15.	Number of accidents, persons killed, persons injured : Features of roadways on which accidents occurred - Australia, year ended December 1976 and quarters June 1976 to June 1977	18
16.	Number of accidents, persons killed, persons injured : Days of the week on which accidents occurred - Australia, year ended December 1976 and quarters June 1976 to June 1977	19
17.	Number of accidents, persons killed, persons injured : Times of day at which accidents occurred - Australia, year ended December 1976 and quarters June 1976 to June 1977	20

EXPLANATORY NOTES

Introduction

This bulletin contains details of road traffic accidents involving casualties which occurred in each State and Territory of Australia during the three months ended 30 June 1977.

Seasonally adjusted

2. Original and seasonally adjusted statistics of road traffic accidents involving casualties, persons killed and persons injured are shown in Table 1. Because of the irregular nature of the data caution should be exercised in interpreting quarter to quarter movements. Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1977* (1308.0).

Scope

3. Details of road traffic accidents involving casualties relate to accidents which were reported to the police and which satisfy the following conditions —

- (a) That the accident occurred on any road, street, thoroughfare, etc., open to the public, including railway level crossing;
- (b) That it involved any road vehicle, i.e. motor car, tram, handbarrow, etc., (or other road user, such as an animal), which at the time of the accident was in motion;
- (c) That the accident resulted in —
 - (i) the death of any person within a period of 30 days of the accident; or
 - (ii) bodily injury to any person to an extent requiring surgical or medical treatment.

4. The statistics in this bulletin are compiled from accident reports which are prepared by police officers in the various States and Territories.

5. Australian totals of the number of accidents which involved vehicle damage only are not available as these details are not compiled in all States.

6. Details of road traffic accidents, classified according to "Type of road user responsible" and

"Cause of accident", are not included in this bulletin. Investigations have shown that, because of the subjective nature of classification of accidents according to "responsibility" and "cause", it has not been possible to collect and classify statistics on the same basis for all States. Particulars of road traffic accidents classified according to "Type of road user responsible" and "Cause of accident" are shown only in statements for South Australia and Tasmania.

7. Investigations conducted by the ABS have revealed that, in spite of the requirement for accidents involving casualties to be reported to the police, some casualty accidents, for the most part involving less severe injuries, have not in fact been reported. In addition, procedural changes adopted in recent years have led to a decrease in the number of accidents being included in the reporting system. Precise measurement of the extent to which these factors have influenced the statistics has not been possible, but they are likely to have operated to a varying degree in all States and Territories. This should be noted when using these statistics for the analysis of trends.

8. Due to a definitional change introduced by the Road Safety and Traffic Authority (ROSTA) whose functions include the collection and dissemination of road traffic accident statistics in Victoria, accidents occurring in that State since 1 January 1977 have been classified according to the initial event which led to the accident. This has meant that some accidents previously classified as collisions are now classified to "other" non-collision accidents.

Related publications

9. Other ABS publications which may be of interest include:

Road Accident Fatalities (9401.0).

Road Traffic Accidents involving Casualties (Preliminary) (9402.0).

Publications of the Australian Bureau of Statistics (1101.0).

Symbols and other usages

r — revised
 . . . — nil or not applicable
 n.y.a. — not yet available

(a) Late advice of 111 accidents involving 149 injured which occurred in Victoria during 1975 was received by the ABS. These accidents represent approximately 0.9% of all casualty accidents which occurred in Victoria during 1975 and 0.2% of casualty accidents in Australia during the same period. Corresponding figures for the 149 injuries which occurred as a result of these accidents are 0.8% and 0.2% respectively. As the overall effect of these accidents and injuries on figures previously published for Victoria and Australia is negligible, it has been decided not to revise them. However further information about these accidents is available on request from the Victorian office of the ABS.
