NEW SOUTH WALES : EMPLOYMENT AND UNEMPLOYMENT.

The following table, compiled by the Government Statistician of New South Wales from Census data, the returns of private employers accompanying remittances of wages tax, and returns of Government employment, gives the best measure available of the course of *total employment and unemployment* in New South Wales.

Middle of month.	Percentage of all who are dependent on and available for employment—			
	Including full-time equivalent of part-time relief workers with employed.		Excluding full-time equivalent of part-time relief workers from employed.	
	Employed.	Unemployed.	Employed.	Unemployed.
1933—June	74.4	25.6	73.5	26.5
1934—June	80.5	19.5	77.8	22.2
1935—June	85.9	14.1	83.1	16.9
1936—June	89.3	10.7	87.1	12.9
1937—June	93.5	6.5	92.3	7.7
1937—				
December (a)	97.2	2.8	96.0	4.0
1938—				
January	94.6	5.4	93.5	6.5
February	96.0	4.0	95.0	5.0
March	96.0	4.0	94.9	5.1
April	96.0	4.0	94.9	5.1
May	95.8	4.2	94.8	5.2
June	96.1	3.9	95.1	4.9
July	95.9	4.1	94.9	5.1
August	95.3	4.7	94.2	5.8
September	95.8	4.2	94.8	5.2
October	95.4	4.6	94.3	5.7
November	95.6	4.4	94.6	5.4
December(a)	96.5	3.5	95.4	4.6
1939—				
January	93.0	7.0	91.9	8.1
February	94.4	5.6	93.3	6.7
March	94.2	5.8	93.2	6.8

(a) Adjusted to exclude casual seasonal assistants in retail stores.

NOTES.

1. The index of employment is the ratio of the number in employment to the estimated number of wage earners available for employment. The index of unemployment is the residue, but both indexes are derived by modifying the Census ratios in accordance with subsequent changes.

2. "Number in employment" is virtually a direct record; "number of available wage earners" is an estimate derived by increasing the total wage earners in employment (plus unemployed) at the Census of 1933 in ratio to the annual increase in persons aged 15 to 64 years. In order to increase the degree of precision in the index, adjustment is made in the number of available wage earners thus estimated to allow for (a) increase in the proportion of females who are wage earners, (b) youths who were without occupation but were not recorded in the wage-earning group at the Census of 1933. Adjustment for seasonal variations in employment is not made except in respect of casual retail employees in December.

3. At the Census of 1933, 15,142 persons, or 1.8 per cent. of total dependent on employment, were unemployed by reason of illness, accident, &c., or voluntarily. These are excluded from the above indexes, which relate to percentages of available wage earners employed and unemployed.

4. The percentages of unemployment shown above are approximations relating to all wage earners of both sexes. Separate estimates for males and females cannot be made from the data available. In 1938, however, there was relatively little unemployment among females; unemployment among males was probably between 1 per cent. and 1.5 per cent. greater than the ratio shown above for both sexes combined.

QUEENSLAND : EMPLOYMENT AND UNEMPLOYMENT.

The following table, compiled by the Queensland Bureau of Industry from the amount of contributions to the Unemployment Insurance Scheme, wages paid from the Unemployment Relief Fund, and other records, gives the best measure available of *total adult male employment* in Queensland.

MEN WAGE AND SALARY EARNERS.

Three months ended—	Percentage of all who are dependent on employment.			
	Including full-time equivalent of relief workers with *employed.		Excluding " Intermittent Relief Workers " from employed.	
	Employed.	Unemployed.	Employed.	Unemployed.
1933—June	79.0	21.0	72.9	27.1
1934—June	85.0	15.0	80.2	19.8
1935—June	89.9	10.1	85.2	14.8
1936—June	91.8	8.2	86.4	13.6
1937—June	94.3	5.7	90.5	9.5
1937—				
December	95.5	4.5	91.9	8.1
1938—				
January	95.4	4.6	91.8	8.2
February	95.3	4.7	91.8	8.2
March	95.4	4.6	91.7	8.3
April	95.2	4.8	91.6	8.4
May	95.3	4.7	91.7	8.3
June	95.4	4.6	91.8	8.2
July	95.7	4.3	92.1	7.9
August	95.9	4.1	92.5	7.5
September	96.0	4.0	92.8	7.2
October	95.5	4.5	93.2	6.8
November	95.2	4.8	93.7	6.3
December	94.8	5.2	94.0	6.0
1939				
January	95.2	4.8	94.6	5.4
February	95.3	4.7	94.7	5.3

NOTES.

1. The measurement is in terms of " full-time " employment, including its equivalent in " rationed " employment.
2. Normal seasonal variations are not recorded, the figures showing the trend apart from such changes.
3. The indexes have been adjusted to allow for the estimated increase in the number of men dependent on employment.

TASMANIA : EMPLOYMENT.

The following table, compiled from the wages tax returns of private employers in respect of their employees, whether subject to or not subject to tax, and from returns of Commonwealth, State and Local Government employment, gives the best measure available of the course of *total employment* in Tasmania.

Period.	Private Industry.			Public Authorities.			Total Employment— Public and Private.

(a) See Note 2 below.

NOTES.

1. For each month of completed financial years the figures in the table may be regarded as providing a virtually complete record of total employment. They are a combination of monthly figures received currently and annually, covering both private and public employment. They are deficient only to the inappreciable extent that some relief and other intermittent workers and domestic workers in private homes are not covered by the monthly returns. On the other hand, to the extent that they embrace the majority of workers subject to intermittent employment over the whole year, they reflect fully the seasonal and all other influences upon employment in Tasmania.

2. For the months of the present financial year the figures are estimates based upon the current monthly movements of all public authority employment and of about 44 per cent. of total private employment. For a given month the figure of total private employment of the corresponding month of the previous year is changed in the ratio of the change of the current figure of private employment. The indication of the position for all employment in Tasmania given by this technical procedure must be read in the light of other indications of current change.

(a) Excluding Working Proprietors.

(b) The Australian index has been revised since July 1937, and the Victorian index since July, 1938. The New South Wales and Victorian indexes for 1937-38 are based on final factory returns.

A comparison of factory employment in March, 1939 (the latest month for which figures are available for all States) with March, 1938, shows the following estimated percentage changes:—New South Wales, - 1.6; Victoria, - 6.7; Queensland, + 0.9; South Australia, + 1.7; Western Australia, - 1.8; Tasmania, + 0.8; Australia, - 3.0 (or, taking account of the growth of employee population, - 4.0).

INDEX OF EMPLOYMENT IN RETAIL STORES.

(Base : July, 1933 = 100.)

Period.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Australian Index.	
							Un-adjusted.	Divided by Index of Employee Population.

March	129	139	113	111	113	132	127.2	119.6

A comparison of employment in retail stores in March, 1939 (the latest month for which figures are available for all States) with March, 1938, shows the following estimated percentage changes:—New South Wales, + 0.8; Victoria, - 0.7; Queensland, + 2.7; South Australia, - 0.9; Western Australia, - 1.7; Tasmania, + 7.3; Australia, + 0.4 (or, taking account of the growth of employee population, - 0.8).

TRADE UNION UNEMPLOYMENT RETURNS.

The only regular records of unemployment available in comparable form over a considerable period are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 54 per cent. of the total trade union membership and about 20 per cent. of all wage and salary earners.

The percentages stated for New South Wales and Queensland differ from those given on previous pages partly because of differences in the field of employment covered, and partly because the trade union returns relate only to the position as it is known to the unions.

Period.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania. (a)	Australia.
	%	%	%	%	%	%	%
1928-29	10.6	9.7	7.0	14.6	9.1	13.0	10.2

November	10.1	9.0	5.7	8.8	6.5	10.2	8.9
1939—							
February	11.0	10.8	6.1	9.3	7.3	7.6	9.8

(a) Revised Series. These percentages, which replace those hitherto published, are based on the returns of reporting unions after excluding females from Class III. (Food, drink, &c.). The females excluded, although substantially all employed from January to March, are for the rest of the year not "unemployed" in the sense that they are seeking jobs unsuccessfully in their own industry. They are either employed in other occupations (e.g., paid domestic service) or are engaged in home duties.

INDUSTRIAL GROUPS: CHANGE FROM NOVEMBER, 1938, TO FEBRUARY, 1939.

Manufacturing—I. Wood, furniture, &c., 13.4% to 15.7%; II. Engineering, metal works, &c., 5.8% to 7.5%; III. Food, drink and tobacco, &c., 15.5% to 16.0%; IV. Clothing, hats, boots, &c., 13.3% to 14.0%; V. Books, printing, &c., 3.4% to 3.8%; VI. Other Manufacturing, 11.4% to 11.8%; VII. Building, 7.6% to 8.8%; VIII. Mining, quarrying, &c., 10.7% to 11.9%; X. Land Transport, other than railway and tramway services, 7.9% to 7.7%; IX, XI, XII, XIII. and XIV. Other and Miscellaneous, 6.6% to 7.3%; All Groups, 8.9% to 9.8%.

BALANCE OF OVERSEA TRADE.

In the following table the oversea trade of the Commonwealth in physical commodities has been set out in a form which distinguishes between the ordinary trade in commodities other than gold, those movements of gold which may be regarded as resulting from current Australian production, and those movements of gold which cannot be attributed to the fact that Australia is a gold-producing country. The balance of trade on "current" account (that is, including credits from gold produced rather than gold exported) is given in columns D and E. The total balance of trade, as officially recorded, is given by the total of columns D and F.

Out of the credits mentioned above, together with those accruing from other "invisible" sources and existing balances of "oversea funds", Australia has to provide for various recurrent charges incurred overseas, and some payments of a capital nature. Chief among the former are the oversea interest commitments of the Australian Governments and other public bodies, which for the present trade year are estimated at approximately £22,000,000 sterling.

£'000 Sterling.

Period.	Merchandise and Silver.		Gold.	Net Credits from Current Items.		Gold.

EXPORT PRICES AND EXPORT PRICE INDEX.

The following table shows the course of prices of seven of the more important Australian export commodities. The quotations are for units of standard grade, and hence do not reflect variations in the grades or qualities of the goods actually exported in each month. Index-numbers of the average level of export prices are included. They are compiled from the prices of 20 commodities, which constitute at present about 85 per cent. of all exports.

Monthly Weighted Averages.	Export Parities—Australian Currency.							General Export Price Index.

EXPORT PRICE INDEX (CHANGING BASE).

In computing the monthly index-numbers given on the previous page, the prices are multiplied by the average quantities exported during a fairly recent and representative period. Hence, while they indicate satisfactorily the general trend of the market, they take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

Base: Weighted Average Price Level in corresponding months of preceding year = 1,000.

Month.	<i>Month stated compared with same month of preceding year.</i>	<i>Period of trade year ending in month stated compared with same period of preceding year.</i>

WHOLESALE PRICE INDEX.

BASIC MATERIALS AND FOODSTUFFS.

This new index is intended to replace the old Melbourne Index of General Wholesale Prices. Its construction has been made possible by the collection of new data on prices and consumption. Both the contents and the method of computation have been altered. The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base: 1928-29 = 1,000.)

(a) Revised.

PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base 1928-29 = 1,000 from the revised series published in *Production Bulletin* No. 30. They are based in general on prices realized in the principal markets of the Commonwealth.

The monthly index-numbers (based on the nearest equivalent wholesale quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and to provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

(Base: 1928-29 = 1,000.)

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £ of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recomputed from original base, par values.

(a) Compiled by the Stock Exchange of Melbourne. The index-numbers of ordinary shares are based on the prices of the shares of companies whose business is more or less national in character. They represent averages (weighted by paid-up capital, with adjustments in the case of bank shares) of the mean monthly prices on the Melbourne Stock Exchange. The preference share index-numbers are based on the reciprocals of average yields. Recomputed from original base, May, 1926. (b) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. End-of-month values were used until December, 1930, and mean monthly values thereafter. Recomputed from original base, April, 1928.

(a) Revised.

NOTES.

A. This column is the total of all series available continuously since 1928-29 for which information is at present collected at least quarterly. Columns G above and J on the next page are omitted because quarterly figures are not available for the earlier years, and column L on the next page is omitted because quarterly figures are not available.

F. Includes the Cities of Geelong West, Mildura and Warrambool and the Towns of Horsham, Newtown and Chilwell, and Sale.

G. Includes the Cities of Ballarat, Bendigo and Geelong, and Shepparton Borough.

(a) Revised series, now based throughout on total production. (b) Includes all central generating stations. (c) The base for each month is the average sales in the corresponding months of the three years 1929 to 1931; i.e. seasonal variations are removed. Based on units of 3,412 B.T.U. (d) Estimated on the basis of production by the Electrolytic Zinc Company Ltd. (e) Subject to revision.

MAINLAND STATE RAILWAYS : FREIGHT, PASSENGERS AND REVENUE.

The following table shows statistics of freight and passengers carried and of revenue earned on the five Mainland State Railways.

The daily average number of passenger journeys is obtained by dividing the monthly totals by the total number of days in the month.

Period.	Freight Carried.		Passenger Journeys Daily Average.	Gross Monthly Revenue.	Net Monthly Revenue.
	Net Ton Miles Daily Average.	Average haul per ton.			
	'000.	Miles.	'000.	£'000.	£'000.

(a) Figures not comparable with other months owing to the inclusion in some States of certain annual and other commitments in the expenditure figures for June.

MAINLAND RAILWAYS : FREIGHT TONNAGES CARRIED.

The following table shows statistics of freight tonnages carried by the Mainland State and Commonwealth Railways.

The daily averages for freight tonnages are obtained by dividing monthly tonnages by the number of days in the month, excluding Sundays, Xmas Day and Good Friday.

Freight totals are obtained by adding together the total freight tonnages carried on the Commonwealth and State Railways and deducting the sum of the interstate tonnages carried in New South Wales and South Australia. This avoids double-counting except to a negligible extent.

Period.	Daily Average Net Tonnage Carried—Mainland State and Commonwealth Railways.

WHOLESALE TRADE.

Some indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts, but care must be exercised in interpreting the figures. The returns do not relate to all wholesale trade, nor do they cover a constant proportion of all trade. The effects of legislative and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, although total recorded sales are affected in smaller degree by such changes. Insufficient information is available to enable adjustments to be made to the crude figures on this account. Except where such changes are indicated, the "preliminary" figures are fairly comparable with one another, but they are not directly comparable with the "final" figures.

An index of activity in New South Wales is afforded by monthly returns of the sales of 42 large factories.

(a) The Act came into operation on 18th August, 1930, the rate of tax being 2½ per cent. It was raised to 6 per cent. on 11th July, 1931, reduced to 5 per cent. on 26th October, 1933, to 4 per cent. on 11th September, 1936, and raised to 5 per cent. on 22nd September, 1938. With certain specified exemptions, all goods sold in Australia, including imports, are taxable. (b) "Final" figures. (c) "Preliminary" figures. (d) The list of assumptions was extended as from 11th July, 1931; 2nd September, 1932; 11th November, 1932; 27th October, 1933; 1st August, 1934; 13th December, 1934; 25th October, 1935; and 26th September, 1936.

(a) Includes Incribed Deposit Stock of E.S. and A. and Queensland National Banks. (b) In computing the ratios the figures relating to the Rural Bank of New South Wales have been excluded. (c) Includes Short Term Loans, other than Treasury Bills, of the Commonwealth Bank.

BANK CLEARINGS.

In the absence of statistics of debits to customers' accounts, bank clearings form a useful index of the money-value of cheque payments. Since they do not include cheques deposited in the banks on which they are drawn, the figures are not exhaustive, and their comparability is sometimes impaired by the effects of banking amalgamations. Cheque clearings connected with the redemption or issue of Treasury Bills have been excluded from the following table, but adjustments have not been made for other sporadic transactions concerned with public finance.

£'000.

(a) Excluding Northern Territory and extra Metropolitan area of Western Australia; also Australian Capital Territory prior to 1935-36. The footnote in issues of the Review prior to No. 18 stated that "the figures relating to the earlier years are approximate only, as complete particulars are not available." The numbers of new cars and commercial vehicles registered for each year up to 1935-36 have now been revised, and may be taken as substantially accurate.
