

SIZE CLASSIFICATION OF RURAL HOLDINGS 1955-56

BULLETIN NO. 1 - NEW SOUTH WALES

PREFACE

Bulletins similar to this are in course of preparation for each State of Australia and for the Commonwealth as a whole. They present details of a series of special tabulations showing the classification by size of the principal characteristics of rural holdings. The special tabulations were undertaken for 1955-56 in collaboration with State Statisticians. Crop areas shown in this Bulletin relate to the 1955-56 season and livestock numbers are as at 31st March, 1956.

Basically the tabulations included in the series are similar to those undertaken for 1947-48 and 1949-50, details of which were published in Production Bulletin No. 42 and Primary Industries Bulletin No. 44 respectively. There has, however, been some extension of the scope in the 1955-56 series, a number of additional characteristics having been tabulated according to their size classification. Because of the increased volume of tabulations resulting, and in order to have the information published with the minimum of delay it has been decided to issue this series of bulletins instead of including full details as part of the bulletin, Primary Industries Part I, Rural Industries.

Although there are minor variations between States, a "rural holding" is defined briefly for the purposes of these statistics as a piece of land of 1 acre or more in extent used for the production of agricultural products or for the raising of livestock and the production of livestock products. In cases where land owners or occupiers possess or work more than one holding, separate returns are required for each except where the holdings are in close proximity and are worked as one, in which case one return only is submitted covering the two or more holdings concerned.

Livestock numbers shown in this Bulletin differ slightly from those for New South Wales appearing in other publications due to the exclusion of the relatively small numbers of livestock not on rural holdings. In other publications all livestock whether on or off rural holdings (as defined above) are included.

In addition, it should be noted that dairy cattle include only those in registered dairies. It was not possible to carry out these special tabulations on the same basis as for other States, that is, to include all dairy cattle whether or not in registered dairies. Dairy cattle excluded on this account numbered 177,501, a large proportion of these being in small herds kept for the purpose of supplying milk for farm household use.

The tabulations for New South Wales cover 77,855 rural holdings from which annual census returns of agricultural, pastoral and dairying activities were collected for the 1955-56 season.

S.R. CARVER
COMMONWEALTH STATISTICIAN
