Volume 1 (1988)

### Volume 20, Number 1, January 2007

M.L. Santos, D.C. Pereira, and A.P.S. Neves

On a von Kármán plate system with free boundary and boundary conditions of memory type

Zhaoxia Liu and Pigong Han

On a class of critical heat equations with an inverse square potential

D.D. Hai

 Positive solutions for a class of singular semipositone  $p$ -Laplacian problems

Serguei Samborski

Extensions of first-order partial differential expressions and viscosity solutions of Hamilton-Jacobi equations

Khalid Adriouch and Abdallah El Hamidi

On local compactness in quasilinear elliptic problems

Satoshi Tanaka

On the uniqueness of solutions with prescribed numbers of zeros for a two-point boundary value problem

Kanishka Perera and Elves A.B. Silva

 On singular  $p$ -Laplacian problems

### Volume 20, Number 2, February 2007

Qinian Jin

Local Hessian estimates for some conformally invariant fully nonlinear equations with boundary conditions

Yoshie Sugiyama

Time global existence and asymptotic behavior of solutions to degenerate quasi-linear parabolic systems of chemotaxis

Rita Cavazzoni

On the stability of periodic solutions of multi-dimensional models

Pierre Magal and Shigui Ruan

 On integrated semigroups and age structured models in  $L^p$  spaces

### Volume 20, Number 3, March 2007

Yoshihiro Shibata and Senjo Shimizu

On a free boundary problem for the Navier-Stokes equations

Jack Schaeffer

Large-time behavior of a one-dimensional monocharged plasma

Nikos I. Kavallaris and Takashi Suzuki

On the finite-time blow-up of a non-local parabolic equation describing chemotaxis

Siegfried Carl and Dumitru Motreanu

 Constant-sign and sign-changing solutions of a nonlinear eigenvalue problem involving the  $p$ -Laplacian

Fabrice Bethuel and Didier Smets

A remark on the Cauchy Problem for the 2D Gross-Pitaevskii equation with nonzero degree at infinity

Laura Angeloni and Gianluca Vinti

Approximation by means of nonlinear integral operators in the space of functions with bounded  $\varphi$ -variation

### Volume 20, Number 4, April 2007

A. Dall'Aglio, D. Giachetti, and S. Segura de León

Nonlinear parabolic problems with a very general quadratic gradient term

Nicolas Saintier

Schauder estimates for degenerate elliptic and parabolic equations in  $\mathbb{R}^N$  with Lipschitz drift

Friedemann Brock and Raul Manásevich

On the Rayleigh quotient and the first eigenvalue for some vector-valued variational problems

Giovambattista Amendola and Mauro Fabrizio

Maximum recoverable work for incompressible viscoelastic fluids and application to a discrete spectrum model

Alessia Ascanelli

The Cauchy problem for a weakly hyperbolic equation with unbounded and non-Lipschitz-continuous coefficients

### Volume 20, Number 5, May 2007

Utpal Manna and S.S. Sritharan

Lyapunov functionals and local dissipativity for the vorticity equation in  $L^p$  and Besov spaces

E.C.M. Crooks and C. Mascia

Front speeds in the vanishing diffusion limit for reaction-diffusion-convection equations

Peter Howard

Nonlinear stability of degenerate shock profiles

Tonia Ricciardi

Mountain-pass solutions for a mean field equation from two-dimensional turbulence

Tomomitsu Teramoto and Hiroyuki Usami

Oscillation theorems of quasilinear elliptic equations with arbitrary nonlinearities

### Volume 20, Number 6, June 2007

A.V. Faminskii

Global Well-posedness of two initial-boundary-value problems for the Korteweg-de Vries equation

Changxing Miao and Guixiang Xu

Low regularity global well-posedness for the Klein-Gordon-Schrödinger system with the higher-order Yukawa coupling

Nicolas Landais

Hölder continuity in a shape-optimization problem with perimeter

Marek Fila and Noriko Mizoguchi

Multiple continuation beyond blow-up

D. Bahuguna, D.N. Pandey, and A. Ujlayan

Second-order integrodifferential equation with nonautonomous operators

Alfredo Lorenzi and Francesca Messina

Approximation of solutions to non-linear integrodifferential parabolic equations in  $L^p$ -spaces

### Volume 20, Number 7, July 2007

Matthias Hieber and Ian Wood

The Dirichlet problem in convex bounded domains for operators in non-divergence form with  $L^\infty$ -coefficients

Kunio Hidano  
Morawetz-Strichartz estimates for spherically symmetric solutions to wave equations and applications to semilinear Cauchy problems

M. Abounouh, A. Atlas, and O. Goubet  
Large-time behavior of solutions to a dissipative Boussinesq system

Piotr Bogusław Mucha  
On weak solutions to the Stefan problem with Gibbs-Thomson correction

El Hadi Ait Dads, Philippe Cieutat, and Lahcen Lhachimi  
Structure of the set of bounded solutions and existence of pseudo almost-periodic solutions of a Liénard equation

Ibtissame Zaiter  
Remarks on the Ostrovsky equation

### **Volume 20, Number 8, August 2007**

John P. Albert, Jerry L. Bona, and Nghiem V. Nguyen  
On the stability of  $KdV$  multi-solitons

Daniele Del Santo, Tamotu Kinoshita, and Michael Reissig  
Energy estimates for strictly hyperbolic equations with low regularity in coefficients

Thierry Gallay and Emmanuel Risler  
A variational proof of global stability for bistable travelling waves

R. Shivaji and Jinglong Ye  
Nonexistence results for classes of elliptic systems

Kazuhiro Takimoto  
Radó type removability result for fully nonlinear equations

### **Volume 20, Number 9, September 2007**

Davide Guidetti  
Convergence to a stationary state for solutions to parabolic inverse problems of reconstruction of convolution kernels

Giuseppe Buttazzo, Guillaume Carlier, and Myriam Comte  
On the selection of maximal Cheeger sets

Boumediene Abdellaoui, Lucio Boccardo, Irene Peral, and Ana Primo  
Quasilinear elliptic equations with natural growth

Michinori Ishiwata  
On bounds for global solutions of semilinear parabolic equations with critical and subcritical Sobolev exponent

Chokri Abdelkefi, Bechir Amri, and Mohamed Sifi  
Pseudo-differential operator associated with the Dunkl operator

Christoph Walker  
Global well-posedness of a haptotaxis model with spatial and age structure

Shingo Takeuchi  
Coincidence sets in semilinear elliptic problems of logistic type

### **Volume 20, Number 10, October 2007**

Mariella Cecchi, Zuzana Dosla, Ivan Kiguradze, and Mauro Marini  
On nonnegative solutions of singular boundary-value problems for Emden--Fowler-type differential systems

Jaime Angulo Pava and Roger Peres de Moura  
Ill-posedness and the nonexistence of standing-waves solutions for the nonlocal nonlinear Schrödinger equation

M. Ghimenti and A.M. Micheletti  
Solutions for a nonhomogeneous nonlinear Schrödinger equation with double power nonlinearity

James McCoy  
Bernstein properties of solutions to some higher-order equations

Guy Katriel  
Existence, uniqueness and multiplicity of rotating fluxon waves in annular Josephson junctions

Yasuhiro Fujita and Kazuya Uchiyama  
Asymptotic solutions with slow convergence rate of Hamilton-Jacobi equations in Euclidean  $\mathbb{R}^n$  space

### **Volume 20, Number 11, November 2007**

Messoud A. Efendiev and Mitsuharu Otani  
Infinite-dimensional attractors for evolution equations with  $p$ -Laplacian and their Kolmogorov entropy

Mayte Pérez-Llanos and Julio D. Rossi  
Nontrivial compact blow-up sets of lower dimension in a half-space

Axel Grünrock, Mahendra Panthee, and Jorge Drumond Silva  
A remark on global well-posedness below  $L^2$  for the gKdV-3 equation

Michinori Ishiwata  
Multiple solutions for semilinear elliptic systems involving critical Sobolev exponent

Matthias Hieber, Luca Lorenzi, and Abdelaziz Rhandi  
Second-order parabolic equations with unbounded coefficients in exterior domains

Wengu Chen, Junfeng Li, and Changxing Miao  
On the well-posedness of the Cauchy problem for dissipative modified Korteweg--de Vries equations

Peter Lindqvist and Juan J. Manfredi  
Viscosity supersolutions of the evolutionary  $p$ -Laplace equation

### **Volume 20, Number 12, December 2007**

Yutaka Aoyagi, Kimitoshi Tsutaya, and Yusuke Yamauchi  
Global existence of solutions for a reaction-diffusion system

A. González N.  
The Cauchy problem for Benney--Luke and generalized Benney--Luke equations

Elena I. Kaikina  
Large time asymptotics for the Ott-Sudan-Ostrovskiy type equations on a segment

Emmanuel Chasseigne  
The Dirichlet problem for some nonlocal diffusion equations

T. Godoy, U. Kaufmann, and S. Paczka  
A formula for principal eigenvalues of Dirichlet periodic parabolic problems with indefinite weight

Mythily Ramaswamy, R. Shivaji, and Jinglong Ye  
Positive solutions for a class of infinite semipositone problems
