## EXPLANATORY NOTES

## Introduction

This publication contains monthly and year-to-date statistics of Australia's exports classified by Divisions (2 digits) and Items (5 digits) of the Australian Export Commodity Classification (AEC) (1203.0). Statistics for 1983-84 and 1984-85 may be amended as a result of continuing quality checks on foreign trade data. Although these amendments usually have little effect on broad aggregate statistics, they may have a significant effect on individual commodity statistics. For this reason, statistics for 1983-84 and 1984-85 should be considered preliminary and subject to revision.

2. Statistics at the Section (1 digit) level are available in the ABS publication Exports by Commodity Divisions, Australia (5402.0).

## Source of data

3. These statistics are compiled by the Australian Bureau of Statistics from information contained in export entries and returns submitted by exporters or their agents to the Australian Customs Service as required by the Customs Act.

## Statistical concepts

4. The statistics of exports presented in this publication are recorded on a general trade basis, i.e. export figures include both Australian produce and re-exports.

5. Australian produce is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

6. Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged. The values of re-exports are shown in Table 4. Minor operations include blending, packaging, bottling, cleaning, sorting, husking, and shelling.

7. The following are excluded from recorded export statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) migrants' and passengers' effects exported and parcels post exports of small value, for which Customs entries are not required;
- (c) certain materials under inter-governmental agreements for defence and similar projects for which Customs entries are not required;
- (d) vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries;
- (e) the sale of any vessel and/or aircraft originally purchased for use on overseas routes;
- (f) fish and other sea products landed abroad directly from the high seas by Australian vessels;
- (g) export consignments where the value of the goods in each transaction is less than \$250.

8. Ships' and aircraft stores. Prior to July 1982 bunkers and stores supplied to foreign owned vessels and aircraft prior to departure overseas were excluded from export statistics but were published separately as ships' and aircraft stores statistics. The United Nations Statistical Commission has recommended (International Trade Statistics, Concepts and Definitions, United Nations Statistical Papers, Series M, No 52, Revision 1, 1982) that such bunkers and stores be included in total export statistics. Accordingly, commencing with July 1982 statistics, these commodities have been classified according to the appropriate AEC items. As a result, from July 1982 total export statistics and commodity statistics which include stores for foreign ships and aircraft are not strictly comparable with data for earlier periods.

## Statistical period

9. Exports are recorded statistically in the month when the entries are both finalised by the Australian Customs Service and passed to the ABS for further processing. Regular exporters or their agents may provide details of their export shipments on a periodic rather than an individual shipment basis by submitting weekly or monthly returns. These "periodic returns" must be submitted to the Australian Customs Service within seven days of the end of the period in question covering all shipments during that period. All other exporters are required to report each individual shipment prior to the ship's departure. Approximately 90 per cent of monthly export values are recorded on periodic returns. The statistical month for Customs outports (generally ports other than those at which the main Customs office in each state is located) closes on the 21st of each month, whereas for mainports the statistical month is the calendar month.

10. Because of these factors, export statistics for a particular month do not necessarily represent entries lodged or commodities actually exported during that month. Analysis of past data has shown that in aggregate approximately 30 per cent of export trade by value for a particular month reflects actual shipments during that month, 60 per cent by value was actually exported during the previous month with the remaining 10 per cent by value exported in earlier months. For individual commodities the percentage by value representing actual exports in a month may vary considerably.

## Valuation

11. Goods actually sold to overseas buyers prior to shipment are valued at the free-on-board (f.o.b.) Australian port of shipment equivalent of the actual price at which the goods were sold. Goods shipped on consignment are valued at the f.o.b. Australian port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods are despatched for sale.

12. The recorded value of exports includes the value of the outside package, other than international containers used for containerised cargo.

## Merchandise exports

13. In accordance with standards recommended by the United Nations Statistical Commission, merchandise exports are defined as all goods which subtract from the stock of material resources in Australia as a result of their movement out of the country. Merchandise exports, therefore, exclude goods exported with the reasonable expectation of their re-import within a limited time. A complete list of commodities not included in merchandise trade is shown under Section 9(b) of the AECC. These include, for example, coin being legal tender and goods for temporary exhibition outside Australia. Goods excluded from merchandise trade are, for convenience, termed non-merchandise and non-merchandise trade is shown separately in some tables. Total trade is the sum of merchandise and non-merchandise trade.

14. Classification changes affecting the levels of merchandise and non-merchandise trade were introduced on 1 July 1983, in accordance with recommendations of the United Nations Statistical Commission (International Trade Statistics, Concepts and Definitions, United Nations Statistical Papers, Series M, No 52, Revision 1, 1982). As a result, statistics of exports, from July 1983, under Sections 9(a) and 9(b) of the AECC are not comparable with previous years. The changes do not affect Sections 0 to 8 of the classification, nor total trade. Further information about the changes was given in the 1983-84 edition of the AECC, or may be obtained from the ABS Trade and Shipping Section in Canberra.

## Commodity classification

15. Exports are classified according to the items of the AECC which, from 1 July 1978, has been based on the Standard International Trade Classification, Revision 2 (United Nations, Statistical Papers, Series M, No. 34, Revision 2, 1975). A detailed description of the commodity items included in this publication is contained in the AECC. Copies of, or extracts from, this classification may be obtained from offices of the ABS in Canberra and in each capital city.

## Broad economic categories

16. Exports of merchandise in Table 6 are classified according to the nineteen

categories of the United Nations' classification, Broad Economic Categories (BEC). The BEC attempts to classify foreign trade statistics for the purposes of general economic analysis according to the main end use of the commodities traded. Figures for previous years have been compiled and are available on request.

#### ASIC industry of origin

17. Export statistics classified by Subdivisions of the Australian Standard Industrial Classification (ASIC) are shown in Table 5. The statistics are compiled by allocating statistical items of the AEC to the ASIC industry of origin with whose main economic activities the commodities are primarily associated. A full description of ASIC Classes is contained in the publication Australian Standard Industrial Classification, Vol.1 - The Classification (1201.0).

#### Country

18. For the purposes of foreign trade statistics, a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with Australian Customs provisions. External territories under Australian administration are treated separately whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian foreign trade statistics. For exports, country refers to the country to which the goods are consigned at the time of export. Where the country of consignment is not determined at the time of export, goods are recorded as exported "For orders" and in those cases where it is found to be impossible to determine the destination, as "Destination unknown".

#### State

19. From 1 July 1978, State statistics comprise the State of origin for Australian produce and State of final shipment for re-exported goods. State of origin is defined as the State in which the final stage of production or manufacture occurs. Previously "State" referred to the State in which the export document was lodged with the Australian Customs Service. Because of this change, figures from 1 July 1978 are not directly

comparable with those for previous periods.

#### Treatment of confidential data

20. To ensure that information about the activities of particular businesses is not disclosed it is necessary to restrict the release of statistics of certain commodities. These restrictions do not affect total export figures but they can affect statistics at all levels of the Australian Export Commodity Classification.

21. The implementation of a new foreign trade processing system has resulted in a revised treatment of confidential data. Consequently certain statistics in publications first containing March 1982 data are not directly comparable with statistics in previous publications.

22. Reference to table footnotes should assist in the interpretation of these differences.

#### Revision to previous figures

23. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this publication. For this reason, monthly figures published in previous issues for the current financial year will not necessarily add to the year-to-date figures shown in the latest issue.

24. Statistics shown in this publication were the latest available at the time of compilation. However, revisions may have since been made to the statistics, which could result in differences between figures in this publication and those in other related publications, e.g. Exports by Commodity Divisions, Australia (5402.0).

#### OTHER INFORMATION AVAILABLE

25. Special returns service: Subscribers to this service can receive computer produced printout of foreign trade statistics at a particular commodity level in one or more of a limited number of formats, for a charge consistent with the level of detail

required. This service is recommended where up to fifty specific commodity items are required on a regular basis.

26. Microfiche service: Foreign trade statistics are also available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported, at various levels of aggregation. This service is recommended where the subscriber wishes to obtain foreign trade details for a large number of commodities.

27. Magnetic tape: Statistics for imports, exports and import clearances are available on 9-track magnetic tape approximately 4 weeks after the end of the reference period. Documentation regarding the content and structure of these tapes is available from the ABS Trade and Shipping Section in Canberra.

28. To meet subscribers' needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Relevant application forms and information papers for these services are available from the ABS Trade and Shipping Section in Canberra or any ABS State office. Payment in advance is required for each of these services.
