NOTE: Freight and insurance charges payable overseas are not included above. These were estimated at £118.6 million for the year ended June, 1957.

Statistics relating only to overseas trade do not measure Australia's total Balance of Payments during the periods shown. Particulars of other transactions entering into the balance of payments (in particular, freight and insurance charges payable overseas, current production of Australian gold, overseas payments of dividends, profits, interest and royalties, Government expenditure overseas, etc.) are shown in a printed bulletin published by the Commonwealth Statistician entitled "The Australian Balance of Payments 1926-29 to 1951-52". Current estimates for the years 1951-52 to 1956-57 have been published in mimeographed form. For items such as naval ships, merchant vessels trading overseas, aircraft for use on overseas routes and certain materials for intergovernmental defence projects, no customs entries are recorded but these transactions are taken into account in estimating Balance of Payments.
