MONTHLY BULLETIN OF PRODUCTION STATISTICS

No. 245
FEBRUARY 1969

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS
CANBERRA, AUSTRALIA

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

CANBERRA, AUSTRALIA

MONTHLY BULLETIN OF PRODUCTION STATISTICS

NO. 245 FEBRUARY 1969

EXPLANATORY NOTES

This bulletin contains statistics of production in Australia of mines and factory products. Production statistics for the Australian Capital Territory and the Northern Territory have been included from July 1968. An alphabetical index of these products is given on pages 2, 3 and 4.

2. The following details are shown for each product:

- (a) Annual totals for the last three complete financial years;
- (b) Totals for the most recent six-monthly and three-monthly periods;
- (c) Totals for the corresponding periods, twelve months earlier;
- (d) Monthly details for each of the latest fourteen months, where available.

3. The figures for the years 1965-66 and 1966-67 are mostly derived from Annual Factory Census returns collected by the Deputy Commonwealth Statistician in each State. In a small number of cases returns are accepted from factories for a year other than the normal financial year ending on 30 June.

4. The monthly figures are also based for the most part on returns collected by the Deputy Commonwealth Statisticians. Where another authority is the source, this is shown in a footnote. Monthly figures from July 1967 onwards may be revised when the results of the Annual Factory Census for 1967-68 become available.

5. For the purpose of factory statistics collections, a factory is taken to be a manufacturing establishment in which four or more persons are employed or in which power other than manual is used. Any production in small establishments not classified as factories is not included in the figures shown.

6. Further details in respect of many of the items will be found on an annual basis in Principal Factory Products and in the series of Manufacturing Industries Bulletins published by this Bureau, and on a monthly basis, in the Monthly Production Summaries, also issued by this Bureau.

7. This bulletin contains data of monthly output of over 350 products. The items for which quantity of output is published are not, however, selected as representative of all factory output, and the tables should be read only as showing monthly trends in output of the individual items or groups of items listed.

8. The bulletin contains seasonally adjusted statistics of several items. In the seasonal adjustment, account has been taken not only of normal seasonal factors but also of "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of Easter and Australia Day which may, in successive years, affect figures for different months. Details of the methods used in seasonally adjusting these and other series are given in "Seasonally Adjusted Indicators 1968" (Ref. No. 1.10) issued on 21 May 1968.

9. It has not been possible as yet to develop current monthly or quarterly indexes of factory production.

10. Most items are identified by Commodity Codes which are derived from the Commodity Classification used in Australian Factory Statistics. In some cases where data is derived from sources other than Factory Collections, no Commodity Code is shown.

EXPLANATORY NOTES - continued

11. Any discrepancies between totals and sums of components in tables are due to rounding.

The following symbols are used in this bulletin:

n.a.	Not available
r	Figures or series revised since previous issue.
..	Nil or less than half of the final digit shown.
_____	Break in continuity of series (where drawn across a column).
	A blank space in a column of figures means that the figure concerned is not yet available.

(a) Year ended 31 May for all items except iron ore pellets. (b) Primary origin only. Except for gold, non-ferrous refined metal production data are collected by the Bureau of Mineral Resources. (c) Gross wet weight. (d) Includes recovery from scrap. (e) See para. 8, page 1, Explanatory Notes. (f) Includes lead content of lead alloys from primary sources but excludes lead-silver bullion produced for export. (g) Newly-won gold of Australian origin. Source: Reserve Bank. (h) Not available for publication.
