

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS
CANBERRA, AUSTRALIA

To be treated as strictly CONFIDENTIAL and NOT to be published, broadcast or cabled before NOON on THURSDAY, 4TH APRIL, 1957.

MONTHLY INDEX OF AUSTRALIAN EXPORT PRICES - FEBRUARY, 1957

1. Two series of index numbers are provided herein - one on fixed weights, the other on changing weights. Each takes account of 20 items, which normally constitute about 80 per cent. of the total value of exports of merchandise and silver together with gold production.

2. The index numbers show price changes in the predominant market or markets for each commodity.

I. THE SIMPLE AGGREGATIVE INDEX : FIXED WEIGHTS

3. The weights are based on average annual exports (production, in the case of gold) during the three years 1933-34 to 1935-36.

4. Indexes are given for individual commodities and certain groups thereof. The percentage distribution of these groups in the aggregates of the "All Groups" indexes for the base period (1936-37 to 1938-39) is shown at the head of the table.

RECENT TRENDS

5. The index for "All Groups (including gold)" for February, 1957, was 16 per cent. above the index for February, 1956, and 15 per cent. above the index for the year 1955-56.

6. Individual group indexes for February, 1957, compared with group indexes for February, 1956, show the following percentage changes:- Wool +33; Wheat +8; Butter -32; Metals -6; Meats +17; Sugar +6; Dried Fruits +6; Tallow -1; Hides -2; and Gold Nil.

Compared with the year 1955-56, group indexes for February, 1957, show the following percentage changes:- Wool +32; Wheat +3; Butter -31; Metals -1; Meats +9; Sugar +4; Dried Fruits +7; Tallow +2; Hides -2; and Gold Nil.

7. Reference to the group indexes in the table on page 3 hereof shows the great fluctuations and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards have occurred in the price of wool. Since wool is a predominant export (and comprises 46 per cent. of the base aggregate of the index) fluctuations in wool prices obscure the effects which movements in prices of the other components have on the "All Groups" index. For purposes of comparison "Wool" and "Other Groups" are shown separately on page 2. The movement of the weighted average index of prices of these "Other Groups" contrasts with the pronounced fluctuations in prices of wool.

EXPORT PRICE INDEX
WOOL AND "OTHER GROUPS"

(Base of each Section - Average of 3 years ended June, 1939 = 100)

(a) Silver, Copper, Tin, Zinc, Lead. (b) Beef, Lamb, Mutton, Pork. Guaranteed minimum prices are used when operative. (c) Sultanas, Lexias, Currants. (d) Cattle Hides, Calf Skins. (e) Where Australian gold has been sold on the overseas premium markets such price has been used in the index. (f) Percentage distribution of base aggregate for "All Groups (including Gold)" - applicable from 1936-37. (g) Percentage distribution of base aggregate for "All Groups (excluding Gold)" - applicable from 1936-37. (h) Nominal. (j) Subject to revision.

II. THE MONTH TO MONTH INDEX : CHANGING WEIGHTS

8. Australian export products are not marketed regularly throughout the year. Wool and wheat are obvious examples of commodities which are marketed in relatively large quantities at certain periods of the year. In consequence, while the "fixed weights" index indicates satisfactorily the trends of export prices, it does not take account of the relative quantities actually sold at the different prices ruling during each month. The impact of the price movements on current sales is indicated more directly by the index numbers below. In computing these, the "quantity multipliers" are the quantities actually exported in the months (or periods) to which the index numbers relate.

9. This index is designed to compare prices in any one month (or period of a trade year) with those in the corresponding month (or period) of the previous year. The weights used in its construction are the quantities exported in these two corresponding months (or periods). A full description of the method of computation can be found in Part IV, Trade, Transport and Communication of the Official Year Book of the Commonwealth No. 42, 1956 (Page 312). A summary of movements in this index follows. Columns marked A show movements in the index for groups other than wool and columns marked B the movements in the index for all groups including wool.

Base : Weighted Average Price Level in corresponding months
(or periods) of preceding year = 100

Period	Month stated compared with same month of preceding year		Period of trade year ending in month stated compared with same period of preceding year
