A SUMMARY OF PRINCIPAL STATISTICS OF FACTORIES : AUSTRALIA

NO. 9, 1956-57

CONTENTS

Table No.		Page No.
..	Preface	2
1.	Summary of Operations : Australia 1938-39, 1945-46 and 1954-55 to 1956-57; and States 1955-56 and 1956-57.	3
2.	Summary of Principal Statistics for each Industry : Australia, 1956-57.	4
3.	Number of Factories : States and Industries, 1956-57.	12
4.	Average Number of Persons employed over Whole Year : States and Industries, 1956-57.	15
5.	Average Whole Year Employment and Salaries and Wages Paid : States and Classes of Industry, 1956-57.	18
6.	Value of Materials and Power, Fuel, Light, etc. used : States and Classes of Industry, 1956-57.	19
7.	Value of Output and Value of Production : States and Classes of Industry, 1956-57.	20
8.	Value of Land and Buildings and Plant and Machinery : States and Classes of Industry, 1956-57.	21
9.	Rated Horsepower of Engines and Motors Employed to drive Machinery in each Class of Industry : Australia, 1956-57.	22
10.	Central Electric Stations : Capacity of Engines and Generators : Australia, 1956-57.	22

LIBRARY 25 OCT 1957

PREFACE

Preliminary details of the principal statistics covering the operations of Australian Factories for the year 1956-57 were published by this Bureau in a Statement (No. S.B. 612) issued on 30th June, 1958.

The object of this Summary is to present, in some detail, advance statistical information relating to the number of factories, employment, value of output and the various items of outlay, etc. in respect of Australian factories for the year 1956-57. The details shown in this Summary are virtually final and incorporate some revisions made to figures previously issued in S.B.612 Factory Statistics for the year 1956-57. They will subsequently be published in extended detail in Secondary Industries Bulletin No. 51, but this will not appear in print for some time. Details for years up to and including 1955-56 will be found in No. 50 and earlier issues of the Secondary Industries Bulletin (prior to 1949-50 entitled Production Bulletin - Part I).

A considerable amount of detailed statistical information relating to factory operations during 1956-57, including particulars of the quantities and values of individual materials used and articles produced, is at present being issued by this Bureau in the series "Manufacturing Industries". These publications provide summaries of the statistics covering 34 selected industries or industry groups.

The scope of the factory statistics is fully explained in the annual Secondary Industries Bulletin.

Briefly, a "factory" is taken to be an establishment in which four or more persons are employed or where power (other than manual) is used in any manufacturing process. It should be noted that details relating to small establishments not classified for statistical purposes as factories are not included in the figures shown herein.

All persons employed in the manufacturing activities of the factory are counted as factory employees. The figures relating to employment, therefore, exclude all those engaged in selling and distribution, such as salesmen, travellers, collectors, carters engaged solely on outward delivery of manufactured goods, and retailing storemen. The figures, however, do include proprietors who work in their own businesses as well as "out-workers".

The value of materials used includes the value, in the usual sense, of the materials used, stores used, containers, tools replaced and materials used in repairs to plant. In general, it does not include the value of customers' articles or materials repaired, assembled or treated by the factory.

The value of output is the selling value, at the factory, (exclusive of all delivery costs and charges and excise duties, but inclusive of bounty and subsidy payments to the manufacturer of the finished article) of all goods made during the year. In addition, it includes the value of other work done, such as repair work, assembling and making-up for customers.

The value of production is the value added to raw materials by the process of manufacture. It is calculated by deducting from the value of factory output the value (at the factory) of the materials used, containers and packing, power, fuel and light used, tools replaced and materials used in repairs to plant (but not depreciation charges). The value of production is the source from which such items as wages, interest, depreciation, profits, taxation, advertising and other sundry charges are met. As full details of costs of production are not collected, the amount of profit resulting from factory operations cannot be ascertained from the figures contained herein.

S.R. CARVER

(a) Average over whole year; includes working proprietors.
(b) Excludes amounts drawn by working proprietors.
(c) Includes water and lubricating oil.
(d) Includes also containers, etc., tools replaced and repairs to plant.
(e) Value added in process of manufacture (i.e. value of output less value of materials and fuel used).
(f) Value of goods produced including amounts received for work done.
(g) Depreciated or book value at end of year, including estimated value of rented premises and machinery.

(a) Average over whole year; includes working proprietors.
(b) Excludes amounts drawn by working proprietors.
(c) Includes value of lubricants and water.
(d) Includes value of containers, packing, etc, and tools replaced and repairs to plant.
(e) Value added in process of manufacture (i.e. value of output less value of materials and fuel used).
(f) Value of goods produced including amounts received for work done.
(g) Depreciated or book value at end of year, including estimated value of rented premises and machinery.
