EXPLANATORY NOTES

Introduction

This publication provides information relating to the structure of operating units in agricultural industries during 1984-85. The statistical framework on which these statistics are based differs slightly from that used in years prior to 1982-83. Nevertheless, the unit definitions used and the industry and sizing classification employed are very similar to those previously used and are described below.

Economic units

2. The information contained in this publication has been produced from data collected in the annual Agricultural Census which is conducted within the framework of economic units used by the Australian Bureau of Statistics for statistical collections from industries. The economic units, in hierarchical order, are:

Enterprise Group — The highest level in the system. The enterprise group is a unit comprising all operations in Australia of a group of legal entities under common ownership and control. Any legal entity operating wholly outside Australia is excluded. Where entities operate partly outside Australia, only those operations in Australia are included.

Enterprise — The second level in the hierarchy of economic units. The enterprise is that unit comprising all operations in Australia of a single operating legal entity. The term 'single legal entity' means a sole trader, partnership, company, trust, co-operative or estate in the private sector; or a department, local government authority or statutory authority in the public sector. A 'multi-State enterprise' is an enterprise which operates establishments in more than one State.

Establishment — The smallest economic unit in the system. The establishment covers all operations carried out by one enterprise at a single physical location. For the agricultural sector, a physical location has been interpreted to mean each individual agricultural holding. However, where two or more holdings in the one local government area (county in South Australia) are operated under one management, the holdings are combined to form one establishment.

3. Prior to 1982-83, a separate register (the Integrated Agricultural Register (IAR)) was maintained of economic units operating in the agricultural sector. In 1982, this register was merged with the Bureau's central register of economic units (the Integrated Register Information System (IRIS)) covering other sectors of industry in Australia. Unfortunately, as a result of this merging, it has been possible to provide information on the structure of agricultural industries on the basis of the establishment unit only for the years 1982-83 and 1983-84. For 1984-85, however, the enterprise series has been re-introduced on the basis of information recorded on IRIS. Discrepancies with the previous series, based on the IAR, have been identified suggesting caution should be exercised in relating 1984-85 enterprise statistics with those of earlier years.

Industry and size classification

4. Establishments within the agricultural sector have been classified in accordance with the methodology used in the 1983 edition of the *Australian Standard Industrial Classification* (ASIC), continuing the practice commenced with the 1978-79 issue of this publication. A list of industries in the ASIC which relate to *Subdivision 01: Agriculture* is given in the table on page 2.

5. The basic method for determining the industry class of an economic unit is the 'step by step' method of classification described in Chapter 4 of the *Australian Standard Industrial Classification* (1201.0). Certain departures from this basic method are outlined in the descriptions of individual classes within *ASIC Subdivision 01: Agriculture*. The basic method requires that the ASIC Division code of the unit be determined first. The ASIC Subdivision code within the major ASIC Division of the unit is then determined, followed by the ASIC Group code and finally the ASIC Class code of the unit.

6. The ASIC Group and Class codes of agricultural units are determined annually by valuing crop and livestock activity undertaken by each unit (as reported in the Agricultural Census), assessing that unit's **PREDOMINANT ACTIVITY** according to the derived estimated value and then attributing the unit to the ASIC Group and Class appropriate to that activity. The aggregation of derived values for all crop and livestock activity for each unit is termed the **ESTIMATED VALUE OF AGRICULTURAL OPERATIONS (EVAO)**. It should be clearly noted that EVAO is applicable **ONLY FOR INDUSTRY CODING AND SIZE VALUATION PURPOSES**. It is **NOT** a true indicator of receipts obtained by units nor of the value of agricultural commodities produced by these units.

Comparison with previous periods

7. After a lapse of two years, enterprise statistics have been re-introduced in this publication for 1984-85. From 1974-75 to 1981-82 enterprise statistics were derived direct from the IAR; for 1984-85 enterprise statistics have been obtained from IRIS. In 70 instances the enterprise unit did not have an industry classification. These units are shown as "Not classifiable" in this publication. Register maintenance procedures are currently under examination with the intention of eliminating or at least minimising this type of occurrence.

8. Prior to 1984-85, valuation procedures used to determine EVAO utilised three year weighted average prices. This practice has been discontinued and from 1984-85, current year prices only have been used in the calculation of EVAO.

9. The statistics shown in this publication relating to establishments cover all establishments in the Agricultural Census, which had or were expected to have an EVAO of \$2,500 or more, and which were classified to either agricultural or non-agricultural industries. Similarly, enterprise statistics refer to the number of enterprises, which had or were expected to have an EVAO of \$2,500 or more, and which were classified to either agricultural or non-agricultural industries on IRIS.

Australian Standard Industrial Classification (1983 Edition)

Division, Subdivision, Group and Class Titles

DIVISION A : AGRICULTURE, FORESTRY, FISHING AND HUNTING

Subdivision	Group	Class	Title
01			AGRICULTURE
	012		Poultry
		0124	Poultry for Meat
		0125	Poultry for Eggs
	013		Fruit
		0134	Grapes
		0135	Plantation Fruit
		0136	Orchard and Other Fruit
	014		Vegetables
		0143	Potatoes
		0144	Vegetables (except Potatoes)
	018		Cereal Grains, Sheep, Cattle and Pigs
		0181	Cereal Grains (incl. Oilseeds not elsewhere classified)
		0182	Sheep—Cereal Grains
		0183	Meat Cattle—Cereal Grains
		0184	Sheep—Meat Cattle
		0185	Sheep
		0186	Meat Cattle
		0187	Milk Cattle
		0188	Pigs
	019		Other Agriculture
		0191	Sugar Cane
		0192	Peanuts
		0193	Tobacco
		0194	Cotton
		0195	Nurseries
		0196	Agriculture not elsewhere classified

Definitions

10. Following are definitions of terms used in the tables of this publication:

Agricultural enterprise is an enterprise which is engaged MAINLY in agricultural activities.

Agricultural establishment is an establishment which is engaged MAINLY in agricultural activities.

Establishment with agricultural activity is a land-based establishment which is engaged in agricultural activity regardless of the unit's predominant activity.

Estimated Value of Agricultural Operations is rounded to nearest \$'000.

Related publications

11. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

SUMMARY OF FINDINGS

The number of agricultural establishments decreased by 1.48% (or 2,584) from 174,025 to 171,441 between 1983-84 and 1984-85. Establishments with agricultural activity showed a similar trend decreasing by 1.34% (or 2,351) to 173,061 over the same period.

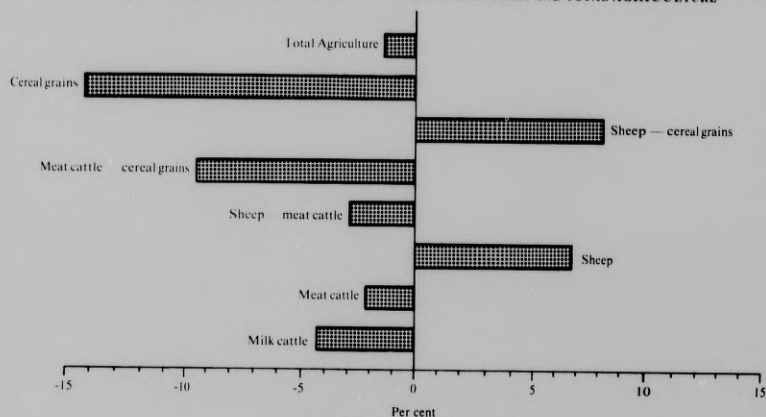

The main industries contributing to the overall decrease in agricultural establishments are Meat cattle (-691), Meat cattle-cereal grains (-452), Milk cattle (-858), Sheep-meat cattle (-299) and Cereal grains (-3,204).

The large decrease in the Cereal grains industry has been compensated for by the increase in the Sheep (1,483) and Sheep-cereal grains (1,807) industries.

The number of enterprises operating establishments with agricultural activity during 1984-85 was 168,058. Information on enterprises operating establishments with agricultural activity was last produced in respect of 1981-82.

Due to changes brought about by the transfer of the Agricultural Census population to a new register, analysis of trends in the structure of agricultural industries over time must be treated with some caution.

PERCENTAGE CHANGE IN THE NUMBER OF AGRICULTURAL ESTABLISHMENTS OPERATING IN AUSTRALIA BETWEEN 1983-84 AND 1984-85, SELECTED AGRICULTURAL INDUSTRIES AND TOTAL AGRICULTURE
