**JUNE QUARTER 1987
AND 1986-87**

CATALOGUE NO. 9211.0

Australian Bureau of Statistics

For Information

FINAL ISSUE: ABS PUBLICATION 'SHIPPING AND CARGO, AUSTRALIA' (9211.0)

The June Quarter 1987 edition of this publication, which includes annual statistics for the 1986-87 financial year, will be the last in this series.

A related ABS publication *Shipping and Air Cargo Commodity Statistics, Australia* (9206.0), which shows shipping aggregates as well as commodity details of overseas cargo loaded and discharged in Australia, already provides measures of overseas cargo movements. Commencing with September Quarter 1987 data, overseas container movement and vessel movement statistics from 9211.0 will be incorporated in 9206.0. As a result all the measures of shipping and cargo currently published in 9211.0 (with the exception of revenue tonnes for non-containerised cargo) will be available in 9206.0.

In addition, a new quarterly publication showing preliminary statistics of overseas container cargo movements (Catalogue No. 9217.0) will commence for September Quarter 1987 data and will become available approximately 3 months after the end of each quarter.

A copy of the first issue of 9217.0 will be forwarded to you free of charge, with an order form for subscription to that publication and the revised 9206.0 if you wish to receive them on a continuing basis.

Enquiries regarding the data in these publications or the range of unpublished shipping statistics available should be directed to Information Services in any ABS office.

MAIN FEATURES

The revenue tonnage of cargo loaded in the June quarter 1987 (61.4m tonnes) increased by 11.5% compared with the March quarter 1987 (55.1m tonnes). However, larger increases were recorded in Port Walcott, 52.6% (from 2.7m to 4.1m tonnes); Port Hedland, 30.4% (from 6.6m to 8.6m tonnes); Newcastle, 26.7% (from 6.8m to 8.6m tonnes); and Hay Point, 24.8% (from 7.0m to 8.8m tonnes).

The revenue tonnage of cargo discharged in the June quarter 1987 (6.3m tonnes) decreased by 1.4% compared with the March quarter 1987 (6.4m tonnes).

The revenue tonnage of cargo loaded for 1986-87 (234.8m tonnes) decreased by 1.1% compared with 1985-86 (237.4m tonnes). Bulk carriers accounted for almost 93% of total cargo loaded in 1986-87.

The revenue tonnage of cargo discharged for 1986-87 (26.8m tonnes) decreased by 2.8% compared with 1985-86 (27.6m tonnes). Although the total decreased, the revenue tonnage discharged by tankers increased from 8.4m tonnes in 1985-86 to 10.8m tonnes in 1986-87. Tankers accounted for over 40% of total cargo discharged in 1986-87, compared with 30% of the total in the previous year.

In 1986-87, the major trading areas for Australian exports measured in revenue tonnes, with percentages for the previous year in brackets were Japan and North Asia, 49.3% (53.2%); Europe-Atlantic, 14.0% (11.7%), and East Asia, 12.6% (11.7%). For Australian imports, measured in revenue tonnes, the major trading areas were Middle East Gulf, 19.8% (14.6%), Japan and North Asia, 16.6% (22.3%), and South East Asia 15.9% (12.2%).

During 1986-87 container cargo comprised 23.1% of inward and 2.5% of outward revenue tonnage, compared to 28.5% and 2.5% respectively for the previous year. Total inward container cargo for 1986-87 decreased by 21.3% (from 7.9m to 6.2m revenue tonnes) over the previous year, while total outward container cargo increased by 1.7% (from 5.9m to 6.0m revenue tonnes).

EXPLANATORY NOTES

Introduction

This publication contains quarterly and annual overseas shipping and cargo statistics. The statistics are compiled by the ABS from statistical returns (B380/381) provided by shipping companies or their representatives to the Australian Customs Service at each port in Australia.

2. In addition to this publication, the ABS prepares microfiche tabulations which present more detailed statistics and magnetic tape which enables purchasers to undertake specialised analyses. For more information on unpublished statistics see paragraph 22 below.

Scope of the statistics

3. The statistics in this publication relate to ships calling at or departing from Australian ports for the purpose of carrying cargo from or to overseas ports. Details are not therefore included for the following:

- (a) naval ships;
- (b) yachts and other craft used for pleasure;
- (c) foreign fishing ships visiting Australian ports for purposes other than the loading or discharge of cargo;
- (d) geophysical, oceanographic research and seismic survey ships;
- (e) offshore oil drilling rigs and related service ships;
- (f) Australian registered fishing ships operating from Australian ports; and
- (g) all ships of 200 registered net tonnes and under.

Coverage

4. Shippers or their agents are required to submit details of each arrival or departure at an Australian port of a ship involved in the carriage of cargo between Australia and overseas, whether or not overseas cargo is discharged or loaded.

Units of quantity

5. Cargo statistics are recorded in both 'revenue tonnes' and in 'gross weight' tonnes.

(a) A *revenue tonne* is the unit of quantity predominantly used in the shipping industry. It is the basis on which freight is charged and may be measured by mass (tonnes) or volume (cubic metres). Revenue tonnes statistics are consequently a mix of mass and volume units and should be used with care.

(b) *Gross weight* is the total weight in tonnes of cargo, excluding the weight of containers, irrespective of the basis on which freight is charged.

6. This publication also contains statistics on *deadweight tonnage*, which is the total weight in tonnes of cargo, stores, fuel, passengers and crew carried by the ship when loaded to its maximum summer loadline.

Ship characteristics

7. *Ship Recording*. Ship statistics in this publication are recorded as 'Ship Number' in Tables 3, 13, 14, 24 and 25, and 'Ship Calls' in Tables 9 and 20. 'Ship Number' is the number of direct arrivals from overseas or departures from Australia. 'Ship Calls' is the number of port visits made to Australian ports by ships engaged in overseas voyages. For example, a ship which arrives direct from overseas in Brisbane, and makes a further call in Sydney before departing for an overseas port from Melbourne, is counted once under 'Ship Number' for both arrivals (Brisbane) and departures (Melbourne), and as 1 arrival call and 1 departure call for each of the three ports.

8. In Tables 3, 13, 14, 24 and 25 statistics of cargo loaded and discharged appear side by side with statistics of ship arrivals and departures. These statistics should not be linked as the cargo details do not necessarily relate to the ships in the tables. Cargo may, for example, have been loaded onto a ship which was still in an Australian port, i.e. had not departed for overseas, at the end of the period. Alternatively a ship may depart in one period with cargo loaded in an earlier period.

9. *Ship Type*. All ships are classified from Lloyd's Register of Shipping according to one of 11 ship types in terms of their structure or design. For the purposes of the tables in this publication, these 11 ship types are amalgamated into four broad categories as follows:

Category	Ship types
(a) General cargo ships	Container ships Conventional cargo ships Roll-on Roll-off ships Other cargo ships
(b) Tankers	Gas carriers Liquid tankers
(c) Bulk carriers	Dry bulk carriers Dry/wet bulk carriers
(d) Other ships	Multi-purpose ships Passenger ships Other ships

10. It should be noted that this classification was implemented with the September quarter 1983 publication. Although differences between the new and old classifications are minor, care should be taken when comparing statistics for earlier periods with those released in the September 1983 and subsequent quarterly publication.

11. *Type of Service.* Ships are also classified according to the type of service they provide. Types of service for which statistics are shown in this publication are:

- (a) *Liner service*, which relates specifically to a ship which is operated by a carrier providing services on a specified route on a relatively regular basis; and
- (b) *Other service*, which refers to all ships operating in other than a liner service.

12. *Liner Service* is further classified by *Conference and Non-Conference*. A 'Conference' is an association of ship owners which regulates the freight rates and terms and conditions of carriage of goods in any particular trade. Conference agreements exist only in respect of liner services and normally include provisions for sharing the trade, rationalising sailing schedules, and pooling arrangements for resources and/or revenue.

13. Type of service and conference status have been allocated to ships by the ABS from information supplied by the Department of Transport and Communication.

14. *Country of Registration* or flag of the ship, refers to the country in which the ship is registered according to *Lloyd's Register of Shipping*.

15. *Container Cargo.* Statistics of container cargo shown in this publication refer to cargo shipped in both standard international containers (20 ft. (6.1m) and 40 ft. (12.2m)) and non-standard international containers. To provide a standard measure, all container statistics are expressed in terms of 20 ft. (6.1m) units. Therefore, a 40 ft. (12.2m) container is recorded as two twenty-foot equivalent units (or TEU's).

16. *Ships with Cargo or in Ballast.* Ships with cargo are those ships which arrived at or departed from an Australian port carrying overseas cargo. This includes ships which carried overseas cargo that was not loaded or unloaded at the port. Ships in ballast are those ships which arrived at or departed from an Australian port without cargo.

Trade area

17. Ports at which ships load or discharge cargo are allocated to their respective countries, which are in turn allocated to trade areas in accordance with the Classification of Trade Areas for Cargo Statistics (see Appendix 1 at the end of this publication). For example, Santiago is allocated to Chile which is included in the trade area 'South America-West Coast' for the purpose of this publication.

18. It should be noted that a revised trade area classification was implemented with the September quarter and December quarter 1984 publication. Care should therefore be taken when comparing trade area statistics for earlier periods with those published using the revised trade area classification.

Confidential data

19. In some instances statistics for a particular port (Australian or overseas) or trade area are confidential. In such circumstances statistics are released only as aggregates for combined Trade areas, or port groups and are presented as 'Trade Area Not Available' and 'Port Not Available'. (Port to port routes affected by confidentiality action are generally the same from quarter to quarter and are shown in Appendix 2.) Trade areas affected by confidentiality action vary between quarters and therefore are not separately listed.

20. Further information regarding the treatment of confidential data is contained in the ABS information paper *Confidentiality and the Release of Foreign Trade and Shipping Statistics* (5486.0).

Revisions to previous figures

21. Although the documents from which the statistics in this publication are compiled are normally submitted to the Australian Customs Service at the same time as ships arrive or depart, some delays do occur in the lodgement of the documents or in their transmission to the ABS. In order to release relatively timely statistics, therefore, data is published with a small number of forms still outstanding. Consequently the statistics for a particular quarter when first released will suffer from some undercoverage and will be updated in ensuing publications by information contained in late returns. In addition, revisions to individual items of data may cause some changes in aggregates for particular periods.

Unpublished shipping statistics

22. Not all shipping statistics compiled by ABS and available to users appear in this publication. For information about these additional statistics please ring Information Services—Canberra (062) 52 6627, 52 5402, 52 6007 or ABS State offices.

23. Details of shipping statistics produced on microfiche and magnetic tape are also available in the ABS publications *Foreign Trade and Shipping Statistics: Microfiche Service* (5483.0) and *Foreign Trade and Shipping Statistics: Magnetic Tape Service* (5484.0).

Related publications

24. Other ABS publications which may be of interest include:

Information Paper: Overseas Shipping and Air Cargo: an Overview (9252.0)

Shipping and Air Cargo Commodity Statistics, Australia (9206.0)

25. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.
