Names written in **boldface** refer to first authors, in CAPITAL letters to keynote and invited papers. Full papers can be accessed from the abstracts (ISCA members only). Presentations and posters are in PDF format unless specified otherwise. [Please note that each abstract opens in a separate window.](#)

Table of Contents and Access to Abstracts

Keynote Papers

[Hawkins, Sarah: "Phonetic perspectives on modelling information in the speech signal". paper K1.](#)

[d'Alessandro, Christophe: "New paradigms for speech analysis and processing: the source-filter](#)

[model revisited and gesture-controlled analysis-by-synthesis", paper K2.](#)

Estimating Speech Production Parameters

[Kawahara, Hideki / Morise, Masanori / Takahashi, Toru / Nisimura, Ryuichi / Banno, Hideki / Irino, Toshio: "A unified approach for F0 extraction and aperiodicity estimation based on a temporally stable power spectral representation", paper 043.](#)

[Pantazis, Yannis / Rosec, Olivier / Stylianou, Yannis: "On the estimation of the speech harmonic model", paper 031.](#)

[Yegnanarayana, Bayya / Murty, K. Sri Rama / Rajendran, S.: "Analysis of stop consonants in indian languages using excitation source information in speech signal", paper 045.](#)

Attribute Detection and Knowledge Discovery

[Van hamme, Hugo: "Integration of asynchronous knowledge sources in a novel speech recognition framework", paper 038.](#)

[Mohapatra, Prateeti / Fosler-Lussier, Eric: "Incorporating suprasegmental knowledge for phone recognition with conditional random fields", paper 054.](#)

[Lyu, Dau-Cheng / Siniscalchi, Sabato Marco / Lee, Chin-Hui: "An experimental study on continuous phone recognition with little or no language-specific training data", paper 005.](#)

Features for Speaker Recognition

[Wójcicki, Kamil / Paliwal, Kuldeep: "On the relative importance of the short-time magnitude and phase spectra towards speaker dependent information", paper 048.](#)

[Tamarit, Lucas / Goudbeek, Martijn / Scherer, Klaus: "Spectral slope measurements in emotionally expressive speech", paper 007.](#)

[Das, Amitava / Chittaranjan, Gokul: "Automated speaker recognition using compressed temporal-spectral dynamics information of password spectrograms", paper 014.](#)

Acoustic Event Detection

[Davies, Dave / Millar, Bruce: "Innovative acoustic probes to test predictions of wider utterance context", paper 044.](#)

[Skogstad, Trond / Svendsen, Torbjørn: "Time-varying cepstral coefficients", paper 053.](#)

[Zhang, Chi / Hansen, John H. L.: "Effective segmentation based on vocal effort change point detection", paper 034.](#)

Speech Analysis and Modelling for Production and Recognition

[Bäckström, Tom: "Fitting mass-spring models to glottal flow estimates", paper 047.](#)

[Blomberg, Mats / Elenius, Daniel: "Investigating explicit model transformations for speaker normalization", paper 052.](#)

[Gemmeke, Jort / Cranen, Bert: "Noise robust digit recognition using sparse representations".](#)

[paper 022.](#)

[Paraskevas, Ioannis / Rangoussi, Maria: "The Hartley phase spectrum as a noise-robust feature in speech analysis", paper 041.](#)

[Luneau, Jean-Marc / Lebrun, Jérôme / Jensen, Søren Holdt: "Complex wavelet modulation sub-bands and speech", paper 050.](#)

Speech Analysis and Modelling for Production and Recognition

[Scharenborg, Odette / Cooke, Martin: "Comparing human and machine recognition performance on a VCV corpus", paper 003.](#)

[Goudbeek, Martijn / Scherer, Klaus. R: "Acoustic profiles in emotion - the GEMEP corpus", paper 040.](#)

[Schnell, Karl: "Speech analysis by time-varying lattice filters", paper 039.](#)

[Dalsgaard, Paul / Pedersen, Christian F. / Andersen, Ove / Yegnanarayana, Bayya: "Using zeros of the z-transform in the analysis of speech signals", paper 013.](#)

Speech Attributes and Knowledge Discovery

[Orphanidou, Christina / Kochanski, Greg / Coleman, John: "An acoustic investigation of the \[ATR\] feature effect on vowel-to-vowel coarticulation", paper 051.](#)

[Siniscalchi, Sabato Marco / Birkenes, Øystein / Johnsen, Magne H. / Svendsen, Torbjørn: "Joint optimization of event detectors and evidence merger for continuous phone recognition", paper 057.](#)

[Bosch, Louis ten / Van hamme, Hugo / Boves, Lou: "Unsupervised detection of words - questioning the relevance of segmentation", paper 046.](#)

Speech Recognition and Classification

[Pohjalainen, Jouni / Magi, Carlo / Alku, Paavo: "Enhancing noise robustness in automatic speech recognition using stabilized weighted linear prediction \(SWLP\)", paper 002.](#)

[Kubo, Yotaro / Okawa, Shigeki / Kurematsu, Akira / Shirai, Katsuhiko: "Feature selection algorithms for the creation of multistream speech recognizers", paper 049.](#)

[Markaki, Maria / Stylianou, Yannis: "Discrimination of speech from nonspeech in broadcast news based on modulation frequency features", paper 032.](#)
