NOTE. (i) This Bulletin is published in two parts :
Part 1 - Exports (Reference No. 8.9) and Part
2 - Imports (Reference No. 8.10).

(ii) Figures for 1971-72 are preliminary and subject
to revision.

EXPLANATORY NOTESBASIC DOCUMENTS

The overseas trade statistics published in this bulletin have been compiled by the Commonwealth Bureau of Census and Statistics from copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise as required by the Customs Act. The entries show the port of shipment and country of consignment for exports and port of entry and country of origin for imports, the date, the description, quantity (where required) and value (f.o.b.) of the goods. The export statistical item number is inserted by the exporter or his agent. The importer or his agent is required to insert the Tariff Item number under which the goods are admitted and the Statistical Key code. These are verified by officers of the Department of Customs and Excise in the local offices of the Collector of Customs.

PERIOD COVERED BY STATISTICS

2. Exports and imports are recorded statistically in the month in which entries are passed by the Department of Customs and Excise. Normally this is within a few days of loading or discharge of cargoes although delays sometimes occur in the lodging of entries. The statistical month for Customs outputs (generally ports other than those at which the main Customs office in each state is located) closes on the 21st of each month.

VALUATION

3. Exports sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent to the actual price paid to the exporter. Exports shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale.

4. The recorded value of imports is the "value for duty" as laid down for customs purposes, i.e. the f.o.b. port of shipment equivalent of the actual price paid by the importer plus any special deduction, or of the current domestic value in the exporting country, whichever is the higher. (See paragraph (8) of this note.) All values are recorded in Australian currency.

STATISTICAL CONCEPTS OF TRADETrade system

5. The statistics of exports and imports presented in this bulletin are recorded on a "General trade" basis, i.e. export figures include both Australian produce and re-exports, while imports comprise goods entered directly for domestic consumption together with goods imported into Customs warehouses. However, Table 3 of Part 2 of this bulletin shows statistics of

imports on a "Special trade" basis, i.e. cleared for home consumption. Export figures exclude exports of ships' stores and aircraft stores, separate details for which are shown in Table 8 of Part 1 of this Bulletin. Import figures include defence equipment imported by the Australian Services. These imports are normally classified according to the commodity imported, e.g. warships are classified under "ships and boats"

NOTE.

"Australian Produce" is defined as goods, materials, or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

"Re-exports" are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported, and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged.

Minor operations include blending, packaging, bottling, cleaning, sorting, husking and shelling.

"Imports cleared for home consumption" differ from imports in scope in that they include withdrawals from bonded warehouses but exclude imports into bonded warehouses.

Merchandise and non-merchandise trade

6. Total trade is divided into merchandise and non-merchandise in accordance with international standards recommended by the United Nations. Merchandise trade is the equivalent of total exports or imports less certain items specified as non-merchandise. A complete description of these commodities is contained in the Australian Export and Import Commodity Classifications published by the Bureau of Census and Statistics.

EXCESS OF EXPORTS OR IMPORTS

7. In this bulletin the excess of the value of exports or imports is shown for merchandise plus non-merchandise trade in Table 1 and for merchandise trade only in Table 2. The excess of exports or imports does not, on either of these bases, represent the balance of trade. The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis. (See paragraph (8).)

BALANCE OF TRADE

8. Statistics of the balance of trade for balance of payments purposes are derived by making certain adjustments, relating both to scope and valuation, to statistics of merchandise exports and imports. Statistics on the adjusted basis are published in statistical bulletins relating to the balance of payments. The adjustments include the following: Imports are adjusted for

the overall excess of recorded value for duty over the actual selling price to the importer; exports and imports of goods for repair and return and the value of repairs are deducted from merchandise trade; exports and imports of ships and aircraft for use on overseas routes; certain imports of defence equipment; and other trade items for which customs entries are not required are added. Adjustments are also made for timing differences between the change of ownership and the lodgment of imports entries, in the case of certain large items of equipment (e.g. warships).

BALANCE OF PAYMENTS

9. Estimates of the balance of trade do not measure Australia's total balance of payments which include other transactions such as freight and insurance charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profits and interest, and private and government borrowing overseas. Estimates of these transactions will be found in statistical bulletins relating to balance of payments.

COUNTRY OF CONSIGNMENT OR ORIGIN

10. "Country of consignment" referred to in export tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported "For orders".

11. "Country of origin" referred to in import tables means the country of production of goods imported.

COMMODITY CLASSIFICATIONS

12. From July 1965 imports have been classified according to the Australian Import Commodity Classification (A.I.C.C.) and from July 1966 exports according to the Australian Export Commodity Classification (A.E.C.C.). Both these classifications are based on the Standard International Trade Classification, Revised (S.I.T.C.). Copies of the A.I.C.C. or A.E.C.C., or extracts from them, can be obtained from offices of the Bureau in Canberra and in each capital city. There is a difference in treatment between the two classifications in that, outside packages are included as a separate item in the tabulation of imports (in Section 9A) but in exports the value recorded for each item includes the value of the outside package.

TREATMENT OF AMENDMENTS

13. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this Bulletin. For this reason, monthly figures published in all issues for the current financial year-to-date will not necessarily add to the year-to-date figures shown in this issue.

ROUNDING

14. Any discrepancies between totals and sums of components in tables are due to rounding.

SPECIAL PERIODICAL RETURNS SYSTEM

15. A subscription service is available on application to this Bureau to provide for the particular detailed requirements of individual users of overseas trade statistics. These special periodical returns show trade according to items of the Australian Export and Import Commodity Classifications or the statistical key code dissections of Australian Customs Tariff items and are obtainable monthly or quarterly. A nominal charge is made which varies depending on the amount of detail required.

SEASONAL ADJUSTMENT

16. Original and seasonally adjusted statistics of exports and imports are shown in Table 1 on page 6. In the seasonal adjustment, account has been taken not only of normal seasonal factors, but, additionally, of "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc., in the month) and the influence of Easter which may, in successive years, affect figures for different months. Details of the methods used in seasonally adjusting these and other series are given in "Seasonally Adjusted Indicators - 1971" (Reference No. 4.10), issued on 2 July 1971. These series are subject to large irregular influences which are not removed by seasonal adjustment and may also be affected by changes in the composition of exports. For these reasons, particular care should be exercised in interpreting month-to-month movements.
