PRODUCTION SUMMARY No. 43: STOCK AND POULTRY FOODS AND CANNED PET FOOD AUSTRALIA: SEPTEMBER 1976

All annual figures are derived from the recorded monthly production and are subject to revision.

As from July 1975 production statistics exclude production of single establishment manufacturing enterprises employing less than four persons and production of establishments predominantly engaged in non-manufacturing activities but which may carry on, in a minor way, some manufacturing.

However, except for a few commodities, the effect on production levels and movements is marginal. An indication of the approximate magnitude of the break in comparability may be obtained by comparing annual 1974-75 data which are shown in this publication on both the old and the new basis. Monthly data from July 1975 to January 1976 have also been adjusted on the new basis.
