COMMONWEALTH PRODUCTION STATISTICS.

PREFACE.

The present Bulletin is the fourth which has been issued by this Bureau dealing with the Production Statistics of the Commonwealth, and contains particulars relative to I. Land Settlement; II. Agriculture; III. Pastoral Products; IV. Farmyard and Dairy Products; V. Mineral Products; VI. Forestry; VII. Fisheries; VIII. Manufacturing; IX. Value of Production; X. Bounties; XI. World's Gold Production; and XII. Statistical Summary.

In obtaining materials for this Bulletin an endeavour has been made to secure uniformity in the collection and compilation of the Production Statistics of the several States, and although such complete uniformity as is desirable in these matters has not always been practicable under existing arrangements, it is believed that a distinct advance in this direction has been made. Defective returns are still in evidence in certain States, but it is hoped that the efforts which are now being made to remedy these will render possible the issue on future occasions of complete results at an earlier date.

Tables showing the World's Gold Production for the ten years 1900 to 1909 have been inserted in continuation of the decennial tables which have appeared in the last two issues of this Bulletin. Tables relative to the bounties payable by the Commonwealth Government have also been included, as well as a summary of some of the leading agricultural and pastoral statistics for the past 50 years.

G. H. KNIBBS,
Commonwealth Statistician.
