## EXPLANATORY NOTES

### Introduction

In July 1984 a survey, based on the monthly population survey, was conducted throughout Australia to provide details of the labour force status of family members, their relationship to the family head and family composition.

2. Table 1 summarizes the family status of persons aged 15 and over and details those persons included in and excluded from the scope of the survey. Tables 2 to 24 show information about *married-couple and other families* — for example, number of dependent children present, labour force status of husband, wife or head of other family — while Tables 25 to 33 contain more detailed estimates of the *family status of persons* aged 15 and over classified by age, birthplace and other variables.

### The population survey

3. The population survey is based on a multi-stage area sample of private dwellings (about 33,000 houses, flats, etc.) and non-private dwellings (hotels, motels, etc.) and covers about two-thirds of one per cent of the population of Australia. Information was obtained from the occupants of selected dwellings by carefully chosen and specially trained interviewers, the interviews for this survey having been conducted during the two weeks beginning on Monday 9 July 1984. The information obtained relates to the week before the interview (i.e. the survey week).

### Scope

4. The monthly population survey included all persons aged 15 years and over except:

- (a) members of the permanent defence forces;
- (b) certain diplomatic personnel of overseas governments, customarily excluded from census and estimated populations;
- (c) overseas residents in Australia; and
- (d) members of non-Australian defence forces (and their dependents) stationed in Australia.

5. Because of the coverage rules of the population survey which associate persons with particular dwellings so that each person has an equal chance of selection in the survey, persons who usually live with other members of their family may, at the time of the survey, be enumerated as not living with all the usual members of their family. This situation is more likely for persons who are enumerated as visitors to other private dwellings or as persons staying in non-private dwellings (hotels, caravan parks, hospitals, etc.). The determination of family structure and family characteristics in such cases is most difficult. Thus for the family survey, scope was further restricted to usual residents of private dwellings and the following persons were excluded:

- (a) all persons enumerated in non-private dwellings (including hotels, motels, hospitals and other institutions); and
- (b) persons enumerated as visitors to (rather than usual residents of) private dwellings.

6. In addition, in those private dwellings where it was not possible to obtain information relating to all the usual residents, no family information was recorded. Thus persons living in families which include a member of the permanent defence forces, who is outside the scope of the population survey, are excluded from the family survey because family information could not be obtained from each usual resident. Similarly families which, at the time of the survey, have one or more of their members away from the usual residence, are also excluded from the family survey. Table 1 summarizes those persons for whom family information was obtained as well as those usual residents of private dwellings for whom complete family information could not be obtained, and those persons specifically excluded from the scope of the family survey. The table shows that family status was determined in this survey for 11,001,800 persons out of a total of 11,779,500 civilians aged 15 and over — a coverage of 93.4 per cent.

### Definitions

#### Labour force

7. The labour force category to which a person is assigned depends on his or her *actual activity* (i.e. whether working, looking for work, etc.) during the survey week. The following definitions, which conform closely to the international standard definitions specified by the International Labour Organisation (ILO), relate only to those persons within the scope of the survey.

8. *Employed persons* comprise all those aged 15 and over who, during the survey week:

- (a) worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (including employees, employers and self-employed persons); or
- (b) worked for 15 hours or more without pay in a family business or on a farm (i.e. unpaid family helpers); or
- (c) were employees who had a job but were not at work and were: on paid leave; on leave without pay for less than four weeks up to the end of the survey week; stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the survey week; on strike or locked out; on workers' compensation and expected to be returning to their job; or receiving wages or salary while undertaking full-time study; or
- (d) were employers or self-employed persons who had a job, business or farm, but were not at work.

9. *Unemployed persons* are those aged 15 and over who were not employed during the survey week, and

- (a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the survey week and:

(i) were available for work in the survey week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the survey week); or

(ii) were waiting to start a new job within four weeks from the end of the survey week and would have started in the survey week if the job had been available then;

or (b) were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the survey week (including the whole of the survey week) for reasons other than bad weather or plant breakdown.

10. The *unemployment rate* for any group is the number unemployed expressed as a percentage of the labour force (i.e. employed plus unemployed) in the same group.

11. *Duration of unemployment* is the period from the time the person began looking for work or was laid off to the end of the survey week. Thus the survey measures current (and continuing) periods of unemployment rather than completed spells. For persons who may have begun looking for work while still employed, the duration of unemployment is defined as the period from the time the person last worked full time for two weeks or more to the end of the survey week. Periods of unemployment are recorded in complete weeks and this results in a slight understatement of duration. *Average (mean) duration* is the duration obtained by dividing the aggregate number of weeks a group has been unemployed by the number of persons in that group. *Median duration* is the duration which divides unemployed persons into two equal groups, one comprising persons whose duration of unemployment is above the median and the other, persons whose duration is below it.

12. The *labour force* comprises all persons who, during the survey week, were employed or unemployed, as defined in paragraphs 8 and 9.

13. The *labour force participation rate* for any group is the labour force expressed as a percentage of the civilian population aged 15 and over in the same group.

14. *Full-time workers* are those who usually work 35 hours or more a week and others who, although usually part-time workers, worked 35 hours or more during the survey week. *Part-time workers* are those who usually work less than 35 hours a week and who did so during the survey week.

15. *Hours of work*. The figures refer to actual hours worked during the survey week, not hours paid for. They may be affected by public holidays, leave, absenteeism; temporary absence from work due to sickness, injury, accident and industrial disputes; and stoppages of work due to bad weather, plant breakdown, etc. Fractions of an hour are disregarded and this results in slightly lower figures than would be the case if actual time worked was recorded.

16. *Persons not in the labour force* are those who, during the survey week, were not in the categories 'employed' or 'unemployed', as defined in paragraphs 8 and 9.

17. Persons classified by *labour force status* are classified according to whether or not they are in the labour force. Persons in the labour force classified by *employment status* are classified according to whether they are employed or unemployed. Employed persons classified by *status of worker* are classified according to whether they are employers, self-employed persons, wage and salary earners (employees), or unpaid family helpers (who worked 15 hours or more in the survey week).

18. *Main English-speaking countries* comprise the United Kingdom, Ireland, Canada, the United States of America, New Zealand and South Africa.

19. *Other countries* comprise all countries outside Australia other than the main English-speaking countries mentioned in paragraph 18.

20. A *dwelling* may contain one or more *households*, and separate households were considered to exist within a dwelling when:

(a) a group of one or more persons considered themselves to be a separate household from others in the dwelling;

(b) regular provision was made for groups to take meals at different times or in different rooms; or

(c) a dwelling contained one or more lodgers, who received accommodation, but no meals; each lodger was then considered to be a separate household.

A household may consist of any number of families and non-family members. A boarder who received both accommodation and meals was not considered to constitute a separate household.

21. *Marital status* is determined from information supplied by the respondent about the individual himself or herself and, where the person was reported as being married, about the living arrangements of persons usually resident in the household. Marital status does not therefore necessarily reflect legal status. Persons are classified as *married* if they are reported as being married (including de facto) and their spouse was a usual resident of the household at the time of the survey. The *not-married* category includes persons who have never married, or are separated, widowed or divorced, as well as those who, although reported as being married, did not have a spouse who usually lived in the household. Persons who live in a de facto relationship but do not volunteer this information when asked whether they are married are classified as not married.

#### *Family relationships*

22. The determination of family relationships and composition is complex, involving many factors. The following description outlines the major principles used

for this survey. A *family* is defined to consist of two or more related persons usually resident in the same household at the time of the survey. A family comprises a married couple or a family head (as defined in paragraph 24) together with any persons having any of the following relationships to them:

- (a) sons or daughters of any age, if not married and with no children of their own present;
- (b) other relatives if not accompanied by a spouse, sons or daughters, or parents of their own; or
- (c) any children under 15 years of age who do not have a parent present.

23. The following points should be noted in relation to the definition of a family in the previous paragraph:

- (a) the term *relationship* includes relationships by blood, marriage or adoption;
- (b) a family, as defined, can contain no more than two married persons, and can contain two married persons only if these persons are husband and wife (referred to as *married-couple families*);
- (c) *other families* are families other than married-couple families as defined above. From the definition of married and not married in paragraph 21 it can be seen that the heads of other families must, by definition, be not married. In addition to one-parent families, this category includes families in which there is no parent, for example a family head living with a brother or sister;
- (d) persons are defined as *not a member of a family* if they are not related to any other member of the household in which they are living. A person is considered to be *living alone* if he or she is the sole member of a household. Thus, a person who is the sole occupant of a self-contained flat attached to another dwelling is considered to be living alone;
- (e) the terms *usually reside* and *present* are synonymous, and refer to persons who were identified by the respondent as usual residents of the household at the time of the survey.

24. The *family head* of an *other family* is the parent in the case of a one-parent family or, in the case of other groups of related persons, is generally defined to be the eldest person in the family. No family head is defined for a married-couple family.

25. *Dependent children* comprise all family members under 15 years of age and all family members aged 15 to 20 who are full-time students.

#### Comparability of series

26. Estimates for both the July 1983 and July 1984 surveys are based on population estimates derived from the results of the 1981 Population Census (adjusted for underenumeration). Estimates for surveys conducted in 1979, 1980, 1981 and 1982 were based on 1976 Census results.

27. For the 1982 and previous surveys office imputation was undertaken to determine the family status of those persons enumerated in private dwellings where family information could not be obtained for all usual residents, and for those persons enumerated in non-private dwellings or as visitors to private dwellings where family information could not be obtained for each member of the family. Due to the increased demand for family data on a consistent and more regular basis, it was decided to change the processing methodology to eliminate office imputation and rely solely on the reported information. Consequently the scope of the 1983 and subsequent surveys was narrowed to exclude those three groups of respondents for whom it is known that complete family information is difficult to collect (see paragraphs 5 and 6).

28. The 1983 and 1984 surveys are thus not strictly comparable with previous surveys since the persons excluded may have differing family and labour force characteristics to those persons included in the survey. Because of these exclusions the total number of persons with particular family characteristics will also differ between surveys conducted prior to 1983 and those conducted in July 1983 and July 1984. Table 1 shows the number of persons excluded from the survey (see also paragraph 2.)

#### Reliability of the estimates

29. Since the estimates in this publication are based on information obtained from occupants of a sample of dwellings, they may differ from the figures that would have been produced if the information had been obtained from occupants of all dwellings. More information on this topic is given in the Technical note.

32. Where figures have been rounded discrepancies may occur between sums of the component items and totals.

## SUMMARY OF FINDINGS

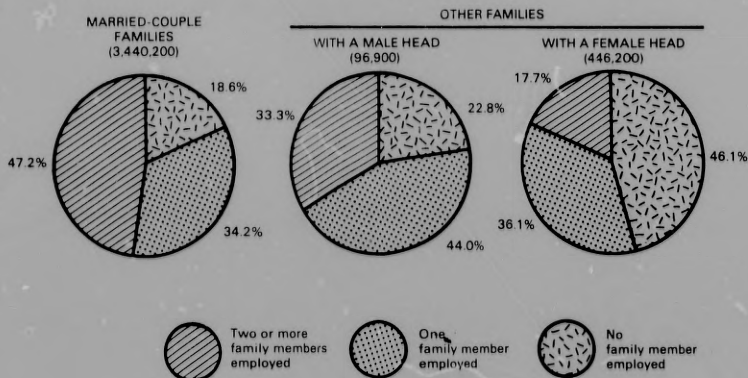

In July 1984 the estimated number of families in Australia was 3,983,300 comprising 3,440,200 married-couple families and 543,100 other families (of which 96,900 had a male head and 446,200 had a female head). 54.7 per cent of the married-couple families had dependent children present compared with 40.7 per cent of other families with a male head and 61.5 per cent of other families with a female head. There were 1,574,700 persons who did not live in families of whom nearly 60 per cent lived alone. More than half those non-family members who lived alone were aged 60 years or more. In contrast, less than 10 per cent of non-family members who did not live alone were 60 years and over and nearly 80 per cent were in the age group 15-34 years.

DIAGRAM 1. AUSTRALIAN FAMILIES, JULY 1984

Other families with a not-married male or female head were far more likely to consist of persons who were not employed, than were married-couple families. In approximately 46 per cent of other families with a female head, there were no family members employed and in only about 18 per cent of such families were there two or more family members employed. For married-couple families the proportions were approximately 19 per cent and 47 per cent respectively. The average size of a married couple family is 3.4 persons compared with 2.5 for an other family with a male head and 2.7 for other families headed by females. For married-couple families nearly 50 per cent contained four or more persons while only about 15 per cent of other families were this size.

DIAGRAM 2. ALL FAMILIES: NUMBER OF FAMILY MEMBERS EMPLOYED, JULY 1984  
(Source: Table 3)

In July 1984 there were 329,100 married-couple families containing one or more persons who were unemployed (213,600 or nearly 65 per cent of these families had dependent children present). There were 75,800 other families with some unemployment including 38,700 where dependent children were present. Nearly 70 per cent of other families with dependent children present and some unemployment contained no family members who were employed.

DIAGRAM 3. ALL FAMILIES WITH SOME UNEMPLOYMENT: NUMBER OF FAMILY MEMBERS EMPLOYED, JULY 1984  
(Source: Table 6)

Diagram 4 details the employment status of both husband and wife in married-couple families. It shows that in the 173,700 families with dependent children where the husband was not employed, the wife was also not employed in over 80 per cent of these cases. There were 19,800 families where both husband and wife were unemployed; 65 per cent of these included dependent children. Married-couple families in which wives were most likely to be employed were those families without dependent children where the husband was also employed.

DIAGRAM 4. MARRIED-COUPLE FAMILIES : LABOUR FORCE STATUS OF HUSBAND AND WIFE, JULY 1984  
(Source : Table 7)

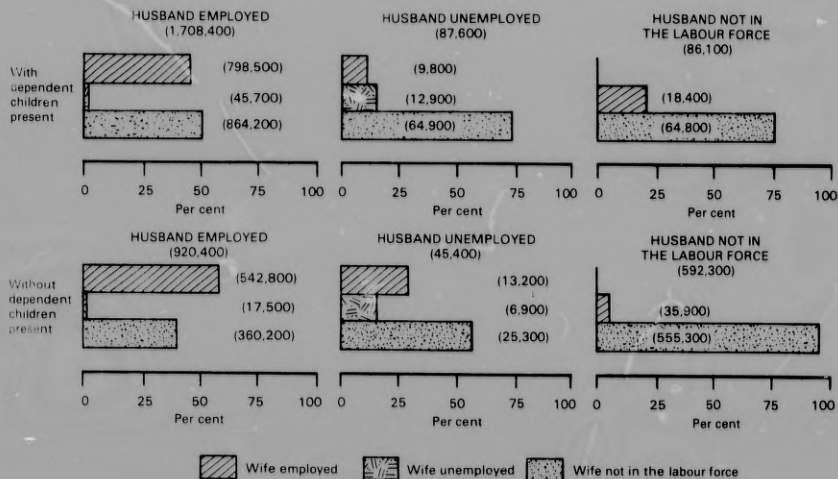

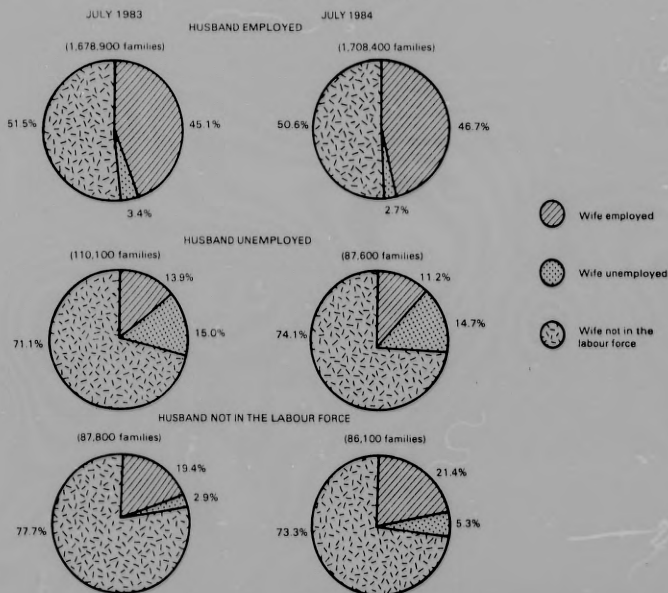

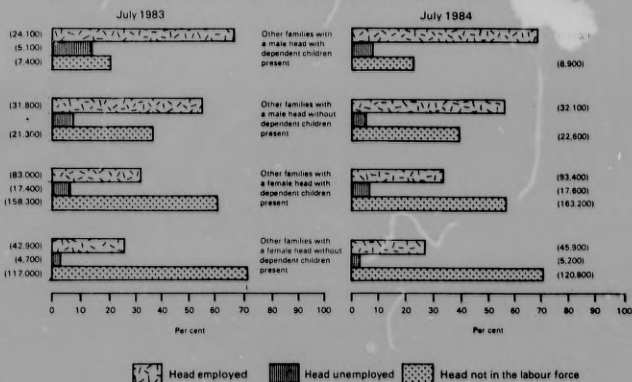

Diagram 5 provides a comparison between July 1983 and July 1984 for the labour force status of husbands or wives in married-couple families with dependent children as a percentage of total families. It shows that where the husband was employed the likelihood of wives being employed had risen from about 45 per cent to nearly 47 per cent and of being unemployed had fallen from 3.4 to 2.7 per cent. Where the husband was unemployed the proportion of wives being employed fell from almost 14 per cent to just over 11 per cent while the proportion of wives unemployed showed little change.

DIAGRAM 5. MARRIED-COUPLE FAMILIES WITH DEPENDENT CHILDREN: LABOUR FORCE STATUS OF HUSBAND OR WIFE, JULY 1983 AND JULY 1984

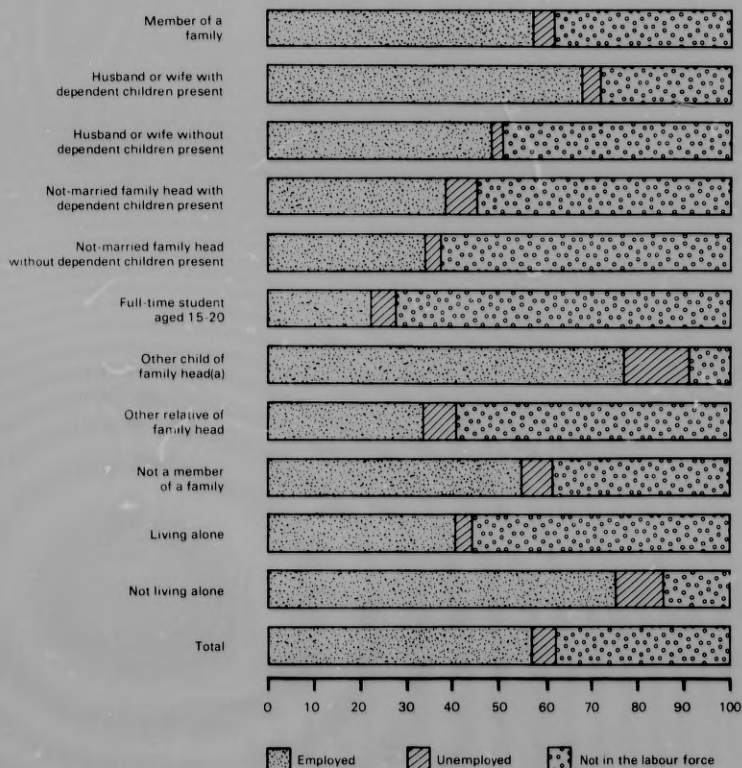

The employment status of the head of other than married-couple families is shown in diagram 6 for both July 1983 and July 1984. Not-married female heads were for less likely to be employed than not-married male heads. There were 5,900 (6.1 per cent) of other families with an unemployed male head in July 1984 compared with 9,500 (10 per cent) in July 1983. There were also 22,800 other families (approximately 5 per cent) with an unemployed female head in July 1984 which was comparable with July 1983.

DIAGRAM 6. OTHER FAMILIES: LABOUR FORCE STATUS OF HEAD, JULY 1983 AND JULY 1984

In terms of individuals, husbands or wives were more likely to be participating in the labour force than not-married family heads and within these groups, those heads with dependent children had higher participation rates than those without dependent children. In general, heads without dependent children were older and thus were more likely to be not in the labour force. For persons classified as non-family members, those living alone had a significantly lower participation rate (43.6 per cent) than those not living alone (85.3 per cent) reflecting the age distribution of each group. Non-family members living alone were aged 55 years and over in about 60 per cent of cases whereas for those not living alone approximately 78 per cent were aged less than 35.

DIAGRAM 7. FAMILY STATUS AND LABOUR FORCE STATUS OF PERSONS AGED 15 AND OVER, JULY 1984  
(Source: Table 25)

(a) Aged 15 and over.

The unemployment rate was much higher for not-married family heads, particularly females with dependent children present (15.9 per cent). Married family heads with dependent children present had a much lower unemployment rate, 4.9 per cent for husbands and 6.8 per cent for wives. Other family members (full-time students aged 15-20 years and other relatives of the head) had the highest unemployment rates of all persons in families.

DIAGRAM 8. UNEMPLOYMENT RATES BY FAMILY STATUS, JULY 1984  
(Source: Table 25)

Unemployment rates by family status have shown a considerable fall for July 1984 compared with July 1983. Unemployment rates for husbands or wives with dependent children present have fallen from 7.0 per cent to 5.5 per cent. Similarly the unemployment rate for not-married family heads with dependent children present has dropped from 17.3 per cent to 14.6 per cent.

DIAGRAM 9. UNEMPLOYMENT RATES BY FAMILY STATUS, JULY 1983 AND JULY 1984

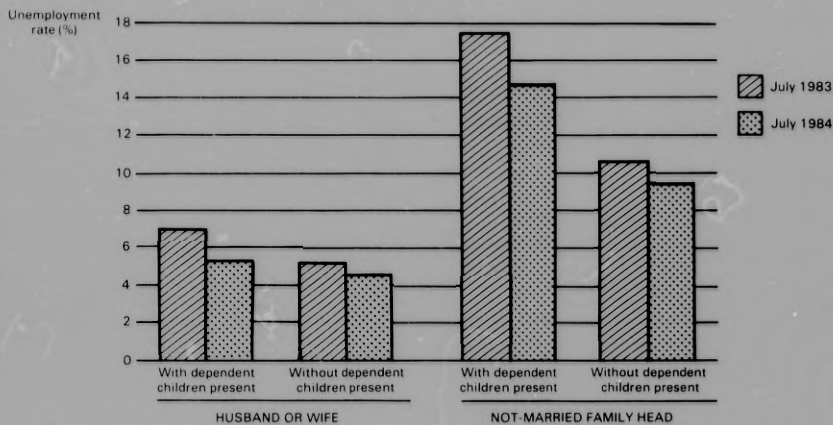

TABLE 1. SUMMARY TABLE: FAMILY STATUS, JULY 1984

	Persons						
	Males	Females	Employed	Unem- ployed	In the labour force	Not in the labour force	Civilian population aged 15 and over
	NUMBER ('000)
