**BUILDING STATISTICS
JUNE QUARTER 1975**

CONTENTS

<i>Table</i>		<i>Page</i>
...	Explanatory notes	2
PART A. AUSTRALIA		
Summary of building statistics		
1	Original series, 1972-73 to June quarter 1975	4
2	Seasonally adjusted series	6
Value of building 1972-73 to June quarter 1975		
3	All building by class of building	7
4	Private building by class of building	8
5	Work done on building during period by ownership and class of work	9
6	Estimated value of work under construction yet to be done at end of period by ownership and class of building	10
Dwellings		
7	Number of new houses and other dwellings by ownership and class of building 1972-73 to June quarter 1975	11
8	Number and value of new dwellings by stage of construction, 1973-74 to June quarter 1975	12
9	Number of new houses commenced by material of outer walls, 1973-74 to June quarter 1975	13
10	Number and value of new houses completed by contract builders for private ownership classified by value of house and material of outer walls, 1974-75 and June quarter 1975	14
11	Number of new houses completed by ownership and value of house, 1974-75, and June quarter 1975	15
PART B. STATES AND TERRITORIES		
Value of building		
12-17	Building by stage of construction - 1972-73 to June quarter 1975	16-21
18	Value of building work by type of building and stage of construction, June quarter 1975	22
Number of new dwellings by stage of construction		
19-22	New dwellings, by stage of construction, 1972-73 to June quarter 1975	24-27
23	Number and value of alterations and additions to houses, 1972-73 to June quarter 1975	28
24	New dwellings by ownership and stage of construction, June quarter 1975	29
25	New dwellings completed, capital city statistical divisions, 1972-73 to June quarter 1975	30
Average value and size of new houses commenced		
26	New private contract built houses commenced by average commencement value, average value per square metre and average size, capital city statistical divisions, 1973-74 to June quarter 1975	31
Persons working		
27	Number of persons working on building jobs; type of building work at 30 June 1969 to 30 June 1975	32
28,29	Number of persons working on building jobs by occupational status and occupation, at 30 June 1975	33

EXPLANATORY NOTES

This issue of Building Statistics (Reference No. 3.6) presents for the first time data on new dwellings separate from data on alterations and additions to dwellings. In previous issues this information was combined in all statistics which were not specifically labelled otherwise. The presentation of the new dwellings data separately is provided for all quarterly data shown in this bulletin, however, for financial years it is not possible to provide the separate data for any year prior to 1973-74. To provide continuity, 1973-74 and 1974-75 are presented with the data both separated and combined while 1972-73 is presented with the combined data only.

SCOPE AND COVERAGE

The statistics relate to building structures, and exclude railways, roads, bridges, earthworks, and other non-building construction. Renovations, repairs and maintenance are excluded.

2. Statistics of building approvals are compiled from:

- (a) Permits granted by local government authorities covering those areas subject to building control by those authorities.
- (b) Contracts let or day labour work approved by Australian, State, semi-government, and local government authorities.

3. Statistics of building operations are compiled from returns obtained from:

- (a) Contract (including speculative) builders and those engaged in alterations and additions,
- (b) Owner-builders, and
- (c) Government or semi-government authorities.

Details for owner-builders cover only those areas subject to building control by local government authorities. Details obtained from government authorities, and contract and speculative builders refer to all areas.

4. The collection covers new dwellings and new other building jobs valued at \$2,000 and over, and alterations and additions (both to dwellings and other building) valued at \$10,000 and over. In this publication, new dwellings are shown separately from alterations and additions to dwellings, whereas for other building - new building and alterations and additions are shown together.

DEFINITIONS

5. A *Dwelling* is classified as either a 'House' or an 'Other Dwelling'.

- (a) A 'House' is defined as a building which has been designed or adapted so that its prime purpose is to be a single self-contained dwelling unit (i.e. includes bathing and cooking facilities), which is completely detached from other buildings, and occupies (except in such

cases as dwellings built for employees or families of the owner or lessee of the land) a separate titled block of land.

- (b) An 'Other Dwelling' is defined as a self-contained dwelling unit other than a house as defined in (a) above. These include flats, home units, semi-detached dwellings, villa units, town houses, etc.

Non-self-contained dwelling units such as might be found in motels, hostels, and institutions, are not included as dwellings and the value of this building is included in the appropriate category of other building. Temporary or makeshift dwellings are excluded from building statistics.

6. (a) *Commenced*: A building is regarded as having been commenced when expenditure on building work is first reported.

- (b) *Completed*: A building is regarded as having been completed when it is reported as completed or in the case of owner-builders is reported as completed or substantially completed and occupied.

- (c) *Under Construction*: A building is regarded as being under construction at the end of a period if it has been commenced but has not been completed and work on it has not been abandoned.

- (d) *Contract built houses*: Those erected under contract, or in anticipation of sale or rental.

- (e) *Owner-built houses*: Those erected by an owner (other than a recognised builder) or under his direction without the services of a contractor responsible for the whole job.

- (f) *Value of Building Approved, Commenced, Completed, or Under Construction* represents the estimated value of the whole job when completed, excluding the value of the land on which the job is carried out.

- (g) *Value of Building Work Done* represents the estimated value of the building work actually carried out during the period.

- (h) *Value of Building Work Yet To Be Done* is the estimated value of work remaining to be done on building jobs under construction at the end of the period.

BUILDING CLASSIFICATION

7. *Private and Government* : A building job is classified as 'private' or 'government' according to ownership at date of commencement.

8. Building is classified according to the function it is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the function of the group as a whole.

Examples of the types of individual building jobs included under each main functional heading are shown in the following list:

Hotels, etc. Includes motels, hostels, boarding houses and guest houses.

Shops. Includes cafes, restaurants, retail markets and showrooms. Shops classified as government include government owned shop buildings for leasing.

Factories. Includes abattoirs, brickworks, power houses, printing offices and government workshops.

Offices. Includes banks, post offices and council chambers.

Other business premises. Includes service stations, bus depots, wholesale stores, telephone exchanges, television stations and studios, and warehouses.

Education. Includes schools, colleges, kindergartens, reference libraries and universities.

Religion. Includes churches, church halls, convents, seminaries and theological colleges.

Health. Includes ambulance stations, baby health clinics, convalescent homes, hospitals, nurses' quarters and sanatoria.

Entertainment and recreation. Includes clubs, gymnasiums, public halls, squash courts and theatres.

Miscellaneous. Includes homes for aged, law courts, defence buildings, museums, orphanages, police stations and reformatories.

SYMBOLS AND OTHER USAGES

r — revised.

n.a. — not available.

— — break in continuity of series (where drawn across a column between two consecutive figures).

Any discrepancies between totals and sums of components in tables are due to rounding.

Because of cyclone Tracy, building statistics for Darwin could not be collected in the normal manner for December quarter 1974, March quarter 1975 and June quarter 1975. For December quarter 1974 provisional estimates of building activity in Darwin have been made and were published in the previous issue of bulletin Reference No. 3.6. For March quarter 1975 there was little building activity in Darwin which would have been within the scope of the collection and for the time being at least this is being provisionally estimated as zero. For June quarter 1975 the only building statistics available for Darwin are provisional estimates relating to approvals, commencements and completions; statistics for work under construction, work done and work yet to be done are not available at this stage. For the remainder of the Northern Territory all data was collected in the normal manner.

PART A

TABLE 1 - SUMMARY OF BUILDING STATISTICS, AUSTRALIA

(a) Statistics relate to new houses. Previous issues of this bulletin included alterations and additions with new houses. (b) When analysing changes in the average cost of houses and the average cost per square metre, it should be borne in mind that an average for a particular quarter will be affected by the mix in sizes and costs of houses commenced in that quarter. This mix may not be constant from quarter to quarter. The average commencement value and average value per square metre are based on the final contract price of houses when complete (or estimates of this price) provided by contractors at the time of commencement of building work.
