ESTIMATED AGE DISTRIBUTION OF THE POPULATION :
AUSTRALIA, STATES AND TERRITORIES
1966 TO 1971

CONTENTS

Table	Page
Explanatory notes	2
1. Population by single year of age, Males : Australia, 1966 to 1971	3,4
2. Population by single year of age, Females : Australia, 1966 to 1971	5,6
3. Population by single year of age, Persons : Australia, 1966 to 1971	7,8
4. Population by sex and age group : States and Territories, 30 June 1966	9
5. Population by sex and age group : States and Territories, 30 June 1967	10
6. Population by sex and age group : States and Territories, 30 June 1968	11
7. Population by sex and age group : States and Territories, 30 June 1969	12
8. Population by sex and age group : States and Territories, 30 June 1970	13
9. Population by sex and age group : States and Territories, 30 June 1971	14

EXPLANATORY NOTES

This bulletin contains revised estimates of the age distribution of population for the States and Territories of Australia as at 30 June 1967 to 30 June 1970, together with the estimated age distribution of populations at 30 June 1966 and 30 June 1971 (Census date). The revisions for years 1967 to 1970 take into account the results of the 1971 Census. The estimated age distribution of population for the States and Territories of Australia (by single age and sex) at 30 June 1972 is contained in an earlier issue of this bulletin.

2. Figures given for Census dates represent the enumerated population at each age, for each sex, adjusted for age mis-reporting and, for some ages, significant under-enumeration. The mis-reporting of age at the Census is typically confined to neighbouring ages, e.g., rounding to the next highest age or reducing the real age by one year, especially for ages in the vicinity of 30, 40, 50 and 60. In adjusting for such age mis-reporting the recorded population at each age is compared with the number of births recorded for the corresponding birth year, allowance being made for migration. When comparing the "net survival" of the births for different years, significant age mis-reporting is taken to be evident where large compensating irregularities appear in neighbouring 'survivor' ratios. Adjustments are then made by adding to or subtracting from the numbers at the appropriate ages, based on smoothed ratios obtained by taking a moving average of ratios.

3. While no adjustments have been made to total (all ages) populations to correct an overall under-enumeration of population at the Census, adjustments were made to some ages where it is suspected that the smallness of the unadjusted figure was due to under-enumeration rather than to age mis-reporting. Substantial under-enumeration is suspected at ages 0 and 1, particularly age 0. Adjustments to the recorded populations at these ages are effected after comparing the Census figures with the records of births occurring during the two twelve month periods up to the date of the Census, and making an allowance for recorded infant deaths and net migration. Appropriate adjustments to other ages have been made so that the sum of the adjusted age estimates agrees with the total recorded population.

4. Because of the adjustments the age figures given in this bulletin for Census dates do not agree with the figures shown for corresponding dates in Census bulletins. In addition, figures shown for 30 June 1966 include Aborigines, whereas figures in the 1966 Census reports exclude full-blood Aborigines.

5. Two groups of tables are included in this publication. The first three tables show the population of Australia by sex and single year of age at 30 June 1966 and 30 June 1971 (Census dates) and at 30 June for the years 1967 to 1970. The second group of tables shows estimates of the populations of States and Territories of Australia by sex and five-year age group for the same dates. Single year of age estimates for the States and Territories are available on request.

6. The revised estimates of age distributions are shown in the following tables in units without being rounded. It is to be understood that accuracy down to the unit is not claimed and should not be assumed.

TABLE I. - POPULATION BY SINGLE YEAR OF AGE, MALES : AUSTRALIA,
1966 TO 1971

Age last birthday	Population as at 30 June					
	1966 (a)	1967	1968	1969	1970	1971 (a)
