

AUSTRALIAN BUREAU OF STATISTICS
CANBERRA

Reference No. 6.37

FOR RELEASE : NOON 27 JULY 1976

WAGE RATES INDEXES : MAY 1976 (PRELIMINARY)

MAIN FEATURES

- In May 1976 the weighted average minimum weekly wage rate increased by \$3.54 (2.8 per cent) to \$129.08 for adult males and \$3.44 (3.0 per cent) to \$119.60 for adult females.
- These increases were the result of indexation rises in Federal awards and most State awards.

EXPLANATORY NOTES

This statement contains figures of weighted average minimum weekly and hourly wage rates and index numbers for adult males and adult females for May 1976 and corresponding figures for some earlier months. More information on these statistics will appear later in the monthly bulletin *Wage Rates and Earnings* (Reference No. 6.16) which also contains explanatory notes covering definitions, scope of the statistics, etc.

2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular

occupations in awards or determinations of Federal or State industrial authorities; in collective agreements registered with these authorities; or in unregistered collective agreements where these are dominant in particular industries. Because the indexes are designed to measure movements in prescribed minimum rates of wages as distinct from salaries, those awards, etc. which relate solely or mainly to salary earners are excluded. Because of delays in the receipt of notification of changes in wage rates as well as retrospective changes to rates, figures for July 1974 and subsequent months are subject to revision. As such revisions are made they are published in the normal monthly tables of this statement.

3. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in these tables are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

TABLE 1. - WEEKLY AND HOURLY WAGE RATES : ADULT MALES AND ADULT FEMALES
ALL INDUSTRY GROUPS, AUSTRALIA (a)

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and collective agreements; weighted average minimum hourly rates payable; and index numbers of wage rates.

(a) Figures subject to revision. See explanatory notes above. (b) Excludes rural industry. Hourly rates also exclude shipping and stevedoring. The former is not included in the wage rates index and for the latter definite particulars for the computation of hourly wage rates are not available. (c) Excludes rural industry; mining and quarrying; and building and construction. (d) Percentage change over the same month of the previous year. These percentages may fluctuate from month to month owing to the timing of significant award changes. (e) Base : Weighted average wage rate, Australia, year 1954 = 100.

(a) This table shows the distribution of weekly wage rates included in the wage rates indexes, the weighted averages and medians of the indexes, and the percentage of index weights for wage rates equal to the various minimum wages. Comparable figures for September 1975 and February 1976 may be found in the bulletin, *Wage Rates and Earnings, February 1976* (Reference No. 6.16). (b) The median divides a distribution into two equal groups, one group having rates above the median and the other having rates below it, each group having 50 percent of the relevant weights.
