EXPLANATORY NOTES

Introduction

This quarterly publication replaces the publications Outward Overseas Cargo, Australia (9206.0, annual) and Exports by Mode of Transport, Australia (5415.0, quarterly). Due to differences in concepts and definitions, statistics of outward cargo included in the three publications are not directly comparable. This publication also contains statistics of inward cargo.

Sources of data

2. The statistics have been compiled by the Australian Bureau of Statistics (ABS) from information contained in import and export documents submitted by importers and exporters or their agents to the Australian Customs Service as required by the Customs Act 1901.

3. In some tables data from import and export documents have been linked with information from Lloyd's Register of Shipping to produce cargo statistics classified by selected shipping characteristics. Table 6, for example, shows inward cargo by ship type. In other tables the data have been linked to type of service (liner/conference) information received from the Department of Transport (e.g. Table 8).

Scope of the statistics

4. Inward cargo statistics relate to cargo loaded overseas, discharged from ships and aircraft at Australian ports and in respect of which Customs import documents have been received by the ABS.

5. Similarly, outward cargo statistics relate to cargo loaded on ships and aircraft at Australian ports for discharge at overseas ports and in respect of which export documents have been received by the ABS.

6. The statistics include cargo shipped by sea and air on behalf of

both the private and government sectors and include Australian produce and re-exports of foreign produce.

7. The following shipments are excluded from the statistics:

- (a) goods imported and exported by parcel post;
- (b) direct transit trade i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (c) migrants' and passengers' effects, for which Customs documents are not required;
- (d) certain materials under inter-governmental agreements for defence and similar projects for which Customs documents are not required;
- (e) ships and aircraft entering and departing Australia under their own power;
- (f) to the extent that they can be identified, ships and aircraft purchased for use on overseas routes and any subsequent sales made of such ships and aircraft;
- (g) fish and other sea products landed in Australia and abroad directly from the high seas by Australian ships (such products landed in Australia directly from the high seas by foreign vessels are included); and
- (h) ships' and aircraft stores.

Statistical period

8. Although both foreign trade statistics and SACCS are compiled from the same source, imports and exports are recorded statistically in the month in which relevant documents are finalised by Customs and passed to the ABS for further processing, whereas

SACCS are compiled according to the reported date of loading and discharge in Australia. For this reason SACCS and foreign trade statistics are not directly comparable.

Coverage

9. Quarterly Shipping and Air Cargo Commodity Statistics relate to cargo loaded/discharged in the quarter and are derived from Customs documents received by the ABS up to the time of compilation. Where late lodgement of Customs documents occurs, preliminary quarterly statistics will understate actual cargo movements.

10. Normally, statistics of the current quarter will include relevant records received by the ABS up until at least a month after the end of the quarter. On average, the current quarter will include:

- (a) 98 per cent by value of actual inward cargo; and
- (b) 98 per cent by value of actual outward cargo.

Close to full coverage is achieved subsequently and final statistics for the quarter will be published in conjunction with preliminary statistics for the next quarter.

11. Annual statistics are compiled from the final statistics of component quarters.

Valuation

12. The recorded value of inward cargo is the free on board (f.o.b.) equivalent of the price when the sale is conducted under open market conditions.

13. For outward cargo, goods actually sold to overseas buyers prior to shipment are valued at the free on board (f.o.b.) equivalent of the actual

price paid to the exporter. Goods shipped on consignment are valued at the f.o.b. equivalent of the price that would have been paid to the exporter had he actually sold the goods to an importer in their country of final destination.

Gross weight

14. Gross weight is the total weight of cargo, irrespective of the basis on which freight is charged. It includes the weight of moisture content, wrappings, crates, boxes and containers (other than standard international containers used for containerised cargo).

15. Gross weight is not available by commodity for inward cargo.

Ship type (for sea cargo)

16. Each ship is classified to one of 11 ship types from information available in the Lloyd's Register of Shipping. The 11 ship types take account of physical structure and design. For the purposes of tables in this publication, these ship types are amalgamated into 4 broad categories as follows:

- (a) General cargo ships-
Container ships
Conventional cargo ships
Roll on-Roll off ships
Other cargo ships
- (b) Tankers-
Gas carriers
Liquid tankers
- (c) Bulk carriers-
Dry bulk ships
Dry/wet bulk ships
- (d) Other ships-
Multi-purpose ships
Passenger ships
Other ships

17. It should be noted that this classification was implemented with the June quarter 1983 publication. Although the difference between the new and old classifications is not great, care should be taken when comparing statistics for earlier periods with those released in the June 1983 and subsequent quarterly publications. Annual figures reflect the classification in use at the time final statistics for each component quarter were produced.

Type of service (for sea cargo)

18. Ships are also classified according to the type of service they provide. The two types of service for which statistics are shown in this publication are:

- (a) Liner service, which relates specifically to a ship operated by a carrier providing services on a specified route on a relatively regular basis; and
- (b) Other service, which refers to all ships operating in other than a liner service.

19. Liner service is further broken down into Conference and Non-conference. A 'Conference' is an association of shipowners which regulates the freight rates and terms and conditions of carriage of goods in any particular trade. Conference agreements exist only in respect of liner services and normally include provisions for sharing the trade, rationalising sailing schedules, and pooling arrangements for resources and/or revenue.

20. The type of service classification of each ship is advised to the ABS by the Department of Transport.

Classification of commodities

21. Commodity statistics in this publication are classified according to the Australian Transport Freight

Commodity Classification (ATFCC). The ATFCC is the Australian standard for classifying goods transported by any of the transport modes (sea, rail, road and air) to and from Australia and within Australia. Full details of the ATFCC are included in the publication Australian Transport Freight Commodity Classification and Interim Australian Pack Classification (1210.0).

22. In the ATFCC, commodities are defined in terms of one or more categories of the Standard International Trade Classification (SITC) or dissections of SITC categories embodied in the Australian Import Commodity Classification (AICC) or the Australian Export Commodity Classification (AECC).

23. The ATFCC lists 312 Commodity Items identified by four digit codes. These items are allocated to 136 Commodity Groups (three digit) which are in turn allocated to 55 Commodity Divisions (two digit) and 10 Sections (one digit). Commodity statistics in this publication are at the Commodity Division level in tables 3,4,12 and 13, and at the Section level in tables 8 and 9.

24. Users of commodity statistics should note that the content of particular ATFCC commodity statistics may be affected by the treatment of commodity data regarded as confidential. A full explanation and details of affected commodities are provided in Appendix 1.

Port of discharge / port of loading / state of origin

Inward cargo

25. The port of discharge is the Australian port at which the cargo is unloaded from the ship or aircraft.

26. The port of loading is the overseas port at which the cargo is loaded onto the ship or aircraft. This port is not necessarily in the country of origin of the goods.

Outward cargo

27. The port of discharge is the overseas port at which the cargo is unloaded from the ship or aircraft. This port of discharge is not necessarily in the country of final destination of the cargo as subsequent trans-shipments are not taken into account. For example, Cargo with a final destination of Germany may be unloaded at Rotterdam.

28. The port of loading is the Australian port at which the cargo is loaded onto the ship or aircraft. This port of loading is not necessarily in the State of origin. The State of origin is defined as the State in which the final stage of production or manufacture occurred.

Trade area

29. Ports at which ships load or discharge cargo are allocated to their respective countries, which are in turn allocated to trade areas in accordance with the Classification of Trade Areas for Cargo Statistics included as Appendix 2. For example, Santiago is allocated to Chile which is included in the trade area 'South America-West Coast' for the purpose of this publication.

Treatment of confidential data

30. If SACCS contain data which disclose the activities of particular persons or organizations, they may contact the ABS to arrange for non-release of such statistics. A few organisations have previously objected to the release of imports and exports data which allowed their activities to be disclosed. To ensure that such information is not disclosed in SACCS, it has been necessary to restrict the release of certain commodity statistics (more details are shown in paragraph 24 above and Appendix 1).

More detailed statistics

31. More detailed Shipping and Air

Cargo Commodity Statistics are obtainable from tabulations on microfiche. These tabulations are described in the ABS information paper Shipping and Air Cargo Commodity Statistics, Australia: An Information Paper (9250.0).

32. Shipping and Air Cargo Commodity aggregates are also available on magnetic tape for users wishing to undertake their own analyses.

33. Import and export statistics are also available from the ABS with mode of transport dissections for users who require transport oriented commodity information in finer detail than provided under the Australian Transport Freight Commodity Classification.

Other related data

34. The ABS also collects shipping and cargo information direct from shipping companies. This collection does not include any commodity data but does provide comprehensive details on ship and cargo movements in terms of ship type, ship usage, ship flag, overseas and Australian ports and cargo pack type (container/other). These statistics are released in a quarterly publication Shipping and Cargo, Australia (9211.0).

35. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

APPENDIX 1

CONFIDENTIAL COMMODITY ITEMS

When compiling SACCS commodities are recoded from the Australian Import Commodity Classification (AICC) and Australian Export Commodity Classification (AECC) to the ATFCC.

Some AICC and AECC items are classed as confidential (see paragraph 30 of the Explanatory notes on page 4) and to ensure that such information is not disclosed in SACCS these commodities have been included in the special item 9999 - 'Commodity not available for publication'. Lists of relevant AICC and AECC items and affected ATFCC items are provided.

SACCS output is processed so as to show two quarters of statistics: for the most current (preliminary statistics) quarter and for the previous (final statistics) quarter.

When an AICC or AECC item becomes confidential it is recoded from its normal ATFCC item to the special item 9999 with effect from the preliminary statistics for the quarter in which the AICC or AECC item became confidential (see paragraphs 9 and 10 of the Explanatory notes on page 2 for an explanation of preliminary statistics).

Where a confidentiality restriction is placed on a SACCS item, both the current and previous quarters' statistics are adjusted. This is the case even though the previous quarter's data were not affected by the restriction when data for that quarter were first released (as preliminary statistics).

This aspect should be considered when interpreting the date of effect listed in the following pages and when interpreting data for the same quarter in different publications (or other output).

APPENDIX 1A

ATFCC ITEMS AFFECTED BY CONFIDENTIALITY ACTION
OUTWARD CARGO

Affected ATFCC item		First preliminary SACCS quarter affected	Confidential AECC item	
Code	Description		Code	Description
0611	Raw sugar	June '84	061.10.01	Cane sugar-in bulk
0999	Other food preparations	Dec. '83	099.06.01	Natural yeast
1112	Ale, beer and stout; cider (alcoholic)	Sept. '82	112.30.01	Beer made from malt, bottled
		Sept. '82	112.30.03	Beer made from malt, canned
		Sept. '82	112.30.09	Beer made from malt, not bottled or canned
2120	Furskins, raw	Sept. '82	212.09.05	Opussum skins, raw
2421	Woodchips	Sept. '82	246.02.03	Pulpwood in woodchips, hardwood
		Sept. '82	246.02.04	Pulpwood in woodchips, softwood
		Sept. '82	246.02.08	Pulpwood in particles
2722	Sand, natural	June '84	273.50.01	Silica Sand
2821	Bauxite and other aluminium ores and concentrates	Sept. '82	287.31.00	Aluminium ores and concentrates
2822	Alumina	Sept. '82	287.32.00	Alumina, aluminium oxide
2861	Ilmenite ores and concentrates	Sept. '82	287.93.07	Beneficiated ilmenite, ores and concentrates
		Sept. '82	287.99.19	Base metal ores and concentrates, n.e.s.
2872	Nickel ores and concentrates	Sept. '82	287.22.00	Nickel matte, sinters, and other intermediate products of nickel metalurgy
2879	Other non-ferrous ores and concentrates	Sept. '82	287.70.00	Manganese ores, concentrates (incl. manganiferous iron ores etc. mang. content 20% or more by weight)
		Sept. '82	287.92.03	Scheelite ores and concentrates
2881	Metal waste and scrap of iron or steel	Sept. '82	282.01.00	Pig or cast iron, waste and scrap
		Sept. '82	282.02.09	Alloy steel waste and scrap, excl. tin plate
		Sept. '82	282.09.09	Iron and steel (excl. alloy), waste and scrap, excl. tin plate
3410	Liquefied petroleum gas (LPG) and other liquefied manufactured gases	Sept. '82	341.31.00	Liquefied propane and butane
3420	Liquefied natural gas	Sept. '82	341.39.00	Liquefied gaseous hydrocarbons, n.e.s.
3490	Other gaseous hydrocarbons, n.e.s.	Sept. '82	341.40.00	Petroleum gases and gaseous hydrocarbons, n.e.s., in the gaseous state
		Sept. '82	341.50.00	Coal gas, water gas, producer gas, similar gases
5110	Organic chemicals, n.e.s.	June '83	511.25.00	Styrene
		Sept. '82	512.10.07	Ethyl alcohol or neutral spirits, undistilled 80 degree or higher; denatured spirits of any strength
		June '83	512.34.00	Phenol and its salts
5129	Other inorganic chemicals, n.e.s.	Sept. '82	522.49.00	Metallic oxides of chromium, manganese, cobalt and titanium
