur due to continuing quality checks.

Relationship to balance of payments statistics

13. The basic source of balance of payments data on merchandise imports is 'foreign trade statistics'. However, because of conceptual differences, various coverage, timing and valuation adjustments are necessary before foreign trade statistics can be put on a balance of payments basis. For more information on the relationship between merchandise trade measures in foreign trade and balance of payments statistics see either *Foreign Trade, Australia: Merchandise Exports and Imports* (5410.0) or Chapter 9 of *Balance of Payments, Australia: Concepts, Sources and Methods* (5331.0).

APPENDIX

CONFIDENTIAL COMMODITY LISTING

Restrictions are placed on the release of statistics for certain commodities for reasons of confidentiality. The only restriction to affect statistics presented in this publication is a 'No Commodity Details' restriction. In Table 2, commodities subject to that restriction are generally excluded from the relevant SITC items and divisions and included in Item 98888 in Section 9.

2. However, from 1 July 1991, imports of organic chemicals that are subject to a 'No Commodity Details' restriction are reclassified to Item 51099 within the appropriate division (SITC 51) for organic chemicals rather than to the residual Item 98888. The affected items are asterisked in the table below. For further details see *Changed application of confidentiality embargoes* at the beginning of the Explanatory Notes of the September 1991 and *Changes in this issue* at the beginning of the Explanatory Notes of the March 1992 issues of this publication.

3. The codes of the SITC Rev3 items affected by the 'No Commodity Details' restriction, together with the Harmonized Tariff items to which the restrictions are applied and the periods for which the restriction applies, are listed below.
