

AUSTRALIAN BUREAU OF STATISTICS

*Monthly Review
of Business Statistics
September 1977*

Prepared under instructions from
the Right Honourable the Treasurer
by R. J. Cameron, *Australian Statistician*

*Reference No. 1304.0
(Previously Ref. No. 1.4)*

INQUIRIES

If you want to know more about these statistics ring Mr John Brain on Canberra 526628 or our State office or write to Information Services, Australian Bureau of Statistics, P.O. Box 10, Belconnen, A.C.T. 2616.

ABS PUBLICATIONS

A complete list of publications issued by the ABS is given in *Catalogue of Publications* available free from the Australian Statistician.

Publications dealing with individual States are produced by the Deputy Commonwealth Statistician in each State.

SYMBOLS AND USAGES

The following symbols, where shown in columns of figures or elsewhere in tables mean

- n.a. not available.
- .. nil or less than half the final digit shown, or not applicable.
- p preliminary - figure or series subject to revision.
- r figures or series revised since previous issue.
- break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available.

Yearly periods shown as, e.g., 1976, refer to the year ended 31 December 1976, those shown as, e.g., 1976-77, refer to the year ended 30 June 1977.

Any discrepancies between totals and sums of components in tables are due to rounding.

Values are shown in Australian dollars (\$) or cents (c).

SEASONALLY ADJUSTED INDICATORS

In the Contents, page one, page numbers of series containing seasonally adjusted indicators are marked with asterisks.

Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1977* which contains original and seasonally adjusted data in tabular and graphical form for one hundred and eleven selected series. The seasonally adjusted indicators included therein are up-dated in relevant monthly and quarterly publications of the ABS.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Review have been adjusted for the effects of some calendar irregularities, namely: 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of moveable holidays, i.e., Easter and Australia Day. The adjustments made to each series are indicated in Appendix C of *Seasonally Adjusted Indicators 1977*.

(a) Excess of births registered over deaths registered. (b) Excess of recorded overseas arrivals over recorded overseas departures excluding short term (less than one year) movement. Minus sign (-) denotes an excess of departures over arrivals. (c) Increase consists of natural increase, net overseas migration gain and an adjustment to make the series of increases agree with the total intercensal increase revealed by successive censuses. (d) Subject to revision. (e) See footnote (b) to table above.

NOTE. Population estimates have been provisionally revised to take into account under-enumeration of the 1971 and 1976 Censuses and a change of estimation method for net migration. Population growth due to net migration excludes the effect of overseas arrivals and departures classified as short-term, i.e. trips lasting less than a year. Formerly account was taken of all arrivals and departures.

OVERSEAS ARRIVALS AND DEPARTURES (a)

Permanent movement — persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad.

Long-term movement — arrival of visitors and temporary departure of residents with the stated intention of staying (in Australia or abroad respectively) for twelve months or more and the departure of visitors and return of Australian residents who have stayed (in Australia or abroad respectively) for twelve months or more.

Short-term movement — all other overseas arrivals and departures.

These statistics exclude crew members, transit passengers passing through Australia who are not cleared for entry and passengers on short pleasure cruises commencing and finishing in Australia on ships not then engaged in regular voyages.

(a) The estimates are based on benchmarks derived from the results of the 1971 population census and other relevant sources. For the period subsequent to the census the employment data are obtained from three main sources, namely (i) current payroll tax returns, (ii) current returns from Government bodies, and (iii) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. Month-to-month changes shown by current returns are linked with the benchmark data to derive the monthly estimates. At June 1971 recorded employment obtained from the foregoing sources accounted for about 90 per cent of the total number of employees in the industries covered, as determined by the census. The estimates shown are based on the Australian Standard Industrial Classification. For further details on these series see *Employment and Unemployment* (Reference No. 6.4) published monthly. (b) Estimates for private and government have been revised back to June 1975 following the reclassification to government of certain hospitals and marketing bodies previously classified to private. For further details see February 1977 issue of *Employment and Unemployment* (Reference No. 6.4). (c) Affected by industrial disputes.

(a) Vacancies which employers claimed were available immediately or would be available by the end of the following calendar month. (b) At Friday nearest end of month. (c) Includes Australian Capital Territory. (d) Juniors comprise all persons under 21 years of age, including school leavers.

Note: Sample surveys have been conducted by the Australian Bureau of Statistics in March each year since 1974 to obtain information on the level and composition of job vacancies. To reduce to a minimum the delay in collection of data and publication of the results a quarterly telephone survey in respect of vacancies was commenced in May 1977. These surveys will be conducted in February, May, August and November each year. For a number of reasons the estimates obtained from these surveys differ substantially from the numbers of vacancies registered with the C.E.S. at those dates. For example, the survey estimate of total vacancies at May 1977 was 39,700 while the C.E.S. figure was 19,894. Results of the surveys and reasons why the survey estimates differ from C.E.S. statistics were published in *Job Vacancies, May 1977* (Reference No. 6.69).

INTERNAL TRADE

VALUE OF RETAIL SALES (a) (\$ million)

Retail sales figures in the table below relate principally to sales to the final consumer of new and used goods for personal and household purposes. The series covers retail sales by all establishments included in the Australian Standard Industrial Classification subdivision 48 except motor establishments, bread and milk vendors, footwear repairers and household electrical appliance repairers. The following establishments are also included: cafes and restaurants, licensed hotels, motels and wine saloons, licensed clubs and hairdressers. The estimates are obtained from a survey based on the 1973-74 Census of Retail Establishments. For further explanation see *Retail Sales of Goods* (Reference No. 11.4) March quarter 1977.

(a) Owing to insufficient information it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles and all such machinery is treated as capital equipment whether imported in an assembled or unassembled condition. (b) Includes replacement parts, completely knocked-down vehicles and components for the assembly of motor vehicles. (c) Excludes a percentage of piece-goods to be sold by retail, and paper to be used solely for wrapping, which are recorded in Classes V.I.E-J and III, respectively. (d) Excludes crude petroleum which is included in Class I.C(1-4). (e) Includes a percentage of paper used solely for wrapping, see note (c). (f) Figures from July 1976 are not comparable with previous months because of the change in the basis of valuation of imports to the internationally recognised Brussels Definition of Value. (g) Completely knocked-down vehicle components for the assembly of motor vehicles and replacement parts are recorded in Class I.C(5). (h) Includes a percentage of piece-goods to be sold by retail, see note (c) above. (i) Seasonally adjusted figures for 1976-77 are derived from the estimated values of total imports on the old basis of valuation.

(a) Weighting pattern as at 1966-67. These percentages may be used in analysing the contribution of each group to movements in the total index.

PRICE INDEX OF MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING

A detailed description of the index is contained in *Labour Report* No. 58, 1973. The separate city indexes shown below measure price movements within each city individually. They do not compare price levels as between cities.

(a) The index is on a net basis and relates in concept only to materials that enter Australian manufacturing industry from other sectors of the Australian economy or from overseas. (b) Figures are shown to one decimal place to avoid distortion that would occur in rounding the index numbers to the nearest whole number. (c) Excluding the manufactured imported crude materials listed in footnote (d). (d) Includes imported fuel oil and the following manufactured imported crude materials: synthetic rubber, hardwood, softwood, woodpulp, synthetic fibre, vegetable oils.

(a) For a full description of Division C, 'Manufacturing' and the selected sub-divisions see Australian Standard Industrial Classification (ASIC), Preliminary Edition, 1969. (b) Indexes for the remaining sub-divisions of Manufacturing Division are in process of development. The indexes are on a 'net sub-division' basis; see paragraphs 3 and 6. ASIC sub-division codes are shown in brackets at the head of the columns. (c) This index is on a 'net division' basis and relates in concept only to articles which are produced in the Manufacturing Division of ASIC (Division C) for sale or transfer outside the Division; see paragraphs 3 and 5. (d) Figures are shown to one decimal place to avoid distortions that would occur in rounding the index numbers to the nearest whole number.

CONSUMER (RETAIL) PRICE INDEXES, VARIOUS COUNTRIES

(Base of each index: Year 1970 = 100.0)

(Source: Monthly Bulletin of Statistics of the Statistical Office of the United Nations)

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

The items priced and the levels at which they are priced in these indexes vary widely according to the intended purposes of the indexes of the various countries. A short dash on each side of an index number (e.g. -107.6-) indicates that the two series have been linked at that period.

CONSUMER PRICE INDEX

The Consumer Price Index has been compiled for periods from September quarter 1948. The composition of groups and the group structure of the index has been altered with the introduction of the ninth Consumer Price Index series from December quarter 1976. A brief description of the latest link is contained in the Appendix to the December quarter 1976 *Consumer Price Index* bulletin (Reference No. 9.1).

(a) For a full weeks work (excluding overtime), as prescribed in awards, determinations and collective agreements. The wage rates for adult males exclude rural industry. The wage rates for adult females exclude rural industry; mining and quarrying and building and construction. Rates shown should not be regarded as actual current averages, but as indexes expressed in money terms indicative of trends. They do not measure the relative level of minimum wages as between States. Figures for the last twelve months are subject to revision. (b) The hours for adult males exclude rural industry; and shipping and stevedoring. The hours for adult females exclude rural industry; mining and quarrying; and building and construction.

NOTE. For further information regarding these statistics reference should be made to the monthly bulletin *Wage Rates and Earnings* (Reference No. 6.16).

AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT (a)
(Revised Series)

Original Series. Estimates of average weekly earnings are made each quarter in respect of both full-time and part-time civilian wage and salary earners in all industries combined. The earnings figures used in the calculation of the averages comprise award and over-award wages and salaries, the earnings of employees not covered by awards, overtime earnings, etc., and includes payments made retrospectively or in advance during the quarter. Particulars of employment and wages and salaries are derived from payroll tax returns and from direct returns from government and other bodies. For a more detailed explanation of the methods used, see *Average Weekly Earnings* (Reference No. 6.18).

Seasonally adjusted series. Quarterly estimates are affected by seasonal influences. For example special payments, including prepayments for holiday periods tend to raise the December quarter and to depress the March quarter averages. In addition, figures for all quarters are affected by the varying incidence of pay-days in successive quarters. Allowance for the varying incidence of pay-days and for seasonal factors has been made in calculating the seasonally adjusted estimates. It should also be noted that seasonal adjustment factors were estimated from a series adjusted to allow for the effects of major awards and determinations of Federal and State industrial authorities. The effects of these awards and determinations are retained in the seasonally adjusted data. A detailed description of the methods of seasonal adjustment is given in *Seasonally Adjusted Indicators* (Reference No. 1.10).

(a) Particulars of wages and salaries paid are not available for males and females separately: estimates have therefore been calculated in terms of male units, i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratio of female to male average earnings in each State. The ratio used in the current quarter for Australia is approximately 66 per cent. For further details on the separate State ratios see *Average Weekly Earnings* (Reference No. 6.18). (b) Original series estimates have been calculated on a basis which excludes the effects of varying numbers of Australian Government pay-days in each quarter. Estimates prior to 1974-75 are not available.

(a) Includes other building (new plus alterations and additions) valued at \$10,000 and over. (b) Account has been taken not only of normal seasonal factors but additionally of 'trading-day' effects (arising from the varying number of Sundays, Mondays, Tuesdays, etc., in the month) and the influence of Easter which may in successive years affect figures for different months. (c) Valued at \$10,000 and over.

NOTE: Statistics on alterations and additions to dwellings, valued at \$2,000-\$9,999 are collected but not included in the tabulations. The total value of building approved in this category in July 1977 was \$25.3m.

NEW CAPITAL EXPENDITURE BY PRIVATE ENTERPRISES, ASIC SUB-DIVISION AND TYPE OF ASSET (\$ million)

These statistics are designed primarily to measure trends in expenditure by private enterprises, on new fixed tangible assets. The statistics in this table differ somewhat from the item *Gross fixed capital expenditure* in the table on page 36 of this publication as a result of the different methods of compilation of the two sets of statistics.

(c) Finance, insurance, real estate, business services, communication, entertainment, recreation, restaurants, hotels and personal services. (d) Includes community services and construction. (e) Includes assets such as buildings, wharves, railway and harbour construction, roads and also lifts, heating and ventilation equipment and the like forming an integral part of the structure. Also included is the value of expenditure on mine development (e.g. construction of shafts in underground mines, preparation of mining and quarrying sites for open-cut extraction other equipment, furniture, fixtures and fittings not forming an integral part of buildings, durable containers, special tooling, etc.

* Revised following annual re-analysis.

INCREASE IN BOOK VALUE OF STOCKS HELD BY PRIVATE ENTERPRISES (\$ million)

These statistics are designed primarily to measure trends in investment in stocks by private enterprises. The statistics in this table differ somewhat from the item *Increase in stocks* in the table on page 36 as a result of the different methods of compilation of these two sets of statistics.

(a) Includes electricity and gas, restaurants, hotels and clubs. (b) Informants are asked to report the book value of their stocks at the end of each quarter according to their normal practices of valuing stocks for balance sheet purposes. Increases in the book value of stocks between the beginning and end of a quarter will partly reflect changes in the physical quantities of all component items and partly changes in prices at which the stocks are valued. A stock valuation adjustment is deducted from the increase in book value of stocks to arrive at the increase in stocks valued at the average price of the quarter. (c) Each year the framework and the samples are revised. For reasons of comparability estimates are prepared for both the original sample and revised sample.

(a) Quantities shown are metallic contents of mine products based on chemical assay. (b) Western Australian and Northern Territory gold production figures (in respect of major producers) normally relate to a four-week period ending in the calendar month indicated. However, two such periods ended in the calendar month of March 1977 for Western Australia and June 1976 for the Northern Territory.

(a) Northern Territory included in South Australia.

Commencing with October 1975 several changes have been made to the series on permanent building societies. These are: (i) the adoption of size criteria, and (ii) changes in definitions and data items. As a result of these changes no strict comparability exists between the two series. For further details on the break in series see the October, November and December 1975 issue of the bulletin *Housing Finance for Owner Occupation - Permanent Building Societies* (Reference No. 5.58).

(a) Up to 30 June 1974, SDR and IMF gold tranche are valued on the basis of Australia's official parity established with the IMF; subsequent figures are based on the IMF basket valuation for the SDR, which is published in terms of U.S. dollars, crossed with the representative rate for the Australian dollar in terms of the U.S. dollar. Gold is valued at the Reserve Bank buying price up to the end of January 1976; from February 1976 to end May 1976 gold is valued at the IMF official price in SDR converted to Australian dollars at the derived SDR/A rate; subsequently, the basis of valuation is the average London gold price for the month, converted to Australian dollars at the market rate of exchange applying on the last day of the month. Since June 1973, the foreign currency value of all other overseas assets has been based, where applicable, on market quotations, accrued interest is normally taken into account; figures for earlier periods are on a historical cost basis. Conversion to Australian dollar equivalent is based on market rates of exchange. (b) Changes in the value of holdings of official reserve assets reflect both balance of payments transactions and valuation effects arising from changes in exchange rates. (c) Series to be revised. Figures not yet available.

(a) Aggregates for the six States and the Commonwealth Government together, as obtained from particulars in this table, contain duplications due to State payments to the Commonwealth Government in respect of payroll tax before October 1971 and Commonwealth Government payments to the States of grants for specific and general purposes. (b) Figures for New South Wales represent combined transactions of consolidated revenue fund and trading enterprises (Public Transport Commission and Maritime Services Board) included in annual Budget papers. Adjustments have been made to exclude duplications. (c) Figures for Victoria cover the Victorian Consolidated Revenue Fund excluding the Works and Services section.
