EXPLANATORY NOTES

Introduction

This publication contains annual statistics of Australia's exports. The commodities for which statistics are presented are the same as those included in the monthly publication Exports, Australia (5404.0).

Source of data

2. These statistics are compiled by the Australian Bureau of Statistics from documentation submitted by exporters or their agents to the Australian Customs Service as required by the Customs Act.

Statistical concepts

3. The statistics of exports presented in this publication are recorded on a general trade basis: i.e. total exports include both Australian produce and re-exports.

4. Australian produce is defined as goods, materials or articles, which have been produced, manufactured or partly manufactured in Australia, except goods which were imported and have undergone only repair or minor operations which leave them essentially unchanged.

5. Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported or after undergoing repair or minor operations which leave them essentially unchanged. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and shelling.

6. The following are excluded from recorded export statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) bunkers and stores supplied to vessels and to aircraft prior to departure overseas;
- (c) migrants' and passengers' effects exported and parcels post exports of small value for which Customs entries are not required;

(d) certain materials under inter-governmental agreements for defence and similar projects for which Customs entries are not required;

(e) vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries;

(f) the sale of any vessel and/or aircraft intended for use on overseas routes;

(g) fish and other sea products landed abroad directly from the high seas by Australian vessels;

(h) export consignments where the value of the goods in each transaction is less than \$250.

Statistical period

7. The statistics in this publication are based on export entries passed by Customs during the period July 1981 to June 1982 and processed by the ABS.

Valuation

8. Exports: Goods actually sold to overseas buyers prior to shipment are valued at the free-on-board (f.o.b.) Australian port of shipment equivalent of the actual price at which the goods were sold. Goods shipped on consignment are valued at the f.o.b. Australian port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods are dispatched for sale.

9. The recorded value of exports includes the value of the outside package, other than international containers used for containerised cargo.

Merchandise exports

10. In accordance with standards recommended by the United Nations Statistical Commission:

merchandise exports are defined as all goods which subtract from the stock of material resources in Australia as a

result of their movement out of the country. Merchandise exports, therefore, exclude goods exported with the reasonable expectation of their re-import within a limited time. A complete list of commodities not included in merchandise trade is shown under Section 9(b) of the Australian Export Commodity Classification (AECC) (1203.0). These include, for example, coin being legal tender and goods for temporary exhibition outside Australia.

Goods excluded from merchandise trade are for convenience termed non-merchandise. Total trade is the sum of merchandise and non-merchandise trade.

Commodity classification

11. Exports are classified according to the items of the AECC which, from 1 July 1978, has been based on the Standard International Trade Classification, Revision 2 (SITC Rev 2) (United Nations Statistical Papers, Series M, No. 34, Revision 2, 1975). This classification is closely related to the Customs Co-operation Council Nomenclature (CCCN) which is used as the basis for the Australian Customs Tariff.

12. In this publication it has been necessary to abbreviate descriptions for many items. A full description of any export item can be obtained from the AECC, 1981.82.

Broad Economic Categories

13. Exports of merchandise in Table 5 are classified according to the nineteen categories of the United Nations' Classification, Broad Economic Categories (BEC). The BEC attempts to classify external trade statistics for the purposes of general economic analysis according to the main end use of the commodities traded. Figures for previous years have been compiled and are available on request.

ASIC industry of origin

14. Export statistics classified by Subdivisions of the Australian Standard Industrial Classification (ASIC) are shown in table 4. The statistics are compiled by allocating statistical items of the AECC to the ASIC industry of origin with whose main economic activities the commodities are primarily associated. A full description of ASIC Classes is contained in the publication Australian

Standard Industrial Classification, Vol. 1 - The Classification (1201.0). For exports, ASIC statistics have replaced Industrial Groups statistics from 1 July 1980.

Country

15. For the purposes of overseas trade statistics, a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with Australian Customs provisions. External territories under Australian administration are treated separately whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian overseas trade statistics.

16. For exports, country refers to the country to which the goods were consigned at the time of export. Where the country of consignment is not determined at the time of export, goods are recorded as exported "For Orders" and in those cases where it was found to be impossible to determine the destination, as "Destination Unknown".

State

17. From 1 July 1978 State statistics comprise State of origin of Australian produce and State of final shipment of re-exported goods. State of origin is defined as the State in which the final stage of production or manufacture occurs. Previously State was the State in which the export document was lodged with the Australian Customs Service. Because of this change, figures from 1 July 1978 are not directly comparable with those for previous periods.

Treatment of confidential data

18. To ensure that information about the activities of particular businesses is not disclosed, it is necessary to restrict the release of statistics of certain commodities. These restrictions do not affect total export figures but they can affect statistics at all levels of the AECC.

OTHER INFORMATION AVAILABLE

19. Special returns service: Subscribers to this service can receive computer produced printout of overseas trade statistics at the commodity specif-

ic level in one or more of a limited number of formats, for a charge consistent with the level of detail required. This service is recommended where up to fifty specific commodity items are required on a regular basis.

20. Microfiche service: Overseas trade statistics are available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported at various levels of aggregation. This service is recommended where the subscriber wishes to obtain overseas trade details for a large number of commodities.

21. Magnetic tape: Statistics for imports, exports and import clearances are available on 9-track magnetic tape approximately 4 weeks after the end of the reference period. Documentation regarding the content and structure of these tapes is available from the ABS Foreign Trade and Shipping Section in Canberra.

22. To meet subscribers' needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Relevant application forms and information papers for these services are available from the ABS Foreign Trade and Shipping Section in Canberra or any ABS State office. Payment in advance is required for each of these services.
