EXPLANATORY NOTES

This publication contains monthly production statistics of selected commodities manufactured in New South Wales.

2. Data contained in this publication are based mainly on monthly collections conducted by the Australian Bureau of Statistics (ABS). Where another authority is the source this is indicated in the index.

3. Figures for the latest month shown are preliminary. Figures for periods later than June 1987 are subject to revision.

Scope and coverage

4. Manufacturing commodity statistics collected by the ABS exclude details relating to single establishment manufacturing enterprises with fewer than four persons employed; and production of establishments predominantly engaged in non-manufacturing activities but which may carry on, in a minor way, some manufacturing.

5. Annual figures shown in this publication are derived by aggregating monthly production and relate to production during the year ended 30 June.

Classification

6. Most items are identified by the commodity codes used in Australian manufacturing statistics. These codes appear in the index. For further information regarding them, see the ABS publication *Australian Standard Commodity Classification, Part 1: Introduction, Summary Classification and Commodity Keys* (1207.0).

Sydney Statistical Division

7. New South Wales is divided into a number of geographical areas. The primary division of the State is into 12 statistical divisions. The Sydney Statistical Division is predominantly urban in character and its boundary was re-delineated in 1976 to embrace the area expected to contain the urban development of Sydney (and associated smaller urban centres) for a period of at least twenty years.

Seasonal adjustment

8. This publication contains seasonally adjusted statistics of several items. Care should be exercised in interpreting the figures for those months in which Christmas/New Year and Easter holidays fall, as some manufacturers vary holiday shutdowns in the light of prevailing demand for their products. Details of the methods used in seasonally adjusting these and other series are available on request.

Related publications

9. The ABS releases a series of Production Bulletins (Catalogue Numbers 8357.0 to 8364.0) which contain production statistics for a wide range of commodities for Australia. The following publications may also be of interest:

Manufacturing Commodities: Selected Principal Articles Produced, Australia, 1984-85 Preliminary (8365.0)

Manufacturing Commodities: Principal Articles Produced, Australia, 1983-84 and 1984-85 (8303.0) (\$2.90)

10. A list of the complete range of publications available from the ABS can be obtained from any ABS Office. Access to a wide range of ABS statistics is also available through the VIATEL videotex system and on AUSSTATS, ABS' on-line service through CSIRONET. Further information about these services can be obtained from the Sydney ABS Information Service on (02) 268 4611, or from any ABS Office.

Symbols and other usages

n.p.	not available for publication (but included in totals where applicable)
n.y.a.	not yet available
r	revised since previous issue
SD	statistical division
"	not applicable
—	break in continuity of series (where a line is drawn between two consecutive figures in the same column)

Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown.

JOHN WILSON
Deputy Commonwealth Statistician

INDEX OF ITEMS PRODUCED

<i>Item (Commodity Code or Source)</i>	<i>Page</i>	<i>Item (Commodity Code or Source)</i>	<i>Page</i>
Aerated and carbonated waters (171.03, 07.08)	5	Ham and bacon (incl. canned)	5
Bacon and ham (incl. canned) (023.17-21)	5	Ice cream	5
Bricks, clay (471.91.93)	6	Meat and bone meals (156.15)	8
Butter (<i>Source</i> : Australian Dairy Corporation)	5	Milk, whole	5
Carbonated and aerated waters	5	Motors, electric (503.13-32)	7
Cheese (<i>Source</i> : Australian Dairy Corporation)	5	Non-abrasive synthetic detergents (other than for personal use) (806.14,16,32,34)	8
Chocolate confectionery	5	Ovens (domestic, electric)	6
