

# **MR. MUNDEY — EXPOSÉ**

## **THE SIGNIFICANCE BEHIND HIS PRESS AND T.V. BUILD UP**

Mr. Munday has achieved some fame in Australia as the champion of green bans. He has received wide publicity because he resigned an official union position to return to work as an ordinary builders' labourer. Many people think both actions are very commendable. In certain ways they are. Certainly green bans ought to be used in proper cases to prevent destruction of the environment. It is also good that union officials return for periods to manual work.

If it were all left at that in Mr. Munday's case, all would be well. But other questions must be asked. The main question is — For whom does Mr. Munday do all this? Does he do it for the builders' labourers and other workers, or is there some deeper significance in it?

### **IT IS A FACT**

that Mr. Munday has

- Appeared on TV about 4 times a week;
- Featured in the press on almost everyday;
- Been paid handsomely for his services;
- Become a member of the government's City Commission Advisory Committee,
- Been appointed to an executive position on the Australian Conservation Foundation;
- Received large honorariums for these positions.

## **MR. MUNDEY — FRIEND OF THE RULING CLASS**

It is vital to the capitalists to have "leaders" in the working class upon whom they can absolutely rely. Thus the capitalist class has promoted a new "left". Such people as Hawke, Munday and Halfpenny are taken up and made famous. Since Hawke's ability to deceive has waned, Mr. Munday has been singled out for special promotion.

It is inconceivable that the ruling class would give such prominence to any person if he was a true Communist and a sincere fighter for the working class movement.

What better for the ruling class than to promote as a Communist, one who has guaranteed, in advance, never to harm capitalism.

Mr. Munday, in spite of all his talk, functions as a diversion to the overthrow of capitalism.

It is important, that the workers are not diverted by the Hawkes, Mundeys and Halfpennies. The workers have big struggles to make the rich pay, and to make Australia independent.

An essential part of this struggle, is to get rid of the darlings of capitalism.
