- for information about other ABS statistics and services please refer to the back page of this publication.

SUMMARY OF FINDINGS

Care should be taken in interpreting estimates for managerial/non-managerial employees which are presented according to classification by occupation, as well as status of employee. See paragraph 10 of the Explanatory Notes (page 60). Because of methodological differences, estimates of average earnings from this survey vary slightly from the estimates obtained from the quarterly survey of Average Weekly Earnings (6302.0).

Distribution of Earnings

In May 1991, the estimated median weekly total earnings of all male employees was \$335.30, a 3.3 per cent increase on May 1990 (\$518.30), while the median weekly total earnings of all females increased 5.0 per cent to \$379.40 from \$361.50 in May 1990.

Over the same period the estimated median weekly earnings of full-time adult non-managerial employees increased 3.5 per cent for males to \$549.50 and 5.1 per cent for females, to \$467.70.

Diagrams 1 and 2 show the relative distribution of all male and female employees and full-time adult non-managerial employees by levels of weekly total earnings.

The concentration of females in the lower earnings ranges is apparent, while males dominate in the higher earnings ranges. The distribution patterns for males and females reflect structural differences in employment.

Contributing factors are:

- The majority of part-time workers are females (76.0%)
- Males account for 77.9 per cent of managerial employees
- There are slightly more junior females (54.0%) than junior males (46.0%)
- Males work on average more overtime hours than females

Composition of Earnings

For full-time adult non-managerial employees, the award or agreed base rate of pay component of total earnings increased by 1.6 percentage points for males (to 87.6%) and by 0.4 percentage points for females (to 96.0%) between May 1990 and May 1991.

For full-time junior non-managerial employees the base pay component is much higher, 92.7 per cent for males and 96.6 per cent for females.

COMPOSITION OF EARNINGS AS A PERCENTAGE OF AVERAGE WEEKLY TOTAL EARNINGS: FULL-TIME NON-MANAGERIAL EMPLOYEES, AUSTRALIA, MAY 1991

	Award or agreed base rate of pay	Payment by measured result	Overaward pay	Total ordinary time pay	Overtime pay	Total weekly earnings
	—per cent—					
<i>Adults-</i>						
Males	87.6	1.3	1.8	90.7	9.3	100.0
Females	96.0	0.4	1.3	97.7	2.3	100.0
Persons	90.3	1.0	1.7	93.0	7.0	100.0
<i>Juniors-</i>						
Males	92.7	0.5	1.4	94.6	5.4	100.0
Females	96.6	0.2	1.0	97.8	2.1	100.0
Persons	94.5	0.4	1.2	96.1	3.9	100.0

For occupations, the lowest proportion for award or agreed base pay component was recorded for Plant and machine operators, and drivers (males 79.4%, females 89.4%). This group recorded relatively large amounts of payment by measured result and overtime. The highest base pay proportion was recorded for male and female Professionals, 96.3 per cent and 98.2 per cent respectively.

The proportion of total earnings accounted for by the award or agreed base pay component varied considerably between industries. For males in the Mining industry, base pay accounted for only 69.6 per cent, while payment by measured result (13.6%) and overtime (15.6%) were significant contributors to total earnings. This compares with females in Manufacturing who reported a base pay component of 91.4 per cent. The highest proportions for the base pay component were recorded in the Community services industry (males 95.6%, females 98.3%).

Diagram 3 illustrates the fluctuation over time, of the 'award or agreed base rate of pay' component, particularly for males.

It is worth noting that despite variations in the levels of earnings components, the gap between male and female total weekly earnings for May 1991 was reduced for the first time in 4 years.

In May 1987 average weekly total earnings of full-time adult non-managerial females (\$385.10) were 82.8 per cent of male earnings (\$465.00). The gap increased steadily until 1990 when female earnings were 82.2 per cent of male earnings. In May 1991, however, the gap decreased with female earnings (\$498.50) rising to 83.7 per cent of male earnings (\$595.60).

DIAGRAM 3: AWARD OR AGREED BASE RATE OF PAY AS A PERCENTAGE OF TOTAL WEEKLY EARNINGS: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, AUSTRALIA, MAY 1987 TO MAY 1991

Overtime

In May 1991, average weekly overtime earnings for full-time adult non-managerial employees were \$55.10 for males and \$11.30 for females. This corresponded with average overtime hours of 2.6 for males and 0.6 for females. Between May 1990 and May 1991 average overtime earnings decreased 8.6 per cent for full-time adult non-managerial males and 5.8 per cent for females.

The major occupation group to record the highest level of weekly overtime earnings for full-time adult non-managerial males was Plant and machine operators, and drivers (\$96.40) while female Labourers and related workers recorded overtime earnings of \$21.30. The lowest overtime earnings were recorded for male Salespersons and personal service workers (\$19.00) while female Professionals received \$8.20.

Average weekly overtime earnings of employees in the private sector (males \$65.70, females \$12.60) were considerably higher than employees in the public sector (males \$35.70, females \$9.30).

Industries mostly affected by the fall in overtime earnings were in the Manufacturing Sector, which showed an overall decrease of 20.1 per cent compared to Non-manufacturing where overtime earnings fell by 1.1 per cent.

The largest decreases occurred for males in the Paper, paper products, printing and publishing and Fabricated metal products; other machinery and equipment manufacturing industries, falling \$51.50 and \$25.70 respectively. Female overtime earnings fell \$20.00 for the Transport equipment manufacturing industry and \$19.20 for the Mining industry.

Taking into consideration only those employees who received overtime pay, the industry to record the highest average weekly overtime earnings was Construction, where males received \$266.50 for 11.7 hours and females \$155.50 for 7.9 hours.

Diagram 4 shows that while movements in female overtime earnings generally follow those of males, the extent of the change is somewhat smaller.

DIAGRAM 4: OVERTIME AS A PERCENTAGE OF TOTAL WEEKLY EARNINGS: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, AUSTRALIA, MAY 1987 TO MAY 1991

Overaward Pay

Average weekly overaward pay for full-time adult non-managerial employees declined between May 1990 and May 1991. Males recorded an estimate of \$10.90, down \$2.10 from May 1990, while females earned \$6.70, a decrease of \$0.20 over the same period.

The major occupation groups to record the highest levels of overaward pay were male Tradespersons (\$17.60) and female Clerks (\$10.50). Diagram 5 shows that while males earn varying amounts of overaward pay, Clerks is the only major occupation group where females earned more than males.

DIAGRAM 5: AVERAGE WEEKLY OVERAWARD PAY, MAJOR OCCUPATION GROUPS, FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, AUSTRALIA, MAY 1991

Falls in overaward pay for full-time adult non-managerial males were evenly distributed across all industries, while for females the decreases occurred mainly in the Manufacturing industry.

Overaward pay in the Manufacturing industry fell 19.9 per cent for males and 28.9 per cent for females. Total non-manufacturing fell 11.8 per cent for males and increased 8.9 per cent for females.

The largest decreases in overaward pay for males occurred in the Paper, paper products, printing and publishing industry (\$15.00) and Food, beverages and tobacco industry (\$7.60). For females, the largest reductions in overaward pay occurred in the Paper, paper products, printing and

publishing industry (\$9.10) and Finance, property and business services industry (\$5.60).

The highest levels of overaward pay were reported for males in the Paper, paper products, printing and publishing industry (\$29.90) and females in the Fabricated metal products; other machinery and equipment industry (\$16.10).

Overaward pay for full-time adult non-managerial employees was considerably higher in the private sector (males \$15.80, females \$10.40) compared to males and females in the public sector (\$2.10 and \$0.80 respectively).

DIAGRAM 6: OVERAWARD PAY AS A PERCENTAGE OF TOTAL WEEKLY EARNINGS: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, AUSTRALIA, MAY 1987 TO MAY 1991

Earnings by Occupation

In May 1991, the highest average weekly total earnings were recorded in the following major occupation groups:

- Managers and Administrators (males \$853.50, females \$657.70)
- Professionals (males \$791.50, females \$648.40)
- Para-professionals (males \$686.10, females \$618.10)

Across all occupation groups, average increases in weekly total earnings were relatively low, the largest increase occurring for both male and female Managers and administrators (6.1% and 7.7% respectively).

The smallest increase in average weekly total earnings occurred for female Tradespersons (0.4%), while the only occupation group to record a decrease was male Labourers and related workers (0.1%).

DIAGRAM 7: PERCENTAGE CHANGE IN AVERAGE WEEKLY TOTAL EARNINGS OF FULL-TIME ADULT EMPLOYEES, MAJOR OCCUPATION GROUPS, AUSTRALIA, MAY 1990 TO MAY 1991

Differences in the occupational distribution of employees can significantly affect earnings of males and females in the private and public sectors.

For male employees in the private sector, average weekly total earnings were \$563.00 or 90.0% of male earnings in the public sector (\$625.30). For females, the corresponding figures were \$345.80 in the private sector, or 72.8% of female earnings in the public sector (\$475.00).

It is apparent that the gap in earnings between sectors is larger for females than for males. The main reasons for this difference are the large number of private sector females in the lower paid occupations including Salespersons and personal service workers, and the high number of public sector females in the Professional and Para-professional occupations. Another contributing factor is that the majority of part-time female employees are in the private sector.

Earnings by Industry

For full-time adult non-managerial employees, the highest average weekly total earnings were recorded in the following industries:

Males:

- Mining - \$911.20
- Construction - \$675.30
- Manufacturing (Basic metal products) - \$665.80

Females:

- Mining - \$600.00
- Community services - \$560.50
- Manufacturing (Basic metal products) - \$540.90

Industries recording the lowest estimates of average weekly total earnings were:

Males:

- Retail trade - \$472.20
- Recreation, personal and other services - \$483.50
- Manufacturing (Textiles; Clothing and footwear) - \$518.00

Females:

- Manufacturing (Textiles; Clothing and footwear) - \$390.30
- Retail trade - \$400.50
- Recreation, personal and other services - \$421.30

Diagrams 8.1 and 8.2 show the percentage change in average weekly total earnings between May 1990 and May 1991. The industries recording decreases in total earnings are those which recorded large decreases in overtime earnings.

DIAGRAM 8.1: PERCENTAGE CHANGE IN AVERAGE WEEKLY TOTAL EARNINGS: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, MAJOR INDUSTRIES, AUSTRALIA, MAY 1990 TO MAY 1991

DIAGRAM 8.2: PERCENTAGE CHANGE IN AVERAGE WEEKLY TOTAL EARNINGS: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, MANUFACTURING INDUSTRIES, AUSTRALIA, MAY 1990 TO MAY 1991

Average Weekly Hours Paid For

In May 1991, average weekly ordinary time hours for full-time adult non-managerial employees were 37.7 for males and 37.5 for females. Including overtime hours, the total weekly hours paid for were 40.3 for males and 38.1 for females.

The major occupation groups to record the highest average weekly total hours paid for were male Plant and machine operators, and drivers (42.7 hours) and female Labourers and related workers (39.0 hours). The lowest weekly total hours paid for were recorded for Professionals (males 38.0, females 37.3).

Ordinary time hours across all industries showed some variation, ranging from 36.4 hours for females in Electricity, gas and water, to 38.5 hours for males in Retail trade and Recreation, personal and other services. High estimates of total weekly hours were recorded for males in the Mining and Construction industries (43.0 hours) due mainly to the level of overtime hours paid for.

Differences in hours paid for between Sectors are most evident for overtime. Males worked, on average, 3.1 hours overtime in the private sector, double the level of overtime worked by their public sector counterparts (1.5 hours). Females in the private sector reported overtime hours of 0.7, while public sector females were paid for 0.4 hours of overtime.

AVERAGE WEEKLY TOTAL HOURS PAID FOR:
NON-MANAGERIAL EMPLOYEES

	Full-time	Part-time	Total
	-hours-		
<i>Adults</i>			
Males	40.3	16.4	37.9
Females	38.1	17.9	29.8
Persons	39.5	17.9	34.1
<i>Junior</i>			
Males	39.2	10.9	29.9
Females	38.4	11.5	24.9
Persons	38.8	11.3	27.2

EXPLANATORY NOTES

Introduction

This publication contains estimates obtained from a sample survey of employers conducted in May 1991. The survey is designed to provide statistics on the distribution of employees according to weekly earnings and hours, and on the composition of weekly earnings and hours for various categories of employees and principal occupations.

2. Preliminary estimates were published in *Distribution and Composition of Employee Earnings and Hours, Australia, May 1991, Preliminary* (6305.0) on 29 November 1991.

Scope of the survey

3. All wage and salary earners who received pay for the reference period are represented in the survey, except:

- members of the Australian permanent defence forces;
- employees of enterprises primarily engaged in agriculture, forestry, fishing and hunting;
- employees in private households employing staff;
- employees of overseas embassies, consulates, etc.;
- employees based outside Australia; and
- employees on workers' compensation who are not paid through the payroll.

4. Also excluded are the following persons who are not regarded as employees for the purposes of this survey:

- directors who are not paid a salary;
- proprietors/partners of unincorporated businesses; and
- self-employed persons such as subcontractors, owner/drivers, consultants and persons paid solely by commission without a retainer.

Survey design

5. A sample of approximately 9,700 employers is selected from the ABS register of businesses to ensure adequate State and industry representation. The statistical unit for the survey comprises all activities of an enterprise in a particular State or Territory. Each statistical unit is classified to an industry which reflects the predominant activity of the enterprise in the State or Territory. In a small number of cases where an enterprise has significant employment in more than one industry, a separate statistical unit is created for each industry. The statistical units are stratified by State, public/private sector, industry and size of employment, and a simple random sample is selected from each stratum.

6. Employers with fewer than 10 employees are required to complete details for every employee, while those with 10 or more employees are required to select a random sample of their employees in accordance with instructions supplied by the ABS. Data for approximately 73,000 employees was obtained in the survey.

7. Although the sample is not designed specifically to provide estimates of numbers of employees, it is estimated that 3,093,500 male and 2,453,800 female employees are within the scope of the survey. These and other estimates of numbers of employees included in this publication should be regarded only as indicative measures of total employment in the categories indicated.

Industry classification

8. Industry is classified according to the Australian Standard Industrial Classification (ASIC) 1983 Edition, Volume 1 — The Classification (1201.0). The following table shows details of the ASIC industries used in the publication (More detailed information may be available on request).

ASIC code		
Division	Sub-division	Title
B		Mining
C		Manufacturing
	21	Food, beverages and tobacco
	23,24	Textiles; Clothing and footwear
	26	Paper, paper products, printing and publishing
	27	Chemical, petroleum and coal products
	29	Basic metal products
	31,33	Fabricated metal products; other machinery and equipment
	32	Transport equipment
	25,28,34	Other manufacturing(a)
D		Electricity, gas and water
E		Construction
F		Wholesale and retail trade
	47	Wholesale trade
	48	Retail trade
G		Transport and storage
H		Communication
I		Finance, property and business services
J		Public administration and defence(b)
K		Community services
L		Recreation, personal and other services(c)

(a) Comprises wood, wood products and furniture (subdivision 25); glass, clay and other non-metallic mineral products (subdivision 28); leather, rubber and plastic products and manufacturing not elsewhere classified (subdivision 34). (b) Excludes permanent defence forces. (c) Excludes private households employing staff (subdivision 94).

NOTE: Division A, (Agriculture, Forestry, Fishing and Hunting) is excluded from the survey.

Occupation

9. Occupation is classified according to the Australian Standard Classification of Occupations (ASCO), based on the title and description of the job.

10. Care should be taken when comparing survey estimates based on ASCO groups with estimates based on the managerial/non-managerial status of employees, which is determined and reported by the employer. Estimates for employees with manager status include employees classified to ASCO categories other than the ASCO major group 'Managers and Administrators'; e.g. employees classified as Professionals according to ASCO may be categorised by employers as having managerial status. Conversely, tables in this publication which contain estimates for non-managerial employees (as defined by employers) will include some employees who would be classified to the ASCO major group 'Managers and Administrators'.

11. Details of ASCO can be found in ASCO: Statistical Classification — First Edition (1222.0), and an Information Paper: ASCO — Australian Standard Classification of Occupations, April 1991 (1221.0).

Comparability of results

12. Because of the substantially improved coverage of employers provided by the ABS register of businesses and modifications to some definitions, results from surveys conducted after 1981 are not strictly comparable with those for surveys conducted between 1974 and 1981.

13. Care should be taken when comparing the results of this survey with the quarterly series Average Weekly Earnings, States and Australia (6302.0), as a different sample design and survey methodology are used. The Average Weekly Earnings survey collects information relating to total employment of organisations selected in the survey, whereas results from the Employee Earnings and Hours survey are obtained in relation to a sample of employees within the organisations selected. In addition, the size of the sample for the Employee Earnings and Hours survey is much larger than that for the Average Weekly Earnings survey.

14. Because of the two stage sampling methodology used for this survey to arrive at a sample of employees, it is not possible to ensure that the representation of all the subgroups of interest in the sample accurately reflect their representation in the population.

15. Considerable care is taken in questionnaire design and in the instructions given to employers on how to select samples of their employees. All survey returns are subjected to careful editing to detect reporting errors, inconsistencies and transcription errors. Ultimately, however, the quality of survey results depends on the quality of the information provided by survey respondents and adherence to specified procedures.

Reliability of estimates

16. For information on the reliability of estimates see the Technical Note (Appendix A).

Related publications

17. Users may also wish to refer to the following publications which are available on request:

Employed Wage and Salary Earners, Australia (6248.0) — issued quarterly

Major Labour Costs, Australia (6348.0) — issued annually

The Labour Force, Australia (6203.0) — issued monthly

Occasional Paper No. 1986/1: Statistics on Wages, Earnings, Income and Labour Costs — A Guide to Their Concepts, Measurements and Usage.

18. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Unpublished statistics

19. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, computer printout or clerically extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made to Regina Camara on Canberra (06) 252 5325 or to Information Services in the nearest ABS office.

Symbols and other usages

- * subject to high relative standard error.
See the Technical Note
(Appendix A).

20. Estimates of earnings shown in the tables are rounded to the nearest 10 cents, and those of average

weekly hours paid for are rounded to the first decimal place.

21. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

APPENDIX A

TECHNICAL NOTE

Introduction

As the estimates in this publication are based on information relating to a sample of employers and employees, rather than a full enumeration, they are subject to sampling variability. That is, they may differ from the figures that would have been produced if the information had been obtained from all employers and all employees. This difference, called *sampling error*, should not be confused with inaccuracy that may occur because of imperfections in reporting by respondents or in processing by the ABS. Such inaccuracy is referred to as *non-sampling error* and may occur in any enumeration whether it be a full count or sample. Efforts have been made to reduce non-sampling error by careful design of questionnaires, detailed checking of returns and quality control of processing.

2. An asterisk appears against estimates in this publication where the sampling variability is considered too high for most practical uses. Generally, this indicates a relative standard error equal to or greater than 25 per cent of the estimate for Distribution tables and 10 per cent for Occupation tables.

Reliability of estimates

3. The sampling error associated with any estimate can be estimated from the sample results. One measure of sampling error is given by the *standard error*, which indicates the degree to which an estimate may vary from the value that would have been obtained from a full enumeration (the 'true' figure). There are about two chances in three that a sample estimate differs from the true value by less than one standard error, and about nineteen chances in twenty that the difference will be less than two standard errors.

4. Another measure of the sampling error is the *relative standard error*, which is obtained by expressing the standard error as a percentage of the estimate. Both measures are used in the following discussion of the reliability of the estimates.

5. As it is not practicable to include the standard errors of all estimates in this publication, Tables A, B, C and D have been produced to give an indication of the magnitude of relative standard errors.

Distribution (Tables 1-2, 7-10)

6. These distribution tables are based on estimates of numbers of persons in various ranges of earnings and hours. Table A on page 63 provides an indication of the magnitude of the standard error of estimates of numbers of employees for different employment estimates. An example of the use of the table in relation to Table 1 is as follows: the estimate for the earnings range \$360.00 to \$380.00 for Victorian males is 2.4 per cent of the total

number of Victorian male employees. This represents approximately 21,200 males. The relative standard error of this estimate is 11.7 per cent (or approximately 2,500 males). There are about two chances in three that a complete collection would have given a figure within the range 18,700 to 23,700 and about nineteen chances in twenty that the figure would have been within the range 16,200 to 26,200.

Average earnings and hours (Tables 3, 5-6, 12-13, 16, 18-20, 22)

7. Tables B, C and D show relative standard errors for some estimates of average weekly earnings (both: total and overtime). An example of the use of Table D is as follows: the estimated average total weekly earnings of full-time adult non-managerial males in the Retail trade industry is shown in Table 12 as \$472.20. Table D shows the relative standard error on this estimate to be 2.1 per cent (or approximately \$9.90). There are about two chances in three that a complete collection would give a figure within the range \$462.30 to \$482.10, and about nineteen chances in twenty that the figure would be within the range \$452.40 to \$492.00.

Occupation (Tables 4, 11, 14-15, 17, 21)

8. Occupation or occupation groups for which the relative standard error is equal to or greater than 10 per cent are highlighted with an asterisk.

9. The following notes give indications of relative standard errors which are not covered above.

Private/public sector. Relative standard errors relating to estimates of the private or public sector only are generally slightly higher than those for the private and public sectors combined.

Full-time adult employees. Relative standard errors are approximately the same as for full-time adult non-managerial employees (Tables B, C and D).

Full-time adult managerial employees. Relative standard errors are slightly higher than those for full-time adult non-managerial employees (Tables B, C and D).

Part-time adult non-managerial employees. Relative standard errors are generally 4 percentage points higher for males and 2 percentage points higher for females than those for full-time adult non-managerial employees (Tables B, C and D).

Average weekly hours paid for. Relative standard errors of average weekly ordinary time hours paid for and average weekly total hours paid for are generally much lower than the corresponding figures shown in the table for average weekly ordinary time earnings and average weekly total earnings.

APPENDIX B

GLOSSARY

Adult employees are employees 21 years of age or over and those employees who, although under 21 years of age, are paid at the full adult rate for their occupation.

Award pay or agreed base rate of pay refers to the award pay or agreed rate of pay for ordinary time hours paid for. For employees covered by an award it includes all allowances (dirt, height, tool, etc.) and penalty payments (e.g. shift loadings) specified in the award. It excludes overaward pay and service increments not specified in the award. For employees not covered by an award, agreed base rate of pay is the agreed wage for ordinary time hours paid for.

Employees refers to all wage and salary earners (as defined in paragraphs 3 and 4 of the Explanatory Notes) who received pay for any part of the reference period.

Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

Industry is classified according to the Australian Standard Industrial Classification (see Explanatory Notes paragraph 8).

Junior employees are those employees who are not adults as defined.

Managerial employees are adult managerial, executive and professional staff, generally defined as those employees who are ineligible to receive payment for overtime, or, although subject to payment for overtime, are in charge of a significant number of employees in a separate establishment.

Mean (or average) earnings or hours refers to the amount obtained by dividing the total earnings or hours of a group (e.g. full-time employees) by the number of employees in that group.

Median earnings or hours refers to the amount which divides the distribution into two equal groups of employees, one half having amounts below the median and the other half having amounts above it.

Non-managerial employees are those who are not managerial employees as defined.

Occupation is classified according to the Australian Standard Classification of Occupations (ASCO) (see Explanatory Notes paragraphs 9 to 11).

Ordinary time hours paid for refers to employees' award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours of work,

and that part of annual leave, paid sick leave and long service leave taken during the reference period.

Overaward pay refers to amounts of ordinary time pay (regular or otherwise) that are over the award (e.g. attendance, good time-keeping, profit-sharing, etc.). It excludes payments in the form of a reimbursement for expenses incurred whilst carrying out the employer's business (e.g. payments from petty cash).

Overtime hours paid for refers to hours in excess of award, standard or agreed hours of work.

Part-time employees are those who are not full-time employees as defined.

Payment by measured result refers to earnings which vary according to measured performance (e.g. piecework, production and task bonuses, and commission).

Percentiles refer to any of a hundred divisions of an earnings or hours series. For example, 25 per cent of employees earn less than or equal to the 25th percentile and 75 per cent of employees earn less than or equal to the 75th percentile.

Reference period for the survey refers to the last pay period ending on or before 17 May 1991.

Sector. Public sector includes local government authorities and all government departments and agencies created by, or reporting to, the Commonwealth or State Parliaments. All remaining employees are classified as private sector.

Size of firm. The size classification reflects total number of employees of an enterprise in a particular State/Territory and not necessarily the size of an enterprise Australia wide.

Weekly ordinary time earnings of employees refers to one week's earnings for the reference period attributable to award, standard or agreed hours of work. It is calculated before taxation and any other deductions (e.g. superannuation, board and lodging) have been made. Included in ordinary time earnings are award payments, base rates of pay, overaward payments, penalty payments, shift and other allowances; commissions and retainers; bonuses and similar payments related to the reference period; payments under incentive or piecework; payments under profit-sharing schemes normally paid each pay period; payments for leave taken during the reference period; all workers' compensation payments made through the payroll; and salary payments made to directors. Excluded are overtime payments, retrospective pay, pay in advance, leave loadings, severance pay, termination and redundancy payments and other payments not related to the reference period.

Weekly overtime earnings of employees refers to payment for hours in excess of award, standard or agreed hours of work.

Weekly total earnings of employees is equal to weekly ordinary time earnings plus weekly overtime earnings.

Weekly total hours paid for refers to the hours for which payment was made. It comprises ordinary time hours and

overtime hours. For employees paid other than weekly, hours were converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the reference period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Hours of work were not reported for managerial employees.

APPENDIX C

ADDITIONAL DATA AVAILABLE ON REQUEST

A large range of unpublished data is available from the Survey of Employee Earnings and Hours on request. This data can be produced for clients as customised reports. The populations and variables are listed below.

A. HOW TO PLACE AN ORDER

Firstly, determine the population (from C below) and the variables (from D) that you require estimates for. A covering letter indicating these requirements and the uses of the data requested should be returned to:

Assistant Director
Labour Income and Disputes Sub-section
Australian Bureau of Statistics
P.O. Box 10
Belconnen ACT 2616

B. CONTACT OFFICER

If you wish to discuss individual requests, especially in regard to the reliability of estimates for particular cross-classifications, and the charges involved, please phone Regina Camara on Canberra (06) 252 5325.

C. POPULATIONS

The variables listed below are available in respect of each of the following populations:

D. VARIABLES

The following variables are available from this survey (subject to the reliability of the estimates).

Distribution of employees by levels of:

Weekly total earnings
Weekly ordinary time earnings
Weekly overtime earnings

Weekly total hours paid for
Weekly ordinary time hours paid for
Weekly overtime hours paid for

Composition of earnings

Average weekly total earnings
Average weekly ordinary time earnings
Award or agreed base rate of pay (includes allowances)
Overaward pay
Payment by measured result
Overtime

Average hourly earnings

Note: Earnings and hours ranges can be specified to suit individual requirements.

Composition of hours paid for

Average weekly total hours paid for
 Average weekly ordinary time hours paid for
 Average weekly overtime hours paid for

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data are available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC-AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
