## PRODUCTION SUMMARY NO. 42 : MALT AND BEER

JULY 1969

The figures for 1966-67 and 1967-68 are those recorded in the Annual Factory Census. All subsequent figures are derived from the recorded monthly production and are subject to revision. This summary contains seasonally adjusted statistics of beer. In the seasonal adjustment, account has been taken not only of normal seasonal factors but also of "trading-day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of Easter and Australia Day which may, in successive years, affect figures for different months. Details of the method used in seasonally adjusting this and other series are given in "Seasonally Adjusted Indicators - 1969" (Ref. No. 1.10).
