EXPLANATORY NOTES

This publication provides statistics of overseas arrivals and departures during the quarter and year ended December 1971. June and December issues contain a section showing the following demographic characteristics : age, marital status and country of birth.

2. Statistics of overseas movement are also published monthly, in less detail, in "Overseas Arrivals and Departures" (Reference No. 4.3).

3. The statistics of overseas arrivals and departures exclude passengers passing through Australia on board the same ship or on the same flight (variously called direct transit passengers or "through" passengers), passengers on short pleasure sea cruises in the south-west Pacific commencing and finishing in Australia on ships not then engaged in regular voyages, and all air crew and ships' crew. A summary table of direct transit sea and air passengers and pleasure cruise sea passengers is shown in the Appendix.

4. The classification into permanent, long-term and short-term is based on information provided by the traveller on arrival in or departure from Australia. THESE STATEMENTS REPRESENT THE TRAVELLERS' INTENTIONS AT THE TIME. TRAVELLERS MAY SUBSEQUENTLY CHANGE THEIR INTENTIONS AND THIS MUST BE BORNE IN MIND IN INTERPRETING THE STATISTICS.

5. Permanent movement consists of persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad. Settlers are persons who, on arrival in Australia, indicated that they came intending to settle. Former settlers are persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more, and were now departing permanently.

6. Long-term movement (which is distinct from permanent movement) consists of the arrival of visitors and the departure of residents with the stated intention of staying (in Australia or in a country abroad, respectively) for twelve months or more, and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad, respectively) for twelve months or more.

7. Short-term movement consists of all other arrivals and departures, including those of Australian troops irrespective of period of stay, and U.S. troops visiting Australia on rest and recreation leave. U.S. troops on rest and recreation leave have been classified, for statistical purposes, as short-term visitors travelling to and from Australia by air for holiday purposes, and staying in Australia less than one week and whose country of residence and of embarkation/disembarkation is "Asia-other".

8. Visitors arriving and residents departing whether classified as long-term or short-term are further classified according to their stated purpose of journey, the categories being : for visitors, "in transit", "business", "holiday", "education" and "other purposes"; and for residents, "business", "holiday", "education" and "other purposes". "In transit" visitors include those who show "in transit" as their stated purpose of journey to Australia provided that their intended length of stay in Australia does not exceed one month.

9. Seasonally adjusted figures are shown for total arrivals and departures (Table 2) and for short-term visitors arriving and short-term residents departing (Table 12), for the last fifteen months. In the adjustments, account is taken of "trading day" effects as well as normal seasonal factors. The influence of Easter, which may affect different months from year to year, is taken into account only in adjusting total arrivals. Details of the methods used and selected measures of variability are available on request and were published in "Seasonally Adjusted Indicators, 1971" (Reference No. 1.10).

10. Statistics of overseas arrivals and departures are compiled from incoming and outgoing passenger cards, which are collected from all travellers under the Migration Act 1958-1966 and which are supplied to the Bureau by the Department of Immigration for the purpose of compiling these statistics. From April 1971, statistics of characteristics of short-term travellers only have been estimated from a fifty per cent sample of cards classified as short term movement.

11. Since cards are received from all passengers, and are processed in groups for each ship or aircraft, the total number of short-term travellers and their mode of transport is fully known. Statistics of the following characteristics of short-term travellers are affected by sampling: country of embarkation or disembarkation, country of residence, country of birth, nationality, state of embarkation or disembarkation, state of residence, age, sex, marital status, occupation, stated purpose of journey and actual or intended length of stay.

12. Statistics based on a sample may differ from those that would be obtained by complete processing, and a measure of this difference is given by the standard error. There are about 2 chances in 3 that the difference will be less than 1 standard error, and 19 chances in 20 that it will be less than 2 standard errors. The standard error varies with the size of the estimate and the following table shows the standard errors of various estimate sizes, assuming a 50 per cent sample.

Size of quantity estimated (persons)	Approximate standard error of estimate	
	Persons	Per cent of estimate
10,000	100	1.0
5,000	70	1.4
1,000	32	3.2
500	23	4.5
300	17	5.7
100	10	10.0
50	7	14.0
25	5	20.0
10	3	32.0
6	3	40.0
2	2	70.0

13. Statistics of permanent and long-term movement are based on records of all permanent and long-term travellers and therefore do not contain sampling errors. However, since short-term movement is a component of total movement, statistics of characteristics of travellers in total movement are subject to such errors. The magnitude of standard errors in total movement is about 20 per cent less than in short-term movement.

14. The imprecision due to sampling errors should not be confused with errors that might occur because of imperfections in reporting. Inaccuracies of this kind are referred to as non-sampling errors and can occur in any enumeration, whether a sample or not, and therefore will not be altered by the introduction of sampling techniques. Every effort is made to reduce such errors to a minimum through careful design of checking procedures and questions asked on the passenger cards.

TABLE 10. - OVERSEAS ARRIVALS AND DEPARTURES : PERMANENT MOVEMENT

(i) Settlers arriving by State or Territory of intended residence

Settlers are asked, on or before arrival, the State or Territory of Australia in which they next intend to stay for twelve months or more. THE STATEMENTS REPRESENT THE SETTLERS' INTENTIONS AT THE TIME. MANY TRAVELLERS SUBSEQUENTLY CHANGE THEIR INTENTIONS AND THIS MUST BE BORNE IN MIND IN INTERPRETING THE STATISTICS. The allocation to States and Territories in the table is based on these statements, except that settlers proceeding to the migrant reception centre, Bonegilla, Victoria, are allocated, as far as is practicable, to the State or Territory of their placement from the centre.
