EXPLANATORY NOTES

This bulletin contains detailed information regarding registrations of new motor vehicles and of motor vehicles on register. It is supplementary to the monthly statements (Reference No's 14.6 and 14.8) issued for the months of January, February and March 1976.

Source of information

2. The statistics in this bulletin are derived from information as recorded on registration documents. The figures include vehicles with diplomatic and consular plates and Australian Government-owned new vehicles other than those belonging to the defence services. Although the position varies from State to State, in these statistics, 'registrations' generally mean registrations processed by the motor vehicle registration authorities in the States and Territories during the period. In some States, registrations of new motor vehicles are not recorded in the statistics until some time after registration. Figures for Queensland from July 1975 have been affected by a change in internal processing arrangements at the registration authority. Further changes in processing arrangements occurred in late 1975 and early 1976 which have also affected processings during that period.

3. The figures in Table 2 show, for Australia, the actual number of new motor vehicles registered, as well as processed registrations in each month from January 1975 to December 1975.

Seasonal adjustment of monthly statistics

4. Original and seasonally adjusted registrations of new motor vehicles are shown in Table 1. The two component series 'Motor cars and station wagons' and 'Other vehicles' are each adjusted separately and the adjusted figures for 'Total' registrations are obtained by adding together the two component series. In this statement the seasonally adjusted series have been revised. The revision is the result of annual re-analysis, details of which, together with information regarding the methods used in seasonally adjusting the component series, will be given in the forthcoming issue of *Seasonally Adjusted Indicators, 1976* (Reference No. 1.10).

Classification of vehicles

5. A revised classification of motor vehicles was adopted for publication of statistics of new motor vehicle registrations from 1 January 1972. The principal differences between this classification and that which it replaced involve the categories light commercial type vehicles, trucks and other truck type vehicles. Consequently, figures shown from January 1972 for these categories are not strictly comparable with data for previous periods.

6. The boundary between light commercial type vehicles and trucks has been defined by confining the former to vehicles with a carrying capacity of less than 1

tonne. Because of the absence of details of carrying capacity on the registration records in certain States, it has been necessary to impute carrying capacity by reference to R.A.C. horsepower rating in order to ensure consistent treatment across Australia. This affects some vehicles in the vicinity of 1 tonne carrying capacity.

7. In those tables where vehicles are shown classified according to make and R.A.C. rated horsepower, fractions of R.A.C. horsepower are omitted; for example, an R.A.C. rating of 20.9 hp is recorded as 20 hp.

8. Legislation to provide for the compulsory registration of recreation vehicles (e.g. trailbikes, minibikes, and dune buggies) intended for use in public places came into force in Victoria on 17 September 1973. Particulars of these registrations are regarded as outside the scope of new motor vehicle registration statistics and are accordingly excluded from statistics contained in this statement.

Classification by area

9. In all States, 'capital city' registrations refer to vehicles for which the address of the registered owner is located within the capital city statistical division. These statistical divisions are re-defined from time to time usually as the result of information available from periodic population and housing censuses. On 1 January 1976 the capital city statistical division in New South Wales was expanded and prior figures for that State are not directly comparable. All registrations in the Australian Capital Territory are included under 'capital cities' while those in the Northern Territory are included under 'other areas'.

Motor vehicles on register

10. While different concepts of what constitutes 'motor vehicles on register' at a particular point of time may be appropriate for different requirements, for the purpose of obtaining uniform statistics for all States and Territories it is necessary to adopt a common concept of what constitutes motor vehicles on register at a particular date. In this series, motor vehicles on register at a particular date are defined as those vehicles in respect of which fees were paid for a period including the specified date, either in advance, or on that date, or retrospectively.

11. Censuses of motor vehicles on register have been conducted in respect of 31 December 1955, 31 December 1962 and 30 September 1971. Final detailed results have been published in separate census bulletins for each State, Territory and Australia.

12. The figures of motor vehicles on register include vehicles with diplomatic and consular plates and Australian Government-owned vehicles other than those belonging to the defence services.

SYMBOLS USED IN THIS BULLETIN

- r — revised
 p — preliminary
 . . — nil or less than half the final digit shown
 or not applicable
 — break in continuity of series (where drawn
 across a column between two
 consecutive figures)

Any discrepancies between totals and sums of components in tables are due to rounding.
