PRODUCTION STATISTICS : DECEMBER 1973 EXPLANATORY NOTES

This bulletin contains statistics of production in Australia of mines and factory products and electricity and gas. An alphabetical index of these products is given on pages 2 to 5.

2. The following details are shown for each product :

- (a) Annual totals for the latest three complete financial years;
- (b) Monthly details for each of the latest fourteen months;
- (c) Cumulative totals from July 1973 to date;
- (d) Cumulative totals for the corresponding period twelve months earlier.

3. The monthly figures are based for the most part on returns collected by the Australian Bureau of Statistics in each State. Where another authority is the source, this is shown in a footnote. The figures for 1971-72 are derived from the Annual Manufacturing Census. All other annual figures are derived from the recorded monthly production and are subject to revision. In a small number of cases returns are accepted from factories for a year other than the normal financial year ending in June.

4. The commodity production data contained in this bulletin were collected from those establishments classified to division C (Manufacturing) as defined in the *Australian Standard Industrial Classification, Preliminary Edition* 1969, Vol. 1, and from those mining, retail and wholesale establishments with sales and transfers out of goods of own manufacture in excess of \$10,000.

5. Further details in respect of many of the items will be found on an annual basis in the bulletin *Manufacturing Commodities - Principal Articles Produced* (Reference No. 12.26) and on a monthly basis, in the *Monthly Production Summaries* (Reference No. 12.16), issued by this Bureau.

6. The bulletin contains seasonally adjusted statistics of several items. In the seasonal adjustment, account has been taken not only of normal seasonal factors but also of "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of Easter and Australia Day which may, in successive years, affect figures for different months. Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1973* (Reference No. 1.10).

7. Most items are identified by Commodity Codes which are derived from the Commodity Classification used in the Australian Manufacturing Statistics. In some cases where data is derived from sources other than Factory Collections, no Commodity Code is shown.

Symbols and abbreviations used in this bulletin

- n.a. Not available
- ... Nil or less than half of the final digit shown
- Break in continuity of series (where drawn across a column)

NOTE. 1. Any discrepancies between totals and sums of components in tables are due to rounding.
2. A blank space in a column of figures means that the figure concerned is not yet available.

(a) Year ended 31 May for all items except iron ore pellets. (b) Primary origin only. Except for gold, non-ferrous refined metal production data are collected by the Bureau of Mineral Resources. (c) Gross wet weight. (d) Includes recovery from scrap and continuous cast billets. (e) See paragraph 6 page 1, Explanatory Notes. (f) Includes lead content of lead alloys from primary sources but excludes lead-silver bullion. (g) Estimated total electricity generated by public utilities, factories generating for their own use, and factories supplying electricity for domestic and other consumption. (h) Includes natural gas.

(a) Excludes hollow rods and bars. (b) Includes aluminium alloys and lead alloys and tin coated lead. Circles, slugs, calots, etc. stamped from purchased or imported strip or sheet are not included. Where stamped from sheet or strip produced in own works, the weight of metal included is that of the circles, etc. and not the weight of the sheet or strip from which they are stamped. (c) Drawn from rod (excluding re-drawn). (d) Weight of copper content only. (e) Code numbers 451.21, 29; 452.12, 42; 453.20. (f) Includes those made and incorporated in own products. Excludes audio, input R.F. and higher frequencies types and automotive coils. (g) Total weight. (h) Weight of aluminium content only. (i) Includes those for electrical welding equipment.
