## EXPLANATORY NOTES

**Note: Change in the coverage of imports**

The treatment of gold coins, whether or not they are legal tender, and coins of other metals which are legal tender, has changed. Trade in these coins has, in previous issues of this publication been recorded as non-merchandise trade. Now such commodities are classified as merchandise and the trade in them is therefore included in total exports and imports. This change has been applied to data relating to periods from 1 July 1987 appearing in this and in other Foreign Trade statistics publications and in data releases via magnetic tape, microfiche and the various electronic services described below. The explanation for the change, and for purposes of comparison, the corresponding commodity exports and imports data, by country, for 1985-86, 1986-87 and 1987-88 are shown in Appendix A.

**Introduction**

This publication contains annual statistics of Australia's imports classified by commodity, country of origin and state of lodgement.

**Source of data**

2. These statistics are compiled by the Australian Bureau of Statistics from documents submitted by importers or their agents to the Australian Customs Service (ACS).

**Statistical concepts**

3. The statistics of imports presented in this publication are, with one exception, recorded on a general trade basis, i.e. imports comprise goods entered directly for home consumption together with goods imported into bonded warehouses. Table 1 of this publication also shows statistics of imports on a special trade basis, i.e. imports cleared for home consumption. Imports cleared for home consumption differ in scope from imports in that they include withdrawals from bonded warehouses but exclude imports into bonded warehouses.

4. Although items of non-merchandise trade are reported, they are excluded from imports and imports cleared for home consumption statistics (see paragraphs 9 to 12).

**Coverage of the statistics**

5. The following are excluded from recorded import statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) bunkers, aviation fuel and stores supplied to ships and aircraft prior to arrival in Australia;
- (c) migrants' and passengers' effects imported and parcels post imports of small value, for which Customs entries are not required;

(d) certain materials under inter-governmental agreements for defence and similar projects for which Customs entries are not required;

(e) ships and aircraft engaged in the transport of passengers or goods between Australia and other countries;

(f) the delivery of certain ships intended for use on overseas routes;

(g) delivery of certain aircraft (and parts and components) prior to 1 July 1987 intended for use on overseas routes. From 1 July 1987, these deliveries are included in recorded imports statistics;

(h) fish and other sea products landed in Australia directly from the high seas by Australian ships; and

(i) entries lodged on informal clearance documents (ICDs) for values not exceeding \$250. In addition, from 21 October 1985 onwards, ICDs for postal articles valued between \$250 and \$1,000 are excluded.

**Statistical period**

6. Imports are recorded statistically in the calendar month in which the import entries are finalised by the ACS. Import entries may be lodged early using the ACS check-to-arrive system or may be delayed because of various validation checks carried out by the ACS prior to the entries being passed to the ABS. Due to these factors, imports statistics for a particular month do not necessarily represent entries lodged or commodities imported during that month.

**Valuation**

7. The recorded value of imports is the Customs value (formerly referred to as the value for duty). On 30 November 1981, Australia adopted the GATT Agreement on Customs Valuation. The Agreement reflects one of a number of trade related codes of conduct established during the round of Multi-lateral Trade Negotiations concluded in 1979. Under the Agreement the primary basis for establishing the customs value is the price actually paid or payable, provided a number of conditions are met. The most important condition is that the buyer and seller must be independent of each other. If the conditions are not met the GATT Agreement offers a set of practical rules which are used to determine the customs value.

8. Depending upon contractual arrangements for the payment of delivery charges, goods are valued at the place of exportation which is variously determined to be, the factory where the goods were produced, or the point of containerization of the goods, or the port of shipment, or the customs frontier of the exporting country. (Charges and expenses involved in delivering the goods beyond the place of exportation to Australia are excluded). The recorded value also includes the value of the outside pack-

age, other than international containers used for containerised cargo.

#### Imports and non-merchandise trade

9. In accordance with United Nations' recommendations and practices adopted by Australia's major trading partners, total imports excludes transactions classified as non-merchandise trade.

10. Merchandise imports are defined as all goods which add to the stock of material resources in Australia as a result of their movement into the country.

11. Non-merchandise imports consist primarily of re-exports of goods which were originally exported on a temporary basis and goods imported on a temporary basis (e.g. goods for public exhibition in Australia or for repair, alteration or renovation in Australia). For periods prior to 1 July 1987 trade in gold coins, whether or not they are legal tender, and other coins which are legal tender is classified as non-merchandise trade; for periods from 1 July 1987 these commodities are excluded from non-merchandise trade and are included in total imports. See Appendix A for details.

12. A complete list of commodities comprising non-merchandise trade is shown under Section 9(b) of the AICC for periods up to the end of December 1987. For periods from January 1988 onwards this list may be obtained from the Trade Classifications Manager on (062) 52 5409. Information on the value of the commodities which comprise non-merchandise imports for the current financial year is available on microfiche MM07

#### Change in commodity classifications

13. For periods up to and including December 1987, Australia's customs tariff was based on the *Customs Co-operation Council Nomenclature* (CCCN), an international classification for describing goods for customs and other purposes. From 1 January 1988 Australia's customs tariff has been based on the *Harmonized Commodity Description and Coding System* (HCDCS) or *Harmonized System* (HS). The HS is a modernization, reorganization and extension of the CCCN.

14. Prior to 1 January 1988, import statistics classified by commodity were presented according to the codes and descriptions of the *Australian Import Commodity Classification* (AICC). This classification is based on the second revision of the United Nations *Standard International Trade Classification* (SITC Rev 2) with some modifications to take account of Australia's trade. To coincide with the introduction of the HS, Australia also adopted, from 1 January 1988, the third revision of the *Standard International Trade Classification* (SITC Rev 3). This replaced the second revision of the SITC.

15. SITC Rev3 incorporates significant changes to the numbering system and overall structure to align it more closely with the Harmonized System. The changes between the second and third revision of SITC, and the adoption by the ABS of the complete international version of the classification, have resulted in a break in the

detailed statistical series published by the ABS. However, differences are not significant for most items at the Division (two digit) level. A comparison of exports and imports classified according to the divisions of the SITC (Rev2) and SITC (Rev 3) is provided in Appendix B along with an explanation of major differences.

#### Commodity classifications

16. Commodity imports statistics in Table 2 of this publication are presented according to the codes and descriptions of the third revision of the United Nations' *Standard International Trade Classification* (SITC Rev3) with the addition of dummy codes to take account of Australia's treatment of gold and other legal tender coin and confidential items.

17. Users should be aware that the changes from AICC to SITC Rev3 are extensive and for many items prevent direct comparison. Accordingly, caution should be exercised in comparing detailed data in Table 2 of this issue with previous issues of this publication. For an explanation of the change in classification see paragraphs 13 to 15. A comparison of SITC Rev2 and Rev3 at the two digit level is provided in Appendix B. It should be noted that these changes affect only the commodity series and do not affect total imports.

18. More information about the links between SITC Rev3 and AICC items may be obtained from the booklet: *'Linkages Between SITC Rev3 and AECC/AICC Items Used in ABS Foreign Trade Outputs'*.

#### State

19. State information presented in Table 3 refers to the State in which the imports entry was lodged with the ACS. The port of lodgement of the imports entry is not necessarily the port of discharge of the goods. Goods forwarded interstate after import, whether in containers or not, are recorded as being imported at the port of lodgement of the imports entry.

#### Industry of origin

20. Imports statistics classified by subdivisions of the Australian Standard Industrial Classification (ASIC) are shown in Table 4. A full description of ASIC Classes is contained in the publication *Australian Standard Industrial Classification, Vol. 1 - The Classification* (1201.0).

21. Prior to 1 January 1988, the statistics are compiled by allocating statistical items of the AICC, and from 1 January 1988, 10 digit items of the Harmonized Customs Tariff, to the ASIC industry of origin based upon the main economic activities of those industries to which the commodities are primarily associated. The change in the commodity classification may result in some minor breaks in series, although these are not considered to be significant.

#### Broad Economic Categories

22. Imports of merchandise trade in Table 5 are classified according to the nineteen categories of the United Nations' classification, Broad Economic Categories

(BEC). The BEC classifies foreign trade statistics for the purposes of general economic analysis according to the main end use of the commodities traded. Prior to 1 January 1988 the statistics are compiled by allocating statistical items of the AICC, and from 1 January 1988 the 10 digit items of the Harmonized Customs Tariff, to the appropriate BEC. The change in the commodity classification may result in some minor breaks in series, although these are not considered to be significant.

#### Country

23. For the purposes of foreign trade statistics, a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with ACS provisions. External territories under Australian administration are treated as separate countries whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian foreign trade statistics. A detailed list of countries together with the areas covered by each country is provided in appendixes to successive issues of the ABS publication, *Foreign Trade Australia, Imports* (5437.0). For imports, country refers to the country of origin of the goods which is defined as the country of production for ACS purposes. Where the country of origin is not known at the time of import, and where it is impossible to determine the origin, goods are recorded as "Origin Unknown".

#### Confidentiality

24. Restrictions are placed on the release of statistics for certain commodities for reasons of confidentiality. These restrictions do not affect total import figures, but they can affect statistics at all levels in country and commodity tables. Refer to table footnotes and Appendix B for specific details. The information paper *'Confidentiality and the Release of Foreign Trade and Shipping Statistics'* (5486.0) describes fully the confidentiality process.

# APPENDIX A: CHANGE IN THE COVERAGE OF EXPORTS AND IMPORTS

The treatment of gold coins, whether or not they are legal tender, and coins of other metals which are legal tender, has changed. Trade in these coins has, in previous issues of this publication, been recorded as non-merchandise trade. Now such commodities are classified as merchandise and the trade in them is therefore included in total exports and imports. This change has been applied to data relating to periods from 1 July 1987 appearing in this and in other Foreign Trade statistics publications and in data releases via magnetic tape, microfiche and the various electronic services described in paragraph 33 of the Explanatory Notes. The explanation for the change and for purposes of comparison, the corresponding commodity exports and imports data, by country, for 1985-86, 1986-87 and 1987-88 follow.

Australia's trade in gold coins and in other coins which are legal tender is classified, under the Harmonized Commodity Description and Coding System (the Harmonized System or HS), to the 6 digit code HS 7118.90. This item applies to coins issued under government control for use as legal tender. Such a classification implies that the coins represent not a commodity or real resource but rather are evidence of a financial claim on the monetary authorities of the issuing country. The United Nations<sup>1</sup> recommends that coins not in circulation, ie, collectors' coins or coins minted by one country for issue in another, should be included in merchandise trade but that coins representing a financial claim should be excluded. The United Nations' Standard International Trade Classification, Revision 3 (SITC Rev3) therefore concords HS 7118.90 to a non-merchandise category for gold coins and other coins in circulation. Australian practice had, until the release of January 1989 data, adopted this concordance and excluded trade in coins classified to HS 7118.90 from merchandise exports and imports. Prior to the introduction of the HS on 1 January 1988, trade in these commodities was similarly classified to non-merchandise AICC items 991.00.01 and 991.00.99.

However, analysis of individual export and import entries has revealed that most of Australia's trade classified to HS 7118.90 relates to the export and subsequent re-import of the Australian Nugget bullion coins, the Australian Koala platinum coins and the Holey Dollar and Dump silver coins. These coins, although legal tender, are not issued for use as legal tender, are not in circulation and therefore should be included, at their commercial value, in merchandise trade.

As an interim measure, all data recorded under item HS 7118.90 are now concorded to a dummy SITC Rev3 code 95100 and included in merchandise exports and imports. From 1 January 1989 additional details have been incorporated both into the Australian Harmonized Export Commodity Classification and into the Customs Tariff to separately identify within HS 7118.90 those coins which are in circulation from those which are not. Recording under these items will be reviewed and, if necessary, the concordance to merchandise trade and the use of the dummy SITC Rev3 item revised.

**APPENDIX B: EXPORTS AND IMPORTS CLASSIFIED ACCORDING TO SITC REV 2 AND SITC REV 3,  
1988-89**

Prior to 1 January 1988, export and import statistics classified by commodity were presented according to the codes and descriptions of the *Australian Export Commodity Classification* (AECC) and the *Australian Import Commodity Classification* (AICC) respectively. Both classifications are based on the second revision of the United Nations' *Standard International Trade Classification* (SITC Rev 2), with some modifications to take account of Australia's trade. At the Division (2 digit) level however, the AECC and AICC are directly comparable to SITC Rev 2.

From 1 January 1988 Australia's export and import statistics have been based on the *Harmonized Commodity Description and Coding System* (HCDCS) or *Harmonized System* (HS). To coincide with the introduction of HS, Australia also adopted, from 1 January 1988, the third revision of the *Standard International Trade Classification* (SITC Rev 3), which replaced SITC Rev 2.

To assist users with the change in classifications, for the period January to June 1988 commodity statistics were published in two separate series. The first showed export and import data from January 1988 on a SITC Rev 3 basis; the second series, produced by recompiling data from SITC Rev 3, showed the same data according to the codes and descriptions of the SITC Rev 2 based AECC and AICC.

Although there are significant differences between the second and third revisions of the SITC which have resulted in a break in statistical series at the 5 digit level, at the Division (2 digit) level, the differences are not as major. The table below presents export and import data for 1988-89 at the 2 digit level on both a SITC Rev 2 and SITC Rev 3 basis. Commodity groups which have significantly altered under SITC Rev 3 have been footnoted to show where data were previously recorded under SITC Rev 2.

More information about the links between SITC Rev 3 and SITC Rev 2 may be obtained from the booklet "Linkages between SITC Rev 3 and AECC/AICC items used in Foreign Trade Output" available from any ABS office or by contacting the Classifications Manager on (062) 525409.
